Join our graduates worldwide, and earn your diploma online, at your pace, on your schedule. Learn how we help students transitioning mid-year stay on track & finish courses on schedule. Acellus Academy's high school program allows students to graduate with a diploma from an accredited online school. Each student has access to self-paced courses, engaging video lessons, and personalized instruction. Acellus Academy offers two different graduation pathways: standard and honors. To meet Acellus Academy's graduation requirements, students can select from an expansive list of courses. In addition to core subjects, like math, language arts, and science, students can select electives that they find interesting, which allows them to experiment with subjects tailored to specific career fields. Acellus Academy's online high school prepares students for success after graduation. Whether they choose to attend college or pursue a career, Acellus Academy graduates will be competitive with their peers. High School Course Overview Each course is self-paced, allowing students to spend extra time as needed to master each lesson concept. Families have the flexibility to plan and adjust their schedule as needed. READ MORE Students may enroll in Acellus Academy at any time during the year. After enrolling, students will start at the beginning of each course and begin making their way toward graduation. ADMISSIONS PROCESS Courses may be taken for credit recovery by students who didn't pass a course on their first attempt. Explore Student Spotlights Read the stories below to see how an online high school education from Acellus Academy can help your student to pursue their dreams and achieve a bright future. Have a review to share? We'd love to hear your story! Alana M.Acellus Academy High School Graduate After being frustrated over homeschool products that tried the all day transitional approach, I researched and found Acellus with it's swiss cheese approach. I began reading how the curriculum was paced and adjusted to my children. I did not believe it at first. However, as I listened and viewed the information on the website I said it was worth a try. The lessons got to the point and the children were less burdened with busy work. The added bonus was Acellus let me check on them using my app without asking. Also, if they needed help I can see where I needed to focus help. As far as homeschool I am in Virginia. After I gave the Board of Education Acellus's accreditation, I no longer had to provide testing each year. They counted my children as enrolled in private school. This was cost and time saving. Now my daughter did well on her ACT and was accepted by 4 schools in 3 different states. Alana will start at Regent University August 2019 with over 10k in scholarships! My son is right behind her and is expected to graduate 2020! Thank you again for this wonderful program. As far as applying for school was easy. Most schools have an email to send official transcripts. Just call and ask for their official email and send it through the parent portal. Because she was at home and was an online student, her schools saw her as a self starter. She received a merit award for grades." Trudy M. - ParentVirginia, United States Sarah L.Acellus Academy High School Senior "I cannot thank you enough for all your help and support with this process and for writing me such a lovely letter of recommendation. I am incredibly thankful to have had the opportunity to work with you during my application process. I would also like to let you know how much I appreciate Acellus Academy with an accredited high school diploma. For more information, please see our Graduation Requirements. As a regionally accredited online high school, Acellus Academy meets the U.S. Military's education enlistment standards, granting graduates Tier 1 education status. Tier 1 status represents the highest level of recognition in U.S. Military enlistment for high school completion, signifying that a student has earned an official high school diploma. For more information visit our blog post, Entering the Military after Online High School. Acellus Academy graduates have been welcomed into colleges and universities throughout the United States and around the world. Acellus Academy is regionally accredited by the Western Association of Schools and Colleges (ACS WASC). Regional accreditation is the most widely accepted form of accreditation in the United States and is recognized by all major colleges and universities. Acellus Academy offers online high school core courses that are approved by the NCAA. For more information on how you can support your student-athlete in online high school, click here. Acellus Academy offers a unique learning environment that is specifically designed for students with special learning needs. Students have the freedom to learn at their own pace, with targeted Vectored Instruction provided to assist them when faced with challenges. Motivational incentives keep learning fun, while further enriching their educational experience. SPECIAL EDUCATION – Acellus Academy is dedicated to preparing students for careers in STEM-related fields through its comprehensive STEM-10 curriculum. Starting in elementary school with coding, and advancing through high school with advanced programming, Acellus STEM-10 ensures that students are equipped with the necessary skills and knowledge to excel in the ever-evolving world of STEM. STEM-10 CURRICULUM – Acellus Academy's Tier-1 Honors Program offers rigorous honors-level courses, empowering academically advanced students to excel and gain admission to competitive universities, in many