Baby toys, particularly educational baby toys, can cost a lot of money. Unfortunately, babies tend to grow tired of their toys or outgrow them so quickly that you may think youve bought them for nothing. Plus, so many manufactured toys can be harmful and contain chemicals and other materials that just arent safe for your little one. The solution?
Homemade baby toys, of course! Jump to: This little alphabet monster is great for babies and toddlers. You make it from an old baby wipes container and it has the alphabet on individual bottle caps. Its a completely upcycled project that is so easy to make. Its great for babies because it teaches them hand eye coordination and once they get older,
they can learn their ABCs too. To make it, you just need a wipes container, a few bottle caps and some stickers. Source/Tutorial: icanteachmychild Heres another wonderful upcycled project that babies will love. This little discovery jug can be made from an old milk jug clean it out well first and a few small toys that baby can put into and take out of
the jug. Youll cut a hole in the top and on the side so baby can reach in and take things out. Its such a simple idea that will give your little one hours of fun and learning. Source/Tutorial: allourdays This little sensory bag takes only about five minutes to make and you can get most of the supplies for it from your local Dollar Tree. You just squeeze hair
gel into a plastic bag and drop in a few plastic or rubber creatures. Zip up the bag and duct tape the zipper in place. Babies will love the feel and sight of the bag and youll love how cheap and easy this one is to make. Source/Tutorial: dirtandboogers Empty paper towel rolls can be upcycled to create these fun and adventurous rain sticks that are the
perfect size for little hands. You tape up the ends after decorating the sticks washi tape or designed duct tape is perfect for this and then you fill the tubes with tiny legumes, beans, and rice. The sounds intrigue babies and they love peeking in the ends to see whats inside the sticks. Source/Tutorial: theimaginationtree I love the granny square
pattern I mean I use this pattern for just about everything and now, that includes these adorable little blocks for baby. You can get the pattern for just about everything and the project is really easy. If you have time before new baby arrives, you can get the pattern for just about everything and the project is really easy. If you have time before new baby arrives, you can get the pattern for just about everything and now, that includes these adorable little blocks for baby. You can get the pattern for these on Etsy for just under $4 and the project is really easy. If you have time before new baby arrives, you can get the pattern for these on Etsy for just under $4 and the project is really easy. If you have time before new baby arrives, you can get the pattern for these are great for giving out as gifts to new parents or
just keeping for your own little one. Plus, you get to practice your granny squares, which is a great skill to have for future projects. Source/Tutorial: etsy.com If you crochet, this little baby grab rattle is a must for your next projects. Source/Tutorial: etsy.com If you crochet, this little baby grab rattle is a must for your next projects. Source/Tutorial: etsy.com If you crochet, this little baby grab rattle is a must for your next projects. Source/Tutorial: etsy.com If you crochet, this little baby grab rattle is a must for your next projects.
the way. Its a pretty easy crochet project and wont take you long at all to work up. Plus, you only need to know basic stitches so you dont have to be a crochet pro to pull this one off. Source/Tutorial: herbsthandmade When my son was a baby many moons ago his great aunt made him the most wonderful little book and he still has it to this day. This
little babys first book will become such a treasure and its really easy to make. Theres a bit of sewing involved and lots of felt. Honestly, you can go by the pattern or create your own little book, maybe putting in characters to tell a story. Source/Tutorial:allfreesewing Plastic water bottles if you prefer make wonderful bowling pins. You
can create a neat little bowling set with mostly upcycled products and its a game that toddlers and even bigger kids will love. Paint the bottles all different colors. Source/Tutorial: ucreatewithkids Wooden clothespins make the most
adorable little fairies. You may want to hold these off until your little one is close to a year old or at least until they wont instantly stick them in their mouths. Theyre perfect for toddlers and are so much fun to make. You can even let the little ones help to design them. Source/Tutorial: madebyjoel Babies will absolutely adore this colorful caterpillar
that you can easily crochet. The pattern is for beginners so even if youve never crocheted anything, you can pull this one off. It doesnt take long to work up and its perfect for expectant mothers as a shower gift. If you prefer, do blue and white or pink and white instead of the rainbow colors, although the colors really do make it so much more
