How to find secret messages on android

How to find secret conversations on android. How to find secret messages on facebook android. How to find hidden text messages on android. How to find secret messages on messenger on android. How do you find hidden messages on android.

From Radusi Nicolae Á · 12 July 2018 when you normally check your Facebook messages, see only the chats of your friends. These Aren are actually all your messages. Facebook makes a little more than you can know and filter messages from people with whom you are not friends. Do you know that Facebook has hidden some messages from you? Facebook filters messages from strangers for good reasons, since many of these messages are pure spam. When the Facebook algorithm decides that a message comes from a non-friend that a user does not know, the message will be directed to the filtered folder without notification to the user. However, sometimes, a message from a non-yet-Facebook friend ends up being lost, despite the fact that it could be something you should know. This is the way you could lose important messages for this. So once you know about this secret mailbox, the best idea is to control it every month or two, just to make sure nothing important slides. Here's how to find Facebook messages hidden from your Android phone: View Mail in Facebook Messenger hidden on Android: to verify your hidden messages, start the Messenger app; So go to settings at the bottom right (it's the icon that looks like a list, if you can't find it); Click on people at the bottom; Then click Message Requests, the folder containing messages from non-friends. See if there are important messages. If there is, choose the message and click Accepts to move the message to the incoming mail of normal messages. You can also choose to respond. At the same time, Á ¢ ¢,~ "Requests tilted" will show all the Facebook messages considered unworthy of your time from the beginning; If you find spam messages in this sector, you can choose the message and click Delete to delete it. Please note that if you delete a message request, you have not found the message again. Now you have not missed messages on Facebook. If you have other questions about how to view hidden messages on Android, leave your comment below. All digital devices, including Android phones, have certain functionality that allow the user to hide various content. For example, Android has hidden partitions that cannot simply stumble.
