Wayne state university masters programs

```
The Office of Postdoctoral Affairs and the Postdoctoral Association (PDA) are here to help you and your mentors throughout your training at Wayne State. Our thriving academic community includes approximately 250 postdoctoral training at Wayne State.
training experience for both you and your mentor, the Office of Postdoctoral Affairs provides resources and support for professional and career development, and oversees policies and requirements for postdocs. Join the WSU Postdocs Team chat to talk about everything postdoc. When Shannon Costello went to the doctor complaining of severe
abdominal pain after eating, she was treated for an ulcer. The second doctor said it was her gall bladder and had it removed. The pain did not subside. It wasn't until she met with a gastroenterologist that she was questioned at length about her family's medical history. Her great-grandfather passed from colorectal cancer (CRC) at 35. Her mom was
 diagnosed with CRC at 44 and would later overcome it. But at the age of 29, Costello thought she was too young to have cancer. The gastroenterologist ordered a CT scan. On her drive home, Costello thought she was too young to have cancer. The gastroenterologist ordered a CT scan. On her drive home, Costello thought she was too young to have cancer. The gastroenterologist ordered a CT scan. On her drive home, Costello thought she was too young to have cancer. The gastroenterologist ordered a CT scan. On her drive home, Costello thought she was too young to have cancer. The gastroenterologist ordered a CT scan. On her drive home, Costello thought she was too young to have cancer. The gastroenterologist ordered a CT scan. On her drive home, Costello thought she was too young to have cancer.
 about younger onset colorectal cancer like they are today," she said. The National Institute of Cancer reports that, today, CRC is tied with brain and nervous system cancers for the second leading cause of cancer deaths with an 11% mortality rate, behind breast cancer at 13%. The official screening age for colorectal cancer has dropped from 50 to 45
in recent years, but is it young enough? "Colorectal cancer is mostly preventable when caught early, and that is why younger people are typically diagnosed late—because they are not routinely screened." Costello was one of the lucky ones. She has been cancer-free going on nine years but knows things might have turned out differently had she not
continued pressing for answers. Preventative measures Because of her family's medical history, Costello underwent genetic testing a month after her diagnosis. She tested positive for a genetic DNA mismatch repair (MMR) mutation called Lynch syndrome—the most common form of hereditary CRC. "MMR targets mispaired bases within genetic
replication that arise through errors or DNA damage. The mutated version can create significant errors within the replicated genetic coding that can lead to cancer. My mutation in particular makes me more susceptible to 12 different cancers that I'm screened for every year." She immediately informed her family members. "I had one family members that I'm screened for every year." She immediately informed her family members.
 who didn't want information regarding the mutation. A month later, that family member was diagnosed with stage IV colon cancer and Lynch syndrome. A little over 4 months later, that family member passed from colon cancer and Lynch syndrome. A little over 4 months later, that family member was diagnosed with stage IV colon cancer." 34 days later on May 8, 2016, Mother's Day, Costello's mother passed away unexpectedly from complications of heart
 disease. It was one of the most trying times of Costello's life. "I had a lot of grief. I wanted to do something," she said. "That's when I started colorectal cancer and Lynch Syndrome advocacy." She got involved with organizations such as Fight CRC, The Color Club, Colorectal Cancer Coalition, The Patient Story, and Alive
and Kickn spreading the word about CRC. "I wanted everyone to know that it can happen at any age, to encourage and lessen the taboo of screenings." Shannon Costello (second from the right) with advocacy organization Fight CRC in Washington D.C. March 2024. They have never been more important across the board than they are today. The
American Cancer Society reports that CRC cases have more than tripled in teens between the ages of 15 and 19 from 1999 to 2020. The reason for the surge is unknown, Costello said, which is why advocacy groups are pushing for more funding. The organization Fight Colorectal Cancer reports that among the top five cancer killers, CRC is the only
one that does not have a dedicated funding stream in the Department of Defense Congressionally Directed Medical Research Program. Instead, CRC competes for funding with a dozen different cancers. "In the eight years that I have been working in the advocacy space, I've lost count of the number of phenomenal friends I've made and subsequently