appealing. Source/Tutorial: allfreecrochet So, you may not want this drum set for your own little one they really do play but its a great project is so very easy to do. You can even make the drum sticks yourself. Little ones from about age one and up will adore
playing with these little drums and making music for the family. Source/Tutorial: prudentbaby Those little baby gyms that lay in the floor are cute, but they can be a tad expensive. This DIY version is better because its much cheaper and well, because its a DIY project. Youll need pine board and some dowels to create the gym and then eye hooks, s
hooks and some chain to hang the toys from. Just lay baby on a blanket on the floor and watch him play away with the little overhead gym. Source/Tutorial: eakahouse Sensory boards are great for teaching little ones all about hand eye coordination and many other things. For older children, you can put things like zippers and buttons and for younger
ones, a mirror, maybe some carpet swatches and just anything that they can see or feel. Put all of your sensory items on a board and then secure it to the wall. Little ones will spend hours playing with all of the sensory toys. Source/Tutorial: funathomewithkids Babies love blocks at least all of mine did. You can make a nice little set of soft blocks with
some foam and a few pieces of scrap fabric. This is the perfect project for using up all of those leftover fabric pieces from other DIYs. Youll need to cut the foam or have it cut into small block shapes and then just sew a little cover for each one. Source/Tutorial: wrenhandmade Fabric balls are perfect for little ones for so many reasons. These are soft
round, and really colorful and you can sew them even if you are completely new to using a sewing machine. The inside is cotton batting so the balls are perfectly soft and safe for babies and they are simply going to love the shape and the different colors. Plus, they work well to teach toddlers coordination as they age. Source/Tutorial: purlbee These
little monkeys were such a hit when my kids were younger and they still have them to this day. The crocheted design makes them really soft and pliable and little ones from birth to pre-teen are going to adore them. This is the perfect gift for an upcoming shower if you want something that the new baby will treasure for years to come. You can get
these on Etsy if you dont feel like crocheting one yourself. Source/Tutorial: etsy.com Wooden discs, which cost less than a dollar each at your local craft store, and some felt combine to make this really fun and really cheap DIY matching game. This is a great memory and cognition game for toddlers and its so very easy to make. Even younger ones
around six months old or so will love stacking the colorful discs and when they get older, they can learn the matching aspect of the game. Source/Tutorial: babycenter That leftover felt from other projects will be put to good use in this little felt book of shapes. You just cut the squares for the book and then add felt shapes, sewn on to make the secure.
Once youre finished adding all your shapes, use a ring to hold all of the felt book pages together. Even little babies will love the colors and softness of this book. Source/Tutorial: plainvanillamom Felt really is the best material for making baby toys. Its soft, easy to work with and really inexpensive. That said, heres another great little felt toy project for
your tiny ones. This is a toy truck that is completely made from felt. This is an adorable little truck that is perfect for the new son of a truck driver. What a wonderful baby shower gift! Plus, its really easy to make and did I mention that its adorable? Source/Tutorial: makeit-loveit Finger puppets are a baby favorite and you can make your own with
leftover fabric scraps and a few other key supplies. They are really quick and easy to put together and you can use your imagination to create an entire zoo of little finger puppet animals. Now, just perfect your creature voice to go along with the puppets and keep baby entertained for hours with his own little private puppet show. Source/Tutorial:
makesewbaby These little fleece toys are really adorable and theyre perfect for tactile stimulation with their ribbon tags sticking out from all angles. Babies will adore them and since theyre really soft, its ok if they stick them in their mouths. Fleece makes them soft and touchable for babies and ensures that you can wash them from time to time to
keep them clean and germ free. Source/Tutorial: mayarts This little football is really cute and its the perfect for you to practice your crochet. You dont need to know any complicated stitches, which makes it perfect for beginners. Plus, its a football and what little boy doesnt want a soft and cuddly football? This one works up really quickly and
is a great gift for an upcoming shower for a new baby boy. Source/Tutorial: nattyknitter Did I mention how much I love upcycled water bottles work really well for little ones so grab one or
