Serious gamers will agree that the best PC gaming desktops can easily beat the game laptops. If you are looking to get a less mobile computing solution, you can't go wrong with the power and flexibility the best desktops for gaming PCs have to offer. It can be difficult to find the right one with so many options, though. We help you with a list of our favorites! Keep in mind that this list includes the best desktop PC game considering the value for money. Some are very expensive, while some are more convenient. Now, if you want a cheaper game computer, take a look at our link below. Read also: The best portable cheap game computers you can buyThe best desktop PC game: Why get a desktop PC game on a laptop? SoundGuysWhy do you want a desktop PC game on a laptop? The desktops are, after all, bulky, heavy and static. You can not easily take the best desktop PC game at the coffee shop without looking like a total nut job. Technology has advanced enough to make laptops play PC very powerful, often meet the needs of demanding users. But while a laptop can be a valid option for mobile players, the best desktop gaming PCs have even more to offer. Here are a few reasons why you might want to choose one of the best desktop PC game instead of a counterpart of the laptop. Performance differences between game PC desktops and laptops RazerWhile laptops can be very powerful, desktop components trumpet mobile ones. Processors must be smaller for laptops, as GPUs do. That's whyand GPU mobile counterparts will never be as good as those desktops. Better heat control Laptops are small and there is no way to bypass physics. Put powerful components in a thin, light and small package is sure to kick the temperature on some degrees. Running a warmer PC will result in reduced performance and possible damage over time. You always want your computer to work as fresh as possible, and the best desktops for game PCs can get more efficiently. The best desktop PC game have more space to breathe. All these extra rooms can also be used to install more powerful ventilation systems or even water cooling systems. The game PC desktops can be easily updated AlienwareGaming laptops can only be updated to a certain extent. Sometimes you can change the RAM and the storage drive, but usually it is it. The best desktop PC game gives you complete freedom over your interior. You can change the processor, motherboard, cooling system, power supply, RAM, storage and also add cold lights for eye pleasure. This proves to be of great advantage to players. If more RAM or a new GPU gives you that edge to stay competitive, just update those components and be done with it. Most laptops have welded the components and upgrade them is almost impossible unless you buy a new computer. Save desktop PC game! The best desktops for gaming PCs are usually much more convenient than their direct portable competitors. As they offer the same technology, a desktop will costless than a laptop. I just customized an Alienware Aurora R8 Gaming PC desktop and a Alienware 51m laptop with almost identical specifications. Both had an Intel Core i9-9900K processor, 16GB RAM, a NVIDIA GeForce GTX 1660 Ti, and a PCIe 256 SSD, and the price difference is quite significant. The tower would cost \$1,789.99 while the laptop goes to \$2,544.99. You could discuss the laptop comes with a keyboard, trackpad, screen, and everything you need to use the computer out of the box. The truth is, any player will have them either way. The game on a laptop is not optimal and is usually reserved for the times that you absolutely need to go mobile. Serious laptop gamers still prefer an external monitor, a better mouse, a good mechanical keyboard, and so on. Everything depends on your needs and preferences.1 Alienware Aurora R10 Ryzen EditionAlienware has long been known as a premium PC game brand. Each player in us has, at some point, wanted an Alienware computer. Whether you still believe that or not, we cannot deny that they make some products of great appearance and powerful, even if a little bit valued. Look at this: The best Alienware laptopsDell Alienware Aurora line-up is both beautiful and powerful. We particularly recommend the Alienware Aurora Ryzen Edition, which can be had with a Ryzen 9, a Nvidia GeForce RTX, 64GB RAM and 2TB storage processor. Razer does some large laptops (check them by clicking the link below,) but they haven't quite entered the gamedesktop market. Instead, they seek partnerships with other brand license companies. That's why Maingear can sell the R1 Razer Edition, which is a large desktop computer. Read also: The best Razer laptopsMaingear allows you to fully customize the R1 Razer Edition to your liking. Prices start at \$1,299 and you can choose from Intel or AMD configurations. The Maingear R1 Razer Edition combines the advantages of the best desktops for gaming PCs with Razer looks is known for.3 Intel NUC 9 Extreme KitIntel NUC computers have become very popular for their size and low profile, but they can be very powerful if you want them to be. The NUC 9 Extreme Kit is a great example of what a small computer can do. Intel sells multiple versions of this small desktop for PC game. You can have an i5, i7, or i9. RAM is also configurable, and so is storage. The only major drawback of the NUC 9 is its lack of discreet graphics, which is a huge problem for serious players. Learn more about USB Type-C: The best USB-C adapters of course, the main thing that Intel is selling here is the size and cool factor, so you can understand why this PC is lacking in the GPU department. On the positive side, you get Thunderbolt 3, which means you can use an external GPU device.4 HP Omen 30LHP is one of the most popular PC manufacturers, and their Omen 30L does not fall behind the competition. These game PC desktops are equipped with great specifications, a simple design with elements focused on the game, and a great bang for your buck. Also: the best HPbuyOne of the parts is transparent, so you can get creative with lighting and enjoy the view of your interior while you will straighten the head blows and mark the goals. This PC is powered by Ryzen processors, and you can choose from AMD Ryzen 5, 7, or 9.5. MSI MPG Trident 3 10 Doesn't that look good? If you want most of the advantages of the best desktop PC game, but it would still enjoy a smaller tower, you can not do much better than the MSI MPG Trident 3 10th. More about this: If you still want a MSI laptop, these are the best. All the best desktop PC game can be customized with great specifications, but the advantage of this MSI computer is that it can be built with 10th generation Intel Core processors. It can be had with an Intel Core i5 or an i7. You can also upgrade up to 16GB RAM and a RTX 2060 Super GPU.6. Dell G5 desktop game Dell Alienware computers are great, but those are not the only desktop PC game that the company offers. The Dell G5 game desktop is a great alternative with beautiful aesthetics that are not as extravagant as Alienware. These are also equipped with large specifications and lower price points of the sub-brand.7 game. Vengeance di Corsair i7200 The Corsair Vengeance i7200 is not cheap, but it is equipped with all the specifications you might need and a great design to start.