cases with substantial scholarship opportunities. HONORS PROGRAM – WASC (Western Association of Schools & Colleges) Graduates recognized as Tier 1 for military enlistment. AP Coursework approved by the College Board. Core high school courses approved by the NCAA. Acellus Academy is proud to serve exceptionally talented and bright students across the nation and around the world. Explore our student spotlights to learn more about our incredible students and their outstanding achievements. Explore Student Spotlights Congratulations to our graduates! You are invited to join peers for commencement and graduation celebrations in Kansas City, MO. To achieve this vision, the Academy has pioneered innovative strategies that are transforming education and delivering remarkable student success. By approaching education as a science, we study how students learn and use these insights to develop cutting-edge teaching methods. The combination of highly qualified teachers with the power of technology to track and respond to student progress in real time enables us to overcome barriers to accelerated learning, ensuring that students receive the individualized attention they need to excel. Acellus Academy is a program of the International Academy of Science, a Kansas City based non-profit organization that has been advancing science and education for over thirty-five years. The Academy offers a fully accredited online private school experience for students in grades K-12. Drawing on experience from his own life and a successful career in high-tech innovation, Roger Billings motivates and inspires students of all ages to achieve their best and believe that they can make a difference. Watch it LIVE Wednesdays 6:30 pm CST. Back to Home Page After students successfully reach their daily goals on Acellus, a wide range of learning activities become accessible. These activities provide learning opportunities in an unstructured format that fosters a love for learning and enriches students' educational experience. Acellus understands that closing gaps in foundational knowledge is essential for student success. Vectored Instruction® is an innovative system designed to address these gaps and provide timely interventions. Utilizing Prism Diagnostics®, Acellus analyzes student responses, categorizing them to identify the root causes of misunderstandings. This allows Acellus to deliver precise interventions tailored to each student's specific deficiencies. Acellus Gold is equipped with powerful tools that alleviate the burden of routine tasks from the teacher's daily schedule. Simultaneously, it offers actionable guidance on supporting individual students, streamlining the teacher's role and ensuring that attention is focused where it is most urgently needed. Building on modern research, Acellus developers study the way students learn, identify obstacles to learning, and experiment with different techniques rooted in cognitive science to discover the ones that accelerate learning. Transforming Education's Landscape The Acellus team has embarked on a mission to revolutionize students' learning experiences through an innovative online learning system. The manifestation of the Acellus Effect is shown when students who were struggling start experiencing success, when they grow in their self-esteem, when their attitudes change, and when there is a pervasive positive shift in the attitudes of both teachers and parents towards the education of their students. Acellus is equipped with powerful tools that alleviate the burden of routine tasks from the teacher's daily schedules. Simultaneously, it offers actionable guidance on supporting individual students, streamlining the teacher's role and ensuring that attention is focused where it is most urgently needed. From our perspective at Acellus, teachers constitute the bedrock of learning within our educational institutions. Recognizing the pivotal role they play, Acellus advocates for providing the recognition and support essential for their triumph. by Dr. Roger Billings VIEW WHITE PAPER View High School Course Listing One System – All Your Students Schools that are using Acellus in their Special Education programs have found that students very quickly start experiencing success and are often able to achieve grade level expectations. Extensive research has been done on how to most effectively teach students with special needs, and specific methodologies have been developed to most effectively reach these learners. Courses are available that have been specially designed for special education, starting at the elementary level and going up through 12th grade. LEARN MORE ) Acellus offers schools a wide suite of video-based courses for credit recovery, including electives and Career and Technical Education courses. The instruction is catered to the need of each student, so that priority is given to concepts students are still gaining mastery over. When gaps and areas of weakness are identified, even from prior courses of study, Vectored Instruction is activated and through targeted teaching builds back the missing foundational knowledge needed for a student to successfully complete the course. The Acellus STEM Lab program empowers math and science teachers to offer effective coding and robotics courses without the need for extensive additional training. The STEM Lab includes video-based coding courseware, and a programmable robot. By combining self-contained instruction with interactive tutoring to the student by the robot, Acellus is able to provide schools with STEM courses that can be up and running overnight. LEARN MORE ) Learners who show evidence of high