however many you want to make and then fill with water and add any number of glittery or otherwise exciting small toys. For really little ones, I recommend gluing the lid on to keep it from coming loose. Source/Tutorial: pinkpistachio Turn old gloves into these adorable little glove monsters that babies will love playing with. Theyre soft so theres no
worries of them harming themselves and you can make them from mismatched gloves so technically, this qualifies as an upcycle. If youre sewing on button eyes, be sure to make them really secure, particularly if your little one still puts things in her mouth. These are also great for toddlers who may just want to help you create them. Source/Tutorial:
craftaholicsanonymous This is possibly the easiest DIY toy on the list and its perfect for helping babies to develop their fine motor skills. Babies are amazed by things that they can pull and tug and this box is built just for that. You just need a somewhat sturdy cardboard box and then things to tug like yarn, pipe cleaners, ribbon and other things. Just
attach them to the box through holes and then they can pull and push them all they want. Source/Tutorial: laughingkidslearn Babies develop through learning and they learn by using all of their senses. Sensory play toys are vital for helping your little one to develop key skills. These rainbow shaker bottles are perfect for that and theyre just so much
fun for little ones. Toddlers and older children can even use them as homemade instruments to create their own music and theyre made from plastic bottles that you upcycle so this really is a win-win project. Source/Tutorial: mylittle3andme Babies love lots of color which is what makes these ribbon wands perfect. Theyre filled with color and little
ones are going to adore watching and playing with them. You can make these in about five minutes and you dont need too many supplies. Washi tape helps to design the handle and keeps the ribbons in place youll need colorful ribbon of course. These are great for entertaining little ones or letting toddlers entertain themselves. Source/Tutorial:
becomingmartha This little bunny is made from scrap fabric, which makes him really appealing to babies since the designs are all different. Plus, it gives you a chance to use up those fabric scraps from other projects. Hes really soft so hes perfect for little ones and you can have it put together in no time. This is a great homemade baby toy to give as a
shower gift. If you have enough scrap fabric, you can make an entire family of little bunnies. Source/Tutorial: 733blog n though for little bitties to play with and they can chew on the pieces and you dont have to worry about cuts or bruises on their gums. This is a
really easy project to sew and would be perfect for new parents. Source/Tutorial: raisin-toast Teething is not an enjoyable time for babies or for parents. This little all natural teething toy however, may just make it a bit more bearable. Its made in a bunny ear pattern which gives babies two places to chew and the top is made from absorbent terry cloth
which you can wet and freeze to help soothe those sore gums. The ring is unfinished maple hardwood and the entire thing is really adorable. You can get this one on Etsy for $6. Source/Tutorial: etsy.com Being crafty and enjoying DIY projects can even filter into the nursery. Ill bet you didnt know that you could make a learning toy for little ones with
an old baby wipes container, did you? Ill also bet that you are going to love all of the baby toys in this list. They are all homemade so you know exactly what materials are being used and theyre easy for you to make. They make wonderful gifts for an upcoming baby shower, too. Any new parent is going to adore a handmade baby toy. Take a look at
these 30 DIY Sensory Toys and Games to create the ultimate sensory playhouse. There are some of the most adorable toys in this collection and many of them are great for learning purposes, too. From an alphabet sorter to many sensory toys and a great box that is designed to help babies develop fine motor skills, youre going to find the perfect baby
toy project in here. Since babies do outgrow their toys quickly, it makes sense to DIY baby toys to save money, right? Once theyre outgrown them, you can gift them to charity and youre not really out anything. And speaking of outgrown them, you can gift them to charity and youre not really out anything. And speaking of outgrown them, you can gift them to charity and youre not really out anything. And speaking of outgrown them, you can gift them to charity and youre not really out anything.
make when your little ones outgrow their little ones outgrow their little one plays with or you just really have a DIY itch and want a neat little project, check out these 30 different baby toys that you can make in your spare time. Youll find something that you and baby will love and things that are perfect for anyone you
know that is expecting soon. Try one or try them all. You can make everything on the list in no time at all and have an entire collection of homemade baby toys, particularly educational baby toys, can cost a lot of money.
