Softonic reviewEuropean Luxury Cars is a free racing game that allows you to choose your own European luxury car and turn it around on a private island. This DMNK Games game gives you the unique experience of owning one of these machines, which gives you a host of customization options and precise and realistic sounds. For driving simulators, European Luxury Cars feels like a cross between Asphalt 9: Legends and Extreme Car Driving Simulator 2. It lacks the high octane driving of Asfalto and the complex acrobatics of Extreme Car, but takes care of the feeling and freedom to play with your car. A realistic car in a realistic worldA good thing of European Luxury Cars is the detail that pays attention in terms of cars and the environment. While the lack of traffic attachments "lights, cones, pedestrians and security agents" is boring for some players, you cannot deny the level of detail of vehicles, roads and the villa where it starts. There is also a dynamic cycle of day and night in the game.Look at every car and enjoy how close it looks to the real thing. Enjoy the creation of your dream car as you customize every part of your car, from spoilers to wheels. You can also add modifications such as neon lights, bright brakes or a nitro reinforcement. Realism continues when you take your car to the road, looking at real sounds of real vehicles, as well as the detailed physics of the game. Unfortunately, there's only one place in the game. There are no other maps or tracks to explore and enjoy, which makes the game exhaust after some time. The game also doesn't offer many challenges, such as police vehicles that are chasing you or random pedestrians that derail you. In addition, the game has no multiplayer function, so you can't compete with others.Not for fast-paced playersIf you're a competitive player on the linefor Speed or Gran Turismo, then European Luxury Cars is not for you. It does not have multiplayer multiplayer and he doesn't have other places to try your driving skills. It is better for fans of European luxury vehicles, look at them after customization and take them out on a casual walk. Free Driving School 2016 download for PC on AppsPlayground.
