It is a social online game that offers a unique experience that offers no other game. The group of rooms runs on a blocking ship to discover distant corners of the galaxy. The task is without stopping, but there has been a dangerous development: a brutal alien crew that is occupied and behaves as one of them. Fraud has a purpose: Sabotage task, killing all others on the way without discovery. The task of the crew is to find out what is fraudulent. Initially, the game could only be bought and charged only, but after a while we finally used an obstacle between us and in the browser to have fun! The game should be played with a group of friends or foreigners on the Internet; some players have automatically assigned the roles of team members, while one of them is (except none) dishonest. Join your friends in the hall or watch the game between us. After appointing your role, it is your work to play common tasks in different parts of the ship or do it while walking, sabotage equipment and kill your teammates who have nothing suspicious. The crew should remain awake and be aware of its surroundings. You can also report the body to inform the rest of the crew. The collection must give the best of their best to avoid doubts: if you follow a normal crew member of the dark corridor and then see someone else's alien next to the body, it will be difficult to say that you are not interested. Regardless of whether you are playing a free or normal version of us, the most demanding part is another part: after the tour, the team will meet and start discussing the events that have just happened. Every little detail can be brought to the agenda: who followed where the body was found, especially in human behavior, especially suspicious. Players can vote for one of them by voting to throw in space into space. If the alien is properly defined, the rooms will win. However, the real sabotage can remain anonymously and the game continues when the team refuses a normal person. Online checks between us are similar to the controls of the original. Press the WASD or OK button to move the desired direction. Press and either use or interact with space. Press Q to kill R and report to report a member of the dead crew. You can also use the mouse to activate. Among us there is an online social game that offers a unique experience that cannot be offered with any other name. A group of cosmic people goes to an interstellar ship and examines distant quarters of the galaxy. The mission was smooth, but there was a dangerous development: bad stranger attacked the crew and pretended to be one of them. The fraud has a purpose: sabotage mission, kill all the others on the way without disclosure. The crew's task is to find out which fraud is. Initially, the game was only available for purchase and installation, but after some effort we finally unlocked between us and allowed the browser to enjoy them! The game involves playing with a group of friends or people unknown on the Internet; several players are automatically attributed to the crew's roles, and one of them is fraud (unconsciously). Join your friends with friends or join a random game between us. After devoting the role, the task is to play daily tasks in various parts of the ship or pretend that you are hiding around the ventilation holes, equipment sabotage and killing unaware teammates. Crew members must be vigilant and be aware of their environment. They can also report the corpse to inform the rest of the crew. Fraud must avoid all suspicions: if you follow a simple crew member in a dark corridor, and therefore someone else will see an alien next to the corpse, it will be difficult to say that you have nothing to do with it. Regardless of whether you play for free or in a regular version, that is, what will come later is demanding: after the round the team will meet and start discussing the events that have just taken place. It can be said that every small detail: who watched that where the corpse was found, which was particularly suspicious. Players can therefore vote for one of them, who votes in favor of dismissal from the alleged fraud in space. If the foreigner has been properly recognized, Cosmic Men win. However, if he manages to remain anonymous and force the team to vote under a normal personality, the game continues. Inspections between us online are similar to the original. WASD or arrows to move in the desired direction. Press and decorate to use or interact. Press Q to kill I R to refer to a member of the deceased crew. You can also use mice for activation Perform actions and tasks in minibers under the supervision of a ship supervisor. The names that can ensure this level of interaction and pleasure are very rare, and when they appear, it is important that everyone can enjoy the unique experience they offer. Fortunately, now players from around the world can play not only on your home, but also on any computer or mobile device, if it supports the appropriate browser.