Unfortunately, babies tend to grow tired of their toys or outgrow them so quickly that you may think youve bought them for nothing. And speaking of outgrowing things, check out these 20 upcycling projects for baby clothes. There are some wonderful things that you can make when your little ones outgrow their little outfits. So, if you
worry about the toys that your little one plays with or you just really have a DIY itch and want a neat little project, check out these 30 different baby toys that you can make in your spare time. Youl find something that you can make in your spare time.
everything on the list in no time at all and have an entire collection of homemade baby toys to keep your little one happy for a couple of years until they grow into more technical type toys like video games, that is. Buying toys for your baby can be expensive, and sometimes they dont last that long! We all want to encourage creative play in our little
ones. But did you know you can just make your own safe, homemade toys for a fraction of the cost? So before you fork out hundreds of dollars on expensive development toys, check out our 26 DIY baby toysand make your own DIY sensory toys using common things around the home. Your child really doesnt care about brand names or labels
In fact, they dont even know what a toy is. They really just want something bright and noisy to play and engage with, and begin developing their senses through creative play. All of the DIY toys below will help your baby to develop their senses through creative play. All of the DIY toys below will help your baby, and with a
little bit of imagination you can turn everyday things into toys with a twist. In fact, you may just find that baby keeps going back to your colourful wrapped tissue box; bypassing all those development toys along the way! Safety First Homemade Baby Sensory Toy SafetyWhen making your own toys, its important to keep safety in the front of your mind. A
good checklist to follow is:Size of DIY baby toysA general rule is the smaller the child, the bigger the toy. If the toy can fit into a film canister, or it has removable parts that can, then it is not suitable for children under 3 years of age. Surface on DIY baby toysBabies put everything in their mouths and can be easily poisoned if a toy is made from, or
coated in, a toxic material. Check out paint and adhesive labels before use. You should also make sure the surface is smooth, with no sharp edges or corners. Strings on DIY baby toys make sure any strings or ribbons are not long enough to get wrapped around baby and cut off babys circulation. Knots must be strong, and loops not too large. Also make
sure they are firmly attached to the toy. Supervision of babies with toysDid we mention babies put everything in their mouths? Its important to remember any homemade toy can potentially cause choking no matter how well youve made it. If anyone can pull it apart, your baby can! Keep an eye on baby at all times. So with all those safety points in
mind, here are some great ideas for turning everyday items into fabulous toys. What are Sensory toys for Babies? Sensory toys for babies is a sub-category of these types
of toys, specially geared toward 6 month old babies to toddlers. We call these sensory toys because theyre designed to develop your childs senses: touch, taste, see, smell and hear, and youll start to find objects that could develop these important cognitive functions in your baby. Below weve
included the 5 senses and importance of their development in early childhood, as well as some starter ideas to get you thinking about potential toys.1. TouchTouch is one of the most important senses for babies are comforted by touch, cuddling close can help your baby feel more secure. Youll start to see your baby grab at your eyes and nose
as they begin developing this vital sense. And once baby is a little older and crawling, theyll touch everything in sight as they develop this part of their brain.DIY baby toy options for developing touch: squishy balls, edible paint, textured card, fluffy material, warm and cool items. 2. TasteBabies prefer sweet tastes over sour or bitter tastes, this is an account of their brain. DIY baby toy options for developing touch:
important survival mechanism in the first few years. But babies also use their sense of taste far more than we do as adults. Did we mention crawling and grabbing things, just watch how many of those go in babys mouth!DIY baby toy options for developing taste: ice, warm and cool foods, sugar-free jello, food exploration3. SeeOver the first few
months, your baby may have uncoordinated eye movements. They may even appear cross-eyed. This is because babies can only focus at close range. This is about 8 to 10 inches, or the distance between a mothers face to the baby develop.DI
baby toy options for developing sight: dark and light patterns, objects hanging at different heights, bright colored materials.4. Smell develops a part of the brain called the olfactory cortex and it has a
relationship with deep, emotional memory. So its a really important sense to help develop.DIY baby toy options for developing smell: essential oils, natural fibres like wool and leather, sweet and fragrant spices and exotic fruits.5. HearHearing is fully developed in newborns. Babies with normal hearing should startle in response to loud sounds
Newborns seem to prefer a higher-pitched voice (like their mothers). They can also tune out loud noises after hearing them several times. A very cool sense!DIY baby toy options for developing hearing: crinkly cellophane, pots and spoons, crunchy paper, blocks to bash. 1. Magic scarvesCut a cup sized hole into the lid of an ice cream container and
then tape around it to soften any sharp edges. Fill the container with lots of different coloured scarves, ribbons, or long pieces of material, and watch baby have lots of fun pulling them out, then stuffing them back in. 2. Cardboard box building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal, make great building blocks for baby Small boxes like those used for tea bags, tissues and cereal building blocks for baby Small boxes like those used for tea bags, tissues and cereal building blocks for baby Small boxes like those used for tea bags, 
baby. Stuff the boxes with newspaper to make them sturdy, and then wrap them in brightly coloured book covering. Because the book covering is 100% adhesive, there are no bits of tape or paper that can come off and cause choking. Fabric and foam blocks for babies the book covering is 100% adhesive, there are no bits of tape or paper that can come off and cause choking.
