Redmi note 5A Prime / 5A lite having code names ugg and ugg lite respectively . We are Here to provide you best working Google Camera port for this Device , That's why we are here with it. The Google Camera port that we are providing is An OnFire Port , which is working best on this device The Xiaomi Redmi Note 5A has a 5.5-inch IPS LCD display, Quad-core 1.4 GHz processor(Model: mdg6), 2GBof RAM and 16GB of internal storage or Octa-core 1.4 GHz Cortex-A53 Qualcomm Snapdragon 435 processor, 3/4 GB of RAM and 32/64 GB of internal storage that can be expanded using microSD cards up to 256 GB. The Xiaomi Redmi Note 5A Prime is powered by a Octa-core 1.4 GHz Cortex-A53 CPU processor with 4 GB RAM or 32 GB, 3 GB RAM. The device also has 64 GB internal storage + microSD (up to 256 GB (dedicated slot)) and a 5.5-inch IPS LCD capacitive touchscreen (720, 236 ppi) display. The Google Camera is the same application that comes on the Google Pixel (Google smartphone), and those who have used one of these devices or have followed the samples of images captured with them, know the quality it offers. Now, everyone can simply download this app on another compatible smartphone, thanks to a Ukrainian developer who started the project and gave us access to the APK. Developed to generate sharper photographs, offering a better balance between the light and dark areas of the image. The benefits are associated with the collection of more light, with reduced noise and improved dynamic range, preventing motion blur. Effect in which the background is blurred and the foreground is highlighted, looking like the image was made with a professional camera. ✂ Settings XML File 📁 Make a folder named GCam/Configs7 in internal storage and place this Settings XML file there 📁 How to Load Config [Settings File] ✂ Now Double Tap on the blackarea near Capture button. Select config and Apply 📁 Here Are some settings Screenshots For Getting the best compatible GCam For Your Device You can join our telegram Group where you can type the name of your device and you will be provided the best compatible GCam for your device (You Should Have installed Telegram and open this link via Telegram) Regards - GCAMUNIVERSE Listed below are all proven builds of ported Google Camera (gcam) app for Xiaomi Redmi 5A codename Riva. Choose the one compatible with the Android version running on your phone: Android 7.1 Nougat, 8.1 Oreo, or 9.0 Pie. Redmi 5A is a budget phone initially released with MIUI 9 which is based on Android 7.1 Nougat. Currently, it receives MIUI 10 update but it is still based on Nougat build. Thanks to the rapid development of third-party Android communities, the phone now receives many custom ROMs based on either Android 8.1 Oreo or 9.0 Pie. Check following posts: Google Camera is a popular app that makes Google Pixel phone popular. It is the official flagship phone by Google, the one behind Android. Despite the latest Pixel 3 and Pixel 3 XL have no dual camera setup, both devices are popular for its mobile photography support. Again, the high-end technology planted within its camera app beat all other Android phones with multiple cameras. The power of the software spread fast. There are some developers who have managed to port the original Gcam app. They take the official Gcam app from Google Pixel, modify it, and share it for public use. Arnova, CStark, BSG, Arthur, and San1ty are just a few of developers who have succeed porting the app. Thanks to their restless efforts, the popular Gcam app is now available for Android devices other than Pixel, including Redmi 5A. Some believe that ported Gcam builds are compatible only on devices powered with high-end chipset. Well, that's not true. Redmi 5A sports Qualcomm Snapdragon 425 with 1.4GHz Quad Core Cortex-A53 CPUs. It's a Qualcomm SoC after all and gcam can run on such chipset. Download Gcam APK You can download the APK file to install ported gcam on Redmi 5A from the links below. Please choose the one based on Android version running on your phone. If your phone runs MIUI ROM, then it must be Android 7.1 Nougat (most likely, unless it gets newer update). Custom ROM users need to check the Android version at first. Downloading the inappropriate will not make your device bricked. However, it may not work flawlessly. ALSO READ: 15 Steps to Flash Orange Fox TWRP on Redmi 5ADeciding which APK to use is not an easy task. There are so many builds of ported gcam. Not all of them are ready to use out of the box. Some of them need manual settings and adjustment. We have picked up for you all compatible gcam builds that require no further adjustment or no recommended settings. Just download, install, and use it. Nevertheless, you must pick the one based on your Android version. Gcam for Redmi 5A on Android 7.1 Nougat If your phone runs MIUI, most-likely you will need this build. File name : MGCB\_7.0H\_C2API\_v.4.0\_AllinOne\_Full\_Manual.apk Version 4.0 | 14227 downloads | Size: 25 MB Gcam for Redmi 5A on Android 8.1 Oreo Either you use a custom ROM or an MIUI version that has been updated to Oreo, you can use one of two builds available below. Scrubber Gcam APK File name : scrubber\_GCameraP2XL.apk Version n/a | 8790 downloads | Size: 68 MB Arnova8G2 Gcam APK File name : GoogleCamera-Pixel2Mod-Arnova8G2-V2.apk Version 2.0 | 7450 downloads | Size: 37 MB Included features: Portrait mode, Lens blur, Panorama, Photo Sphere, Slow Motion, HDR+ Enhanced. Gcam for Redmi 5A on Android 9.0 Pie The one available build is ported gcam that we have tested being compatible with Redmi 5A running custom Android ROM based on 9.0 Pie. Pixel Experience ROM is perfect for this build. Thanks to Arnova for this modded gcam. File name : MGC\_6.1.021\_BSG\_Arnova\_TlnNeun\_V1.3.030119.0645.apk Version 1.3.030119.0645 | 4291 downloads | Size: 120 MB Included features: Portrait mode, Lens blur, Panorama, Photo Sphere, Slow Motion, HDR+ Enhanced, and Night Sight. Night Sight is an exclusive feature available within Pixel 3 release (initially). It is a feature that allows users to capture decent photos in a very dark environment. How to Install? Installing ported gcam is just like installing any other third-party apps' apk files. However, ported gcam app needs Camera2 API being enabled. Android Camera2 is an API that gives third-party camera app developers better access to more advanced controls of the camera sensor, such as manual exposure (ISO, shutter speed), focus, RAW capture etc. Google Camera has lot more advanced features and inevitably it needs access to Camera2 API. Enabling Camera2 API doesn't necessarily need root. However, unlocked bootloader is a must. Tweet Share Whatsapp Pin it List of all modders hosted on this site.
