It brings in support for all Animal Crossing series amiibo figures and cards. You can tap these figures and cards to invite villagers or get items themed to those characters. This update is also included in a new packaged version called Animal Crossing: New Leaf - Welcome amiibo. On December 2nd, 50 new Animal Crossing: New Leaf amiibo cards can be used in various ways. You can tap them to invite villagers for a visit or move in. Some amiibo characters offer special items that give access to mini-games like Desert Island Escape and Animal Crossing Puzzle League. Additionally, you can scan select non-Animal Crossing amiibo figures to get unique furniture items. Other new features include MEOW Coupons, which can be earned by completing daily or weekly town initiatives. items at the Campground. Amiibo Camera Mode allows you to take photos and share them using the 3DS Image Share Tool. If you have save data and unlock giant furniture items. The update also includes Extra Home Decorating & Storage features, making it easier to customize your home and use additional storage for your house. The villager campsite is managed by Harvey, who invites the villagers from Animal Crossing and Doubutsu no Mori e+, as well as new amiibo cards featuring these characters. Some amiibo series, such as Splatoon and The Legend of Zelda, offer exclusive characters and items when scanned. However, only a limited number of Sanrio amiibo and include Felyne, Filly, and Holden. Players can now take photos with their console's camera using the new amiibo Camera feature. This feature allows players to place villagers into photographs and adjust various settings such as lighting effects and character poses. The campground has also been updated with a new campsite managed by Harvey, where players can receive exclusive items and participate in daily initiatives. Town initiatives. Town initiatives. The player's house has also been updated with a new house expansion, the Secret Storeroom, which provides additional storage space and can be accessed through the touch screen. The ability to sell towns to Tom Nook for large amounts of Bells is now available when rebuilding a town. This feature allows players to transfer funds to create a new town. Selling a town requires a certain level of prestige, which can be determined by the growth stage of the player's town. The Town Tree (50 days and 50 hours). Public works projects that have been requested by villagers in the old town will automatically be available to construct in the new town. The update includes two new minigames: Animal Crossing Puzzle League and Desert Island Escape. These can be played by activating a Nintendo 3DS XL/New Nintendo 3DS XL/New Nintendo 3DS XL or a Wii U piece of furniture, respectively. High scores at these games reward the player with exclusive furniture, respectively. improved interface options such as screensharing to Facebook and Twitter, and improved search function on the catalog machine. Furniture has also seen several updates, including floating balloon presents that can contain non-Balloon Series items after the series is fully obtained. Interactivity has been enhanced with features like sitting on rocks, shaking trees while holding tools, and performing a short dance at the campfire campground. In multiplayer, players rub their hands together, and interact with judges in a fighting stance. Birds now attract nearby birds to eat thrown beans on the ground, and Club Tortimer has more user safety features. The update also includes changes to villager behavior, such as increased movement time after announcing departure, and improved villager placement options. A ceremony is held in front of the plaza tree on the town's anniversary, and unlimited tries are allowed for Gracie's fashion check. The Blowfish can now be sold for 5,000 Bells. Animal Crossing: New Leaf Update To Bring amiibo Figure And Card Support The new update for the game brings amiibo figures card support, allowing players to unlock in-game items by using specific amiibo figures. The update also includes card support, where players to unlock in-game items by using specific amiibo figures. You're the mayor of town in this one, which lets you setup Public Works Projects. They're decorations for your town, and they let you customize how your town, and they let you customize how your town, and they let you customize how your town is. Except you can only make 30 of them, even though there's space for tons and tons of them. The selection of public projects is mostly limited to things like lamps and benches and statues. You can build up to three bridges across your town's river, but you can't divert the river, you can't add a pond or fill in a pond, you can't add or remove a ramp down to the beach. When villagers move in, they just move in any old place that fits, you can't declare where house lots should go. What I'm saying is that, for a game that tries to sell you on the point of being able to customize your town, you don't get access to a lot of very obvious customization options. Houses are about the same as before. You can buy. Always a central room, a room left, back, and right, and an upstairs and downstairs. You can't re-arrange the orientation of your house's rooms, like having it be a long ranch-style house or a tower house is rooms, like having it be a long ranch-style house or a tower house where you just stack it five floors high. Even if the exterior didn't change to match it, it would have been nice for your house's rooms to be arrangeable. Once you've picked up an item once, it goes into your catalog, so you can buy it again from Nook's if you sell or lose it. Except some items, so you can't re-purcahse them from your catalog. It'll show the item, and then not let you buy it. There's a "Mall" section, behind your main town, and you can upgrade it a bit. Re-Tail is in the main area, but all the rest of the stores, and the Museum and Post Office, are in the Mall area. Behind the Mall is the Happy Home section, where the houses of people you Street Pass are displayed, and you can order items that you see in their home. The villagers in town are kinda alright, some of them are fun characters that I really like (Ken and Bruce). Except they're a little shallow. You interact with them or not, and based on that they'll usually stay in town. If they decide to move, you can tell them to stay, and they'll stay if you've interacted with them a lot. I say "interact" instead of "be nice to" because it doesn't matter what your interaction is. You