construct a cute little set of soft bricks from foam or styrofoam and some leftover fabric. Just cut down the foam into small brick shapes. Then cut a rectangle of fabric and glue onto the brick. Make sure the fabric is well glued down so baby cant get to the foam inside. This is a great way to use leftover fabric from previous do-it-yourself projects.
Disappearing ballCut a cup sized hole, half way along a postage tube or kitchen paper towel tube and find 2 or 3 brightly coloured small balls. When baby drops the ball through the hole it disappears, but when they pick up the tube to find it, the ball rolls out one end. Babies from 9 months on will be fascinated by how this works. 5. Cup and ball
gameThis is another variation on the ball and cup concept. This time though tie a piece of wool or string around the small ball, and glue in place. Then tie and glue in place. Then tie and glue the other end to the bottom of a plastic cup. Now watch as baby pushes and tosses the ball in, on and around the cup. You can see the full instructions for this toy here: DIY cup and ball
 game.6. Babys first board bookMake your own board books for baby by cutting out pictures from magazines and gluing them onto sturdy card. Cover each page with clear book covering and then tape them together to form an accordion. You could also print out photos of your family and pets, or places around your home, to really personalise the
book.7. Homemade rattlePut a handful of stones, rice or pasta into a small Pringlestin and tape the lid firmly shut with packaging tape to make a great rattle. Make sure the tape is pressed flat onto the can, so that baby cant pull off small pieces. Small Milo, baking powder or Quik tins are also a good size for baby to hold. But if you use a Pringles tin
then you get to eat the chips first! Heres some more musical instrument ideas in Making music with your kids.8. Milk formula tin, or similar, and a wooden spoon is all you need to make a great drum kit! And we know just how much you love noisy toys If you want to get all
arty, consider painting them, or even using Washi tape to brighten them up.9. Wine cask mailboxWine casks are sturdy boxes which make great posting toys. Cut several different shapes out of one side of the box, some that are bigger than others. Cover the box in brightly coloured book covering, and give baby some small toys to post. They will soon
discover that some items fit through the holes, while others are too big or the wrong shape.10. Homemade baby activity gymMake your own activity gym
do this is to use the edges between heavy cushions and the armrests. Insert the broom or mop handle down securely, and hold it in place with the cushions. Use lots of different colour, shape and textured soft toys for brain development, and position them just high enough so baby has to stretch a little to bat them. This helps develop muscles
movement and hand-eye coordination too.11. Glitter bottle snow globeCourtesy: onelittleproject.com fill a small water bottle or plastic jar with water and add 2-3 good handfuls of glitter, then top up with clear glue (like Elmers glue). Firmly glue the lid shut, so that it cannot be opened. Now let baby tip it backwards and forwards. When they start
crawling they will love chasing it across the room!12. Scrunchy sound socksStuff a sock with crinkly wrapping paper or newspaper, and tie a knot in the end. Baby can safely scrunch the sock and be rewarded with great sounds. This is a great way to upcycle those lost left socks, or the ones with holes in them your partner refuses to throw out!13.
