Bias fx patches

Audio - Forum Audio Professionale Home Forum > Software > Presets, Patches > Discussione in 'Presets, Patches' begun by Rhodes, 14 Jan 2017. Tags: bias presets positive grid bias fx the guitar Effects processor Blackface with Tube Screamer 00:0000:59 A Java application that allows you to import Presets to Bias FX and Bias Amp offline. Now you can send private presets to your friends without using ToneCloud! (Requires a Java Runtime Enviroment) Because I did this application since Positive Grid has not yet released an Import Presets feature offline, and many of my customers are having problems with the installation process of my custom Amps and Bias FX patches. Trying to solve these issues that come with my customers by email, it is not at all fun. Do not work for Positive Grid btw Take this application for a preset Test Drive Backup before using the Try app to use the TestFiles/ for a testdrive. After importing the presets: open Bias FX and look at the bank "Factory Rock". open Bias Amp and watch in a custom bank. Youtube Tutorial by JucaNery Guitar Posted on May 8, 2019May 9, 2019 Fully Re-Engineered Completely Re-Engineered, High-Resolution DSP engine, with hundreds of improvements, surpasses the most reactive, detailed and varied guitar tones. Hyper-realistic Guitar Match Positive Grid recently developed, exclusive Guitar Match and emulation technologies virtually transform guitar into another with startlingnew amplifiers, pedals and racks a wide collection of new and renewed hd amps, pedals and racks adds unparalleled depth and width tones of the guitar. new fuzz, time and harmonizer models pump your productions with exciting, tone and unique guitar effects. new dynamic amplifier exactly matches your feeling with the same industry leader amplifier engine that is in bias amp 2, the unparalleled reactivity and dynamics of bias fx 2 faithfully reproduce your unique feeling and every subtle ghost and mute palm note. the simulation at the level of the amp motor component accurately reproduces the tone and dynamics of the most popular amplifiers up to the last lightning tube and precision resistance, creating the most authentic, full-bodied and warm guitar tones available. new pedalboard paradise thousands of authentic, Analog-Like pedals blame fx 2's stockpile of foot pedals can be expanded by downloading thousands of shared and customized pedals from ToneCloud®, the social network of players, engineers and producers of positive grids worldwide. but why stop there? with bias fx 2 it is possible to easily axle the pedals distortion, delay and modulation using the fully integrated bias pedal software included with bias fx 2 elite, creating pedals and sounds no one else has. new Hyper-Realistic guitar match innovation, precision guitar emulation puts guitar coated at your forgotten fingertips to exchange real guitars in the studio to record the next track, oranother guitar on stage for the next song. With the revolutionary BIAS FX 2 Guitar Match technology, you can turn your guitar – any guitar – into a collection of legendary axes of a hoarder, each accurately recreated to their pickups, body type and body thickness. No special pickup is necessary to make the guitar sound like a classic American guitar, a vintage LP and more. New Expansive Effects, Next-Level make your sound productions more Melodic, Bold, Deep and Wide New Harmonizer, Fuzz and Time modelers take your recordings and live performance beyond ordinary limits. The advanced modeling suite of BIAS FX 2 allows you to create vintage and modern fuzz pedals for more gritty and soft effects, based on time for greater depth, and instantly create lead lines together with multiple voices. Pass your Track with the Studio Rack Collection From essential tools for workhorses to creamy vintage effects and sparkling modern outboard gears, brand new studio rack processors—Echo Tape Delay, Tri-Chorus, Tube Compressor, Spring Reverb, Wah, Guitar Synth and more—Call your project to play as the ultra-high resolution production of a cutting-edge studio. Explore history and form The future of the tone Shape your sound perfectly using the advanced DSP emulation in the new Echorec drum relay, Tube Multiband Compressor, Rotary Speaker. A collection of new, high-end racks adds unparalleled depth and width to guitar and bass sounds. Each is shaped tolevel with meticulous attention to detail. Celestion® Inside Official WorldClass Cabs Celestion We have collaborated with Celestion, the most trusted name of guitarists. Celestion drivers were used for the tones of the killer guitar on more classic songs than any other brand. Their impulsive responses (IRs) are the favorite guitarists from Pete Thorn and Scott Henderson to George Lynch. Forget to load individual files, just select a custom Celestion cabin and start moving virtual microphones around. BIAS FX 2 does the rest! NEW ToneCloud 50,000+ Online presets Open an Universe of Sounds to forget the endless hunting and paying for—additional presets to expand your collection of guitar tones. You can directly access over 50,000 presets for personalised amplifiers, pedals and pedals shared by the ToneCloud® online community. There is no need to open any other software. Improved workflow puts your patches on Speed-Dial When inspiration strikes, you will not have to go on a hunting expedition to find the perfect patch. With tags and keywords attached to all ToneCloud® presets, it is now much easier to find and quickly download the right preset to keep creative juices moving. New factory and online presets from The best new sounds inspire new riffs and songs. You'll never get the writer's block with BIAS FX 2. More than 200 new factory pedal presets created by top-famous artists, studio engineers and session players get your mojo crank. NEWe Performance Tighten Up Song Transitions, Live Performances and Studio Mixes Whether you are an aspiring guitarist or an experienced professional, BIAS FX 2 makes it easier than ever to create transitions of instant songs, FX changes that blow mind and captivating mix – in studio and stage. Introduce Scene - One Click Changes Your Pedalboard Each preset in BIAS FX 2 has four "scenario" settings that you can create and save, so you can remember multiple separate but closely related pedaling scenes. With just one click, you can simultaneously activate the overdrive and delay for your lead only and turn off the chorus effect you used on the song's verse, keeping the rest of the preset settings. Or, instantly switch from one pedal configuration to another, each with completely different settings, reverb and others, for different sections of songs. The redesigned user interface for simpler and more productive recording sessions includes a new preset manager that makes it easy to organize and quickly search, call back and preview your favorite pedalboard settings. Take a custom snapshot of each of the custom pedal settings, then instantly switch between them on the A/B flight which is best for your current song. Or use snapshots to instantly re-amp when switching from a crisp rhythm guitar to a lead soloist and again. Using MIDI automation for Turbocharge and Streamline Complex Mixes BIAS FX 2 powerful MIDI integration allows you to startling,mix changes and fluids, biting transitions by automating parameters changes for each section of your song, while also shaving hours outside your project. It is easy to assign MIDI commands to virtually all available parameters, including volume control, individual effects parameters, guitar emulation selection, Looper functions and more. Create Unique Hybrid Amplifiers and Stereo Amp Amplifiers in BIAS FX 2, the amplifiers you use to create your tone are limited only by your imagination. Use Dual Amp setup to cherry-pick parts from two separate amps—their impulse responses, cabs, EQs, even the mics they use—and combine them to create a unique hybrid amp-of-a-type no one else has. Or maintain amplifiers as they are, direct them parallel to each other and hardpan them to create a stereo configuration with totally different guitar tones in the left and right channels. NEW Smart Recorder/Looper Preserve Fleeting Ideas Before I am quickly lost to record ideas for riffs, vamps and songs with a simple click when inspiration affects, using the integrated recorder of BIAS FX 2. Then pass the recording as you play it through the foot pedals of BIAS FX 2, amplifiers and rack FX, adjusting the perfect custom preset to use with your new song idea. You'll never lose that perfectly played riff. Simply export it as a .WAV file for use in a new track in DAW—the starting point for a new multitrack recording! registration! bias fx patches download. bias fx 2 patches
