Naruto ultimate ninja heroes psp cheat codes

Be the legendary sannin.use orochimaru skill before fighting. Do it to them. And now you can fight. enjoy! to upgrade all your character, always do all their power level straight, stand, spd, def, atk, chk and nin. and play and play until you earn a high score so that your character is powerful, so when you fight an opponent against cpu customize your character, the power level will appear on your character, you will see a red meter. this presents the level you have updated, after you have activated it, select a place and fight. but this does not work in hero mode only in vcpu, wireless mode and promotion test. I hope this helps all those who play naruto last ninja heroes. First, this suggestion can only be used in computer mode. press vs computer mode and press the square key [], then set the battle time to unlimited. After that, set the look of the object up and the chakra in infinite. then, finally, set the handicap from the same color number to the right part (all red.) you notice that if you have a lot of point and already it will press the button I for the custom character which means stronger T_T character and remember never set the difficulty in the easy option mode or you will get less slide and try points to set the difficulty of difficult or even crazy if you are good for more spins and points. When I found out there's a missing team, I found out that there's a secret team called "the biggest of the leaf." The members for it are purely characters who need toUnlocked. you need the third hokage, tsunade and jiraiya and select these 3 characters in Heroes mode so you should unlock the team. If you beat your opponent in any way that involves the battle and fell, note that after a second or two, they are teleported to their position when you started the battle. It's weird, but you should try it. this suggestion does not apply if your opponent's hp reaches zero because it fell. no, do not let them fall with a little more hp and die, this suggestion will not work. you have to beat them to 0 hp and have to fall to any cliff on stage. when you're playing like itachi, or your secret technique to activate tsukuyomi. when in this state, crush your opponent and knock him/her in the air and do not perform a further blow. once again, but do not attack. keep pressing the dash button quickly. do this several times, as it will continue to make your opponent rise higher and higher in the air. once they are as high as you want, use an attack to bring them down or something like that. the point is that you are now about 100 feet in the air and can't stp it (unless tsukuyomi doesn't come out.) is so fun! be careful when using the secret technique, because some of the conditions reduce the health of the player, making you a target on foot. ex: eight gates lee, cursed sasuke, eight gates guy, etc. so, before activate their secret technique, or skill, try to test it in the survival exercise in hero mode, or in cpu vs. try to practice hard mode"VS CPU" before going to the Sanin Legendary phase of Heroes mode. Also, try some of your new unlocked characters like: Kakashi, Guy and/or Gaara. Even when you practice hard vs. CPU, try to end the battle with more health for the 1P character you chose. Believe me, it helps in the next battles of Heroes Mode. Some of the other stronger characters should be: Naruto, Sasuke and Kiba.(Choji is good when it comes to "force", but lame when it comes to "Speed") easy victories When you do your special do not defend at all go all out of attack. This will save you time before you lose the final mode. Even neji and hinata will take chakara away from the opponent even if they are blocking. And the curse mark of sasukes will cause his life to descend slowly, this was brought to you by typhlosionwillownu Vote for this Sannin suggestion in hero mode I tried to unlock sannin as more than 10 times, so I gave it to my brother who unlocked it but it's not cold, because I put it hard in options, because that's how I find myself better in the game. Anyway I sewed it up with naruto sasuke and gaara (those who know solitude) team and used there were skills remember to save their skills for the last stage!! So I used their skills and finally killed them all in sasuke, he didn't have to use either naruto or gaara. Middle will get much harder than it was for beet-groom the second time. When I got my Naruto game: Ultimate Ninja Heroes and finished the game in a week (6 days) AllIt is that once the easy mode is finished there is another mode and another mode only 4 modes: easy, intermediate, very hard and crazy modes. It was really hard for me to play the game , but then when I had enoughd during the middle mode said game over, but it is not because it will say if you want to save and you could start from the stage you left on.