Scrunchy sensory stockingsThis is a variation on the idea above. Stuff an old stocking (you know the ones with ladders in them that sit at the bottom of your drawer) with lots of different sensory items and tie the end closed with a knot. Interesting textures could be round rubber balls, chunky Duplo or Lego blocks, and scrunchy leaves. Add them all
into the same stocking for your baby to explore.14. Plastic bottle lids from milk bottles, or soda bottles, are perfect. Then string them together on a piece of elastic, or string, to form a bracelet. This makes a great rattle too, which is light and easy for baby to grasp on
to.15. Homemade stacker cupsCollect plastic lids from various containers to make your own set of stacking cups. Hairspray, shaving foam, cooking oil, dairy whip, milk bottles and plastic soda bottles all have good size lids. Make sure you wash them well before use. This is definitely not a toy for younger children, play with supervision.16. Texture
funMake great textured blocks by gluing different fabrics and materials onto wooden blocks. Exploring different textures is a great way for baby to begin development milestones. Think of texture when you select your fabrics. So corrugated cardboard, sheeps wool, faux fur, satin, even light sandpaper. You
can often get offcut fabric from bulk bins for next to nothing.17. Click-click toysOld keyboards or calculators are great fun for babies to tap on, especially as they are rewarded with the click click sound. Make sure there are no loose buttons or keys. This is another great toy for developing touch and dexterity.18. Laundry basket racerLaundry
baskets (or large cardboard boxes) make great cars for baby to sit in. It takes some effort for you to push them around the house, but their giggles will make it worth your while.19. Homemade walking around while leaning on furniture or being
lead by the hand). It needs to be light enough so that it moves when baby pushes against it, but not so light that it takes off from under them. 20. Baby Plays with WaterIts as basic as it gets. Just enough water and bath toys should be placed on a baking sheet for him to splash in, and you should see the joy on his face. He is content to rest on his
stomach at this time and moves objects around on his own. He ought to be nearby, of course. Dont do it just yet if your infant is still learning to hold his head up.21. Smoosh painting paper into a tray, and spoon in different
coloured child-safe paint. Then place a sheet of transparency paper over the top, and have baby smoosh away until their hearts content. After a few minutes youll have your babys first ever artwork to display, not quite a Jackson Pollock painting, but a great start. Just rinse out the tray and create again. 22. Bowling pins made from plastic
bottles Knocking over bowling pins is just run at an age. Make your own out of recycled bottles and paint them bright rainbow colours for interest. You can put some sand or water in the bottom to make them stay up longer. And teach baby how to roll or throw different objects to knock them over. Just wait for the giggles to start!23. Cute wooden peg
doll or clothespin dollWooden clothespins make the sweetest tiny fairies (or for older children even clothespin mermaids). Just glue material on as a skirt, and some wool as a head. Use a food safe marker to dot on wee eyes and a mouth. Make sure you use the large craft clothespins or peg dolls to prevent choking, as theres nothing better for a
teething baby than to drool on a wooden clothespin.24. Sensory smell jarsThis toy is just as much fun to make as it is to play with. Youll need a number of small plastic jars with plastic jars
cinnamon or star anise, and herbs like mint and lavendar. Mix and match scents to make your own interesting smells.25. Spiders Web Discovery BasketThis is a really fun discovery play toy. Just stretch and crisscross a number of rubber bands over a plastic container, then add in a bunch of babies favourite toys. Now have baby try to take the toys out
of the container by reaching through the spiders web of rubber bands. Watch as they develop dexterity skills and hand-eye coordination as they navigate the puzzle. Just keep an eye on those rubber bands, especially with an extra curious child as they can be a choking hazard.26. Upcycled anything!Remember, babies find fun in just about everything.
Boxes, tubes, containers, cups, spoons, wrapping paper you name it. It doesnt have to be an official toy to provide entertainment the whole world is one big playground. Open up your plastics cupboard and raid the recycling, youll be surprised with just what you come up with. Have fun! I hoped you liked our article on homemade baby sensory toys. For
more information on toys that are suitable for the different stages of babyhood, check out Baby Toys, or check out ourToyssection for some great new ideas. Baby toys, particularly educational baby toys, can cost a lot of money. Unfortunately, babies tend to grow tired of their toys or outgrow them so quickly that you may think youve bought them for
nothing. Plus, so many manufactured toys can be harmful and contain chemicals and other materials that just arent safe for your little one. The solution? Homemade baby toys, of course! Jump to: This little alphabet monster is great for babies and toddlers. You make it from an old baby wipes container and it has the alphabet on individual bottle caps
Its a completely upcycled project that is so easy to make. Its great for babies because it teaches them hand eye coordination and once they get older, they can learn their ABCs too. To make it, you just need a wipes container, a few bottle caps and some stickers. Source/Tutorial: icanteachmychild Heres another wonderful upcycled project that babies
will love. This little discovery jug can be made from an old milk jug clean it out well first and a few small toys that baby can put into and take out of the jug. Youll cut a