John deere 48 inch snow blade manual

This 48-in. (122-cm) Front Blade is compatible with Select Series™ X500, X520, X530, X534, X540, and X590 Multi-Terrain Tractors: Front blade is excellent for pushing snow and loose material. Wide, 48-in. (122-cm) width will completely clear material away from the path of the tractor when blade is in the angled position. Blade is raised and lowered using the tractor lift system; foot pedal on the X500 and X520 and hydraulic on the X530, X534, X540, and X590. An optional blade angling kit is available so the blade angle can be changed from the operator's seat. All Heavy Hitch products are made in the USA by a Minnesota company you can trust. Be confident in the quality and longevity of our products – we use only American made steel and qualified welders. Snow Plow Blade for John Deere – 48, 54, 60, 72 Details: Replaces John Deere factory part #M120139 for 48" and #M75674 for 54" blades. 72" model is for 54" blades with 9" John Deere extensions. Made of super wear resistant AR400 steel for maximum life. Thicker cutting edge to help reduce bounce and prolong cutting edge life. Includes stainless steel fasteners for easy installation on your compact tractor. Laser cut holes for a perfect fit. Will last four to six times longer than factory wear bar on your compact or sub-compact tractor. What is AR400 Steel? AR400 is a specialty steel designed at the chemical level for improved wear resistance for specific applications. The steel is relatively expensive to produce, costing much more than simple mild steels such as A36 or 1018. However, the steel's special properties make it the only choice for applications such as blades in bulldozers. Because of the unique strengths of AR400, it is used in heavy machinery and steel plate applications. In addition to the abrasion resistance benefits, AR400 has increased impact resistance. What is the benefit of impact resistance? Digger blades and buckets on heavy machinery can not only withstand impacts from stones and other debris, but the constant movement of dirt doesn't wear the steel down as quickly as other steels would. Please call us 1-888-337-8999 or contact us if you have any questions.
