Many charming rituals continue to exist, even if most couples arrange their wedding day as a very special and individual event: some dream of a very traditional wedding with a romantic carriage ride, rose petals along the route and a magnificent reception. Others prefer more flamboyant festivities and plan a parachute jump or an underwater wedding – almost everything is possible. How many couples marry in Germany? Some 407,000 couples tied the knot in Germany in 2017. They were roughly five years older than wedding couples 25 years ago: on average, women now marry at 31.5 years of age, men at 34. How many couples marry in church? In Germany, a marriage is only legally valid after a civil wedding ceremony. In addition, couples can also walk down the aisle as part of a church ceremony. In 2016, only 88,000 couples married with God's blessing, roughly one in five of all wedding couples. Which is the most popular month for weddings? A champagne reception in the open and a wedding table on the lawn are naturally best in the warm sunny months. That is why most people marry between May and September. Many couples choose wedding days with special dates – for example, 8/8/2018 or 9/9/2019.