can tell them to stay, and they'll stay if you've interact of "be nice to" because it doesn't matter what your interaction is. push them into pit-falls, whatever. It's all the same to them. The villagers aren't very distinct in how they act in general. Internally, the game itself has like 6 general personality types, and it kinda shows through even without knowing that. There's apparently 110 or so villagers in the game, but you can only have up to 10 in your town at once. It'd probably have been better for them to make fewer villagers that are each more distinct. I guess what I'm getting at in general is that the game has stuff in it, but most of the options are kinda shallow or surface or whatever you wanna call it. There's not many systems driven interactions going on, and the game regularly feels like a disappointment and an "if only they had" sort \*\*\*\*. The player controls a human character who takes on the role of mayor in a town populated with anthropomorphic animals. [6] The fourth main game in the Animal Crossing series, it was released in Japan in November 2012, and in 2013 in international territories. The player has the ability to do activities such as bug catching, fishing, and befriending villagers. While retaining gameplay from older titles, Animal Crossing: New Leaf marks a change in the series, as the player becomes the mayor of the town, granting additional abilities such as to enact ordinances and start public works projects. With the help of the townsfolk and a secretary named Isabelle, it is now the player's job to make the town a better place to live. the series. Although the title was re-released under the Nintendo Selects banner in North America and as Happy Price Selection in Japan, an updated version with amiibo support and new features was released for free on the Nintendo eShop in November 2016 for owners of the original version. A retail version of the update was released as Animal Crossing: New Leaf - Welcome amiibo[c] in late 2016. ###ARTICLEIn Animal Crossing: New Leaf, players participate in various leisure activities such as fishing and bug catching. Pursuing these interests and selling items earns Bells, the game's currency, which can be used to renovate their house. The game is played in real-time, utilizing the Nintendo 3DS system's internal clock, with aspects like shop opening times, species of wildlife, and special events varying depending on the time of day and season.[7] The player begins the game living in a tent before their house, which eventually can be upgraded and expanded. Customization has been enhanced, particularly in the ability to modify the character's appearance and decorate their home. The character's pants can also be modified, and the ability to hang furniture on walls has been added. Features previously found only in the Japanese Dobutsu no Mori e+ for the GameCube, such as benches and lamp posts, have returned. Additionally, players can swim in the ocean that borders the town using a swimsuit.[8] Players could visit each other to a friends list to exchange messages with each other, while up to four players at a time were able to travel to the tropical Tortimer Island for various minigames that award medals.[9] Players can take snapshots at almost any time and share them using the town mayor, allowing more customization of their town than in previous games. While taking part in mayoral duties is not obligatory to play the game,[12] being the head of town imparts two gameplay features new to the series: Public Works Projects and Ordinances gives players to construct new objects such as bridges, fountains, and light poles. Ordinances gives players the ability to customize the way their town functions by passing laws, such as making the town wealthier or encouraging citizens to plant more flowers.[14] New Leaf's design team had to pay extra attention to lighting and shading, making sure that objects and characters didn't appear with obvious flaws from different perspectives. Design coordinator Koji Takahashi admitted it was hard to come up with new animal species for townsfolk, as they mostly wanted to stick with familiar examples, and in particular, chose alpacas due to their recent popularity in the country. Animal Crossing: New Leaf Release Date Announced for North America and Europe ###ENDARTICLEAnimal Crossing: New Leaf, released in 2012 for Nintendo 3DS, welcomed players to the charming world of Tom Nook's village. The game introduced various features, including a dynamic weather system and a fishing tournament event. The game's reception was mixed, with some critics praising its depth and others criticizing its simplicity. The game's success can be attributed to its nostalgic value and the charm of its characters. In 2016, a new update, Welcome amiibo, was released, bringing several changes to the game, including new furniture items, the introduction of MEOW Coupons, and a revamped Town Initiatives system. The Town Initiative feature allows players to participate in daily and weekly quests, earning rewards and MEOW Coupons. The Lucky Item Initiative mission can be confusing, but with some guidance, players can complete it successfully. currency by completing simple tasks on a daily and weekly basis. He's always up for treats from players but can be found there 24/7 to keep players company. ###ENDARTICLE3I/ATLAS, formerly known as A11pl3Z, is an inbound interstellar comet discovered by the Asteroid Terrestrial-impact Last Alert System station at Río Hurtado, Chile on 1 July 2025. When the comet was 4.5 AU from the Sun and moving at a relative speed of 61 km/s (38 mi/s), it followed an unbound hyperbolic trajectory around the Sun with an orbital eccentricity of 6.11±0.09. The size of its nucleus is uncertain, but estimates range from 0.8 to 24 km. It will come to perihelion on 29 October 2025 at a distance of 1.35 ± 0.01 AU (202.0 ± 1.5 million km) from the Sun. ###ARTICLE3I/ATLAS is expected to be a close approach to Mars on October 3, 2025, passing within 0.19 AU (28.4 million km; 17.7 million mi) of the planet. It will then pass by Earth at a distance of  $1.79 \pm 0.07$  AU (268  $\pm$  10 million km; 166.4  $\pm$  6.5 million mi) on December 19, 2025, and Jupiter at about 0.37  $\pm$  0.10 AU (55  $\pm$  15 million km; 34.4  $\pm$  9.3 million mi) on March 16, 2026. The comet's nucleus is estimated to be around 24 km (15 mi) in diameter, although it may appear smaller due to its coma. This object is less active than 2I/Borisov and has a size likely an order of magnitude larger.