lost to colorectal cancer," Costello said. "I started to get angry. I realized that social change, educational change, educational change, and policy change were not enough for me. I wanted to attack cancer at its most fundamental level: by science." Where there's a will Costello enrolled at Monroe County Community College in 2019, then at the University of Toledo in
2021 to complete her bachelor's in physics. "I knew I was somehow going to go to grad school somewhere for something relevant to oncology but wasn't sure what at that point." A mother of three, she said pursuing higher education has been hard at times, but not impossible. "There were a few semesters where I would go to bed at 10 p.m. and wake
up at 2 a.m. every single day. There were times when I had to miss ball games or do homework during one of their tournaments, and it broke my heart to have to do that, but in the end, I hope the lessons about tenacity stick with them," she said. "They would see me dedicating myself to doing the hard work and eventually were there to watch me
walk across that first stage and reach that goal." Costello graduated with her bachelor's in 2023. When it came time to look at graduate programs, only one checked all her boxes. "The medical physics department at Wayne State University not only cares about its students' professional but also personal development. There are dedicated and
 knowledgeable professors, several areas of research, and state-of-the-art facilities." Costello recently wrapped up her first year as a M.S. student at WSU. "My career aspirations are to become the best board-certified medical physicist that I can, or, as I like to tell people on a comical level, I am aspiring to be a mad scientist who vengefully tries to
 destroy every malignant cell possible using radiation." Graduate faculty are responsible for advising Ph.D. students, directing and guiding their dissertation research, and helping them develop a diverse skill set in preparation for independent scholarship. Only faculty members who have active graduate faculty status may serve as dissertation
 advisors. Graduate faculty appointments are available only in units offering graduate academic programs, and faculty members should seek appointments in their home units. Faculty in units without graduate academic programs ordinarily do not need these appointments. A graduate faculty appointment in the home unit allows service on the
  dissertation committee in another unit, provided the other unit has approved such service. Graduate faculty appointment is required in order to serve on the Graduate Faculty responsibilities Approved by the Graduate Council April 15, 2020. Graduate
 faculty are responsible for advising and mentoring Ph.D. students and helping students develop a diverse skill set in preparation for independent scholarship. Only those faculty members who have active graduate faculty and student
 expectations about the mentoring role of the graduate faculty advisor. Graduate advisors are expected to: Help students to become immersed in active research opportunities including conferences, performances or exhibitions, publication opportunities, service learning
opportunities and more. Become familiar with best practice resources in mentorship. Guide and mentor students in a culture of responsible research and ethical practice, including the requirements of the IRB and/or IACUC and IA
 funding. Support students in developing their teaching and pedagogical skills. This might include connecting them with teaching opportunities, attending a class they teach and providing feedback, recommending relevant training through the Office of Teaching and Learning or similar. Become familiar with and be able to advise students about all the
required steps in the Ph.D. process, including: the plan of work and transfer of credits, qualifying exams, candidacy, dissertation prospectus, conflict of interest, final defense and time extensions. Participate actively in the annual review and individual development plan with all student advisees each year and help guide them as they consider their
professional goals, whether those are within or outside academic success, mental health and connect students to resources on campus that can support their academic success, mental health and wellbeing including: CAPS, Academic Success Center, Writing Center, Campus Health Center, Childcare Resources and the W Food Pantry. The Dean of
Student's Office provides a comprehensive guide to student life wellness. Appointment or closely-related field Evidence of peer-reviewed scholarly achievement in the last five years. Appointment within unit If
 faculty in units without graduate academic programs are asked to co-direct a student's dissertation, they should seek a graduate faculty appointment through the student's unit. Appointment procedures The digital application is filled out by the faculty member requesting appointment. The Department Chair evaluates the nominee's credentials and
