GOD OF WAR GHOST DI SPARTA PPSPG Gameplay The God of War gameplay: Ghost of Sparta resembles that of previous installments. It is a third-person single player video game seen from a fixed camera perspective. The player controls the Kratos character in the combat, in the platforming of Hack and Slash Combo, elements of games for puzzles, and fight the enemies that mainly derive from Greek mythology, including the Minotauri, Ciclopes, Harpie, Gorgons and Satyrs. Dongly legionaries, the Keres Wraiths, Geryons, Automatones, Boreas Beasts and Triton Warriors were influenced by mythology, but created specifically for the game. The platform elements require the player to climb walls, jump through the chasmi, swing on the strings and balance through the beams to proceed through the sections of the game. Some puzzles are simple, like moving a box so that the player can use it to access an unattainable path with the normal jump, but others are more complex, how to find different items in different areas of the game to unlock a door. The game presents new weapons, and navigation skills not present in the previous games and was quoted as with 25 percent more gameplay by God of War: Olympus chains. The game is set in ancient Greece, where Zeus has been warned that the future of Olympus will be destroyed, not by the revenge of the Titans, but from those that a time held by the God of Olimpia imprisoned with a warrior was marked . Zeus and Ares believe that the warrior warrior Kratos Brother Deimos, then browse it from a tender age. Kratos tried to stop the god of war but left a scar on him's right eye. In the end, Deimos was brought to death and imprisoned and brutally tortured. To commemorate, the younger brother has a sign of him on a red tattoo identic to the brands of the brother of the Fated. With the loss and hatred of God on Olympus, who robbed the last member of the family, the hero begins the path to earn the throne of power and punishes the sins they caused. Opening the series of game events is the dialogue between Kros and Athena. He raised the warning for the worst in the future and seize everything, the players begin their journey with the characters. In this section, Kros does not use the chain alone anymore, but instead it combines with Athena - a duo gains attacking with the chain to the wrist, providing the ability to attach inside the distance. It seems that while this version has been developed and that it is going to be released, the hero has trained hard, so it can use it quite well with many different techniques. But this is not everything, because later a new weapon called Arms of Sparta will also appear. It was a set, composed of a spear and a shield as often the ancient gladiators. You can collect, and will definitely be more dangerous than flexibility. For example, a metallic shield is quite difficult to block attacks dangerous by the enemy, stabbing to the enemy or launching from a distance. Moreover, it is also possible to spread flames in the weapon, to increase the attack power, enough to penetrate the dense armor of the enemy. If this is the case, it is probably still weak enough to fight the gods. Developers should understand that this has been integrated with magical characteristics. In a sense, fiction is greatly reduced, while gameplay is broader when weapons are not the only thing to kill someone. Furthermore, the effect is also shown through underwater battles. Of course, everything is available, which forces you to look for / collect in the process of reaching the ultimate goal. target.
