

I'm not robot!

Outlook for Mac is not free. You can't download Outlook on your Mac for free unless you try it out as a free 30-day trial version of Microsoft 365. You could use the free webmail version of Outlook at Outlook.com, or there are other POP and IMAP email clients that you may want to explore. Information in this article applies to Outlook for Mac. When you download the Microsoft 356 30-day trial you're asked for your credit card number. You can cancel anytime or continue to use Microsoft 365 for a monthly charge. The free download gives you access to Outlook and the other Microsoft 365 programs for 30 days on up to five Macs or PCs. You can also install the Office mobile apps on up to five tablets and five phones. You will get up to 1 TB of cloud storage per user for up to five users. If you have multiple devices and users in your household, you may find it of value. Microsoft 365 is a subscription service, meaning that you receive regular updates instead of purchasing and installing updates. If you prefer, you can re-enable full functionality by purchasing a copy of Office for Mac or the product key that allows you to continue using it. Outlook has its advantages, especially if you use it at work or at home. The cross-functionality between Mac, PC, tablet, and phone apps ease the learning curve. However, it isn't the only choice. For free Mac email programs and services that do not expire, consider these choices: Top Free Mac Email Programs. These email clients can be used with POP and IMAP to handle your email. These programs retain email message copies on your Mac rather than on the cloud or webmail servers. An advantage of these clients is that messages can be migrated to a different email client. You can import Outlook messages into a new client, and vice versa. If you have multiple email accounts, look for clients that handle multiple addresses. Top Free Web-Based Email Services. If you don't need an offline email client on your Mac, use a free webmail service to manage your email online from any web browser or computer, regardless of the operating system whether it's Mac, Windows, Android, or Linux. A disadvantage of these services is the advertisements. There are paid options that are less expensive than Microsoft Office and have different features. Thanks for letting us know! Tell us why! Search all accounts and folders at once and get better suggestions with Microsoft Search Outlook 2016 for Mac, the latest iteration of the email and calendaring app, is a worthwhile upgrade for existing users. But if you don't already use Outlook, the new edition probably won't offer many reasons to switch. ProsResolve meeting conflicts: In Outlook 2016 for Mac, if a meeting invitation conflicts with another one on your calendar, you can propose a new time from your calendar or email inbox.View calendars side by side: To coordinate an event, you can view as many as three calendars side by side to schedule a meeting.Dec clutter: Outlook can scan messages and, based on your past actions, move low-priority messages out of your inbox and into a folder called Clutter. Message preview: The new message preview feature gives you a glimpse into a message before opening it.Cross-platform: Outlook is of course available on Windows as well as through Outlook.com, and you can run Outlook apps on iOS and Android devices.Email push: The update adds support for push email, so messages will be transferred quicker than ever before to your inbox.ConsNot for everyone: With so many free or cheaper email offerings available, getting an Office 365 subscription (\$6.99 per month or \$69 for a year) just for Outlook may not be the best use of your money.Bottom LineIf you depend on Office as part of your computing life, the new version of Outlook offers plenty to like. But with so many compelling email choices for OS X users -- from OS X's Mail client to ever-present Web-based services from Google, Yahoo, and others -- Outlook isn't a necessity.More ResourcesMicrosoft Office 2016 for MacLibreOfficeGoogle Drive Apps Skip to end of metadata Created by Michael Grosshandler, last modified on Jul 19, 2021 Go to start of metadata ActionFollow these steps to Install Microsoft 365 apps (M365) on a Mac with macOS Mojave (10.14) or newer version of macOS. Make sure that you save all work and all Office applications are closed.Download and run the Office License Removal Tool. This is necessary to remove any previous Office licenses you have so that your M365 license can function properly.Once you have downloaded the License Removal Tool, run it.Click Continue:Click on Agree to confirm that you agree with the terms of the software license agreement:Click on Install:You may need to enter your username password to continue with the install. Once you enter appropriate credentials, click Install Software.Once the install completes, you will get a confirmation screen. Click on Close.You are now almost ready to install the M365 app. Before you go any further, we recommend that you uninstall all previous versions of Office. Open up your Finder and go to Applications. Select all Microsoft Office files (Microsoft Excel, Microsoft Outlook, Microsoft PowerPoint, Microsoft Access, Microsoft Word, Microsoft Teams, etc.):Drag the selected files to the trash can or right-click with your mouse and select Move to Trash:You are now ready to download the M365 apps install file. Here is the link to the install: . You will be asked to enter your UAlbany email address. Once entered, click Next.Enter your NetID and password and click Sign In:Complete the 2-Step process with Duo.You will be taken to your My account screen. Click on the Install Office, which will download the M365 install package.Once the download process has finished it should automatically open the "Welcome" install screen. If it doesn't automatically open, you will need run it from your download folder (accessible using Finder). From this screen click Continue.The welcome screen will appear. Click Continue. Click Continue to agree with the License Agreement.Click Agree to confirm.The standard install of M365 will require 9.69 GB. Click on the Install to continue.Depending on your Mac OS security settings, it may ask you for a username/password with administrator rights to continue with the install. Enter the appropriate credentials and click Install Software.The install process will start. You will get a confirmation screen indicating that software install was successfully completed. Click on Close.If there are any updates that need to be applied, a screen will immediately appear and will check for M365 Office updates. Click on the blue Check for Updates button:To the right of the blue Check for Updates button, you can click on the arrowhead pointing down to see if updates are being applied. If updates are current, you will see the message All apps are up-to-date to the left of the update button.M365 is now installed! Before you can start using any M365 Office application, you will need to activate your copy.Need more help? Contact the ITS Service Desk.