achievement, such as gifted and talented students, often have unique requirements that require specialized instruction in order for them to fully develop their capabilities. Acellus allows students to move forward on an accelerated path, and differentiates the instruction so that students with various skill levels are not held back. A special accelerated mode of Acellus has been developed specifically for gifted and honors students. Acellus Career and Technical Education (CTE) courses incorporate the necessary academic anchor standards, along with the career and life-skills training essential for success in the 'real world'. With the various career clusters Acellus offers, students are able to take courses specific to the career pathway of their choice. Acellus CTE courses provide career related education experiences, while also allowing students to earn industry recognized credentials. The Acellus Discover English courses are developed for students in ESL/ELL programs. They are ideal for students from any ethnic background and language that are learning English. This course utilizes the Universal Interaction Technique, developed by Roger Billings, so that the same course can simultaneously support students of various native tongues. Acellus provides targeted intervention for students, integrating prescriptive assessments and customized content, based on the student's skills and individual needs. Acellus identifies specific gaps in students' knowledge based upon their response to the presented concepts. Acellus then provides Customized Personal Instruction (CPI) to apply targeted intervention in the prescribed areas. The Acellus SEL (Social Emotional Learning) courses focus on the importance of cultivating healthy relationships, a caring attitude, and the importance of one's overall well-being and physical health. SEL inspires positivity, which will empower students to face the day-to-day challenges they will encounter in the real world. Separate courses have been developed for the elementary, middle, and high school levels. Incorporating Acellus into After School programs allows schools to personalize the learning experience for every student. This makes it ideal for a diversity of programs, including STEM, core intervention, credit recovery, and enrichment. With over 300 courses to choose from in every core area, including CTE, AP, and Elective courses, Acellus allows teachers to more fully differentiate the instruction provided. With a wide array of course offerings, and many diverse deployment options, Acellus is a perfect fit for Summer School programs. Schools can choose from over 300 video based courses, and are able to control the level of rigor for each course. This makes it ideal whether the goal is to help struggling students catch up, or provide an accelerated option for gifted students. Acellus offers a large suite of College Board Approved Advanced Placement courses, which allows students to gain college credit while still in high school. Acellus AP courses have been proven very effective as both standalone courses, or as a supplement to regular AP classes. Schools using the Acellus AP courses are seeing a significant percentage of their students get perfect scores on the AP exam. Acellus provides schools and adult learning centers with an extensive array of resources that are ideal for the academic and career training needed for successful adult education programs. Courses are available to help prepare adults to be ready for a high school equivalency exam, as well as empowering them with the skills and training required for a career. Courses in each core area have been developed for each section of the GED, HiSET and TASC. Acellus provides schools with the components needed to successfully start and run a virtual program. With Acellus students studying online receive the help they need, precisely when they need it, resulting in significant gains in student achievement. The education provided in a Correctional Institution is a fundamental component of rehabilitation. Correctional Facilities and Detention Centers are faced with the challenge of providing education to a transient population with varying levels of mastery. Acellus offers correctional facilities a standalone solution that can be deployed in even the most secure locked-down environment. Acellus Courses are all taught by teachers, so that staff that oversee students on many different levels can monitor and facilitate the classes without needing to have proficiency in each content area. The International Academy of Science is a nonprofit 501(c)(3) organization that has been advancing science and education for over 30 years. The Academy offers applied science undergraduate and graduate degree programs that prepare students with important hands-on skills and experience needed for success in the workplace. Acellus was created by the International Academy of Science in 2001, and has since been adopted by thousands of schools across the country, and has provided education to millions of students in all 50 states and worldwide. Acellus is an interactive learning accelerator. It combines technology and learning science to help students master content, learning more effectively (greater mastery) and efficiently (in less time). Backed by scientific research, Acellus delivers online instruction, compliant with the latest standards, through high-definition video lessons made more engaging with multimedia and animation. Each lesson is carefully designed to connect with previously learned knowledge like interlocking building blocks. Students can log in to take lessons from school or home, on any device.
