This intermediate course is designed for individuals studying Computer Science or working with computers. It can be utilized in various settings such as universities, colleges, and companies. The material is suitable for self-study and can be used in conjunction with the Answer Book. The course focuses on a wide range of computing topics, providing practice in all four language skills. Emphasis is placed on vocabulary and grammar specifically relevant to computer science. Here's a comprehensive resource pack designed for non-specialist teachers, featuring a separate answer book with keys to exercises, tapescripts, and useful unit-by-unit teaching notes. This is perfect for students preparing for exams who want to work on English books chapter-wise offline without internet connectivity. If you're looking for downloadable links for the Oxford English for Computing Answer Book With teaching notes, just comment below and I'll share the first chapter note with a link. For more notes on other BCA subjects, check our menu or visit our YouTube channel (for the latest updates.