 digitally signs the form. The Authorized Dean's Signature Designee reviews, signs the form and submits the application to the Graduate School Designees by college/school: College/school Designee Mike Ilitch School of Business Administration Virginia Kleist (hn0715) College of Education Paul Johnson (ay3138) College of Engineering Leslie
 Monplaisir (ad5365) College of Fine, Performing and Communication Arts Kelly Young (aj6438) School of Information Sciences Ed Cackett (ew1397) School of Medicine Ryan Thummel (ec2816) College of Nursing Ramona Benkert (ac3902) Eugene Applebaum College of Pharmacy and Health
 Sciences Brian Cummings (ac6308) School of Social Work Sheryl Kubiak (ao1692) Complete the faculty application If you need to access your Graduate Faculty Application that is in progress or you saved as a draft, you can return to My Dashboard. Foundational principles of graduate faculty criteria Minimum criteria The Graduate School Criteria
  Statement summarizes the minimum criteria required for appointment to graduate faculty. Units may include additional criteria. Research productivity may be evidenced in various ways, publication in refereed professional
 journals, books and monographs, juried/reviewed performance in the arts, and receipt of external grants are nationally accepted indicators for most disciplines. It is also a nationally accepted principle that faculty members should themselves have demonstrated research proficiency and be at the forefront of their fields in order to direct Ph.D.
dissertation research. Peer review The best measure of a faculty member's research/scholarship proficiency and the mastery of current methodology within successfully undergone peer review. Currency of research and scholarship Since the knowledge base and research methodology within
a discipline are subject to continual expansion, currency in research involvement is also required of faculty engaged in directing graduate student research can lead the student into productive and publishable areas of discovery. It is understood that the frequency of publication will vary among
disciplines; however, an active research program should result in at least three refereed publications every five years. Purpose of criteria statements The dean of the Graduate School is ultimately responsible for appointments to graduate faculty, and the Academic Standards Committee (formerly Credentials Committee) of the Graduate Council serves
as the primary advisory body to the dean on graduate faculty issues. The purpose of the Criteria Statement is to provide guidance in the decision-making process. Clarity of standards The Criteria Statement is to provide guidance in the decision-making process.
accommodate every possible contingency. It is recognized that, on occasion, some exceptions to policy may be appropriate, including considerations related to tenure and promotion practices. With suitable documentation, such exceptions may be appropriate, including considerations related to tenure and promotion practices. With suitable documentation, such exceptions may be appropriate, including considerations related to tenure and promotion practices.
Academic Standards Committee reviews the CV The case will be presented by two members of Academic Standards to the full committee votes Majority of voting members required to approve Committee members from the same department must
recuse themselves; others may recuse themselves if they feel conflicts of interest are present Decision relayed with memo identifying the criteria identified Graduate Ambassador Ben Chapman shares
 how he's preparing forty minutes of memorized music. Faculty are dedicated scholars, mentors and colleagues, and the backbone of our academic community. The Graduate School recognizes and supports faculty awards, and facilitates graduate faculty operations including appointments, assistantships, Graduate Council, and
graduate program proposals. Portfolio review guidelines Mentoring resources The Graduate Council was established by the Board of Governors in 1968 and was granted the authority and responsibility for the development of basic policies for the graduate education system and for the encouragement, improvement and evaluation of graduate
 programs throughout the university. Its membership includes two graduate faculty members elected from each of the graduate student. Meeting schedule and minutes See Graduate Council meeting dates, agendas and
 minutes. Membership Wayne State University is a comprehensive university with 13 schools and colleges. Here, you can explore a range of fields of study, with 375 academic programs; and 30 certificate, specialist and professional programs. Not ready
to declare a major upon admission? You can pursue an exploratory track designed to help incoming first-year students find the right program. Accounting (BA) (BS) (MS) (PBC) Adult-Gerontology Primary Care Nurse
