I'm currently sitting on 81250 in tokens from the valor casino. Just barely reached the hottie rhymeing mermaid in the storyline@. Anyway!! Should I try dipping into poker games? Only the 1 to 10 cost poker tables are open at the moment but that stockpile of tokens is VERY tempting. Any advice? Iv heard slimequest is interesting but theres SOO MANY things to pay attention to.....or should I just auto play those 100 spins? Thanks for any advice or tips you can offer@ No matter which machine I use, I cant even get a replay. I aim for 7s and can get the first 2 on command every single time but I can never get the 3rd one. All of the little slime quests end up with no req as rds over and over.I've never gotten more than a single pair in poker.I've spent over 100k gold buying more tokens and have never had more than 300 at a time.Any tips, or should I just give up on this part of the game? I just recently reached Puerto Valor and have been grinding the casino. I am currently sitting on a fat stack of ~ 500,000 tokens. I know it's more than enough to get all of the prizes available but I have some questions before I spend any of my winnings.Are any of the rewards sellable? Can I effectively convert my casino tokens into actual gold?I already know that the casino will "upgrade" later in the game and have new games to play and new rewards to get; but do my casino tokens carry over to that point? If I get my prizes now and save the rest, will I be able to buy the new prizes later without anymore gambling? (assuming I have enough) Or will I just have to buy more tokens at that point and grind the slots again?I also know that another casino will open in another city later in the game. Can I spend my tokens I got in Puerto Valor in that other city's casino? Or will I have to gamble there in order to get those prizes?I'd appreciate any knowledge on the subject before I do any spending. It's a lot easier to grind slots when you already have a large bank of tokens to lose, and I'd hate to spend my winnings only to have pay for more tokens that I wouldn't have needed to if I knew what I was getting into ahead of time. And countless of restarts later, I am still at 0 tokens, I just can't win, I will end up always with all my 30k gold spent converted to tokens which will drown to 0 very fast :/ It doesn't matter where I play, slots, slime quest, poker, I just can't win. Guess I should never play real life casino.
