Marine science peter castro

Castro, Marine Science, 2025, 3e, Standard Student Bundle and other bundles available for purchase online, priced between $184.88 and $260.24. The third edition of Castro's Marine Science has been well-received by students due to its comprehensive coverage of oceanography and student-friendly learning system. Introduced in the second edition are further NGSS coverage, enhanced ELL support, and interdisciplinary applications. These bundles include a single print textbook and offer varying subscription durations from one year to eight years. Michael Castro is Professor Emeritus at California State Polytechnic University, Pomona, with a strong background in marine biology. He holds a B.A. in history and art history from Stanford University and was a Fulbright Scholar at Odessa State University. His research focuses on the biology of crustaceans symbiotic with reef corals and other invertebrates. Castro has taught marine biology in English and Spanish and has conducted extensive research, including the systematics of deep-water crabs, primarily in France. He has published 64 peer-reviewed papers and serves as editor-in-chief of the Journal of Crustacean Biology. You need Flash Player to watch this video. It seems like your internet connection is down. A student textbook titled "Castro, Marine Science" was published in 2016 and has an edition for students from 2015. Currently, it's being read by one person, but there's no summary or description available yet. This book might be previewed in English if you're interested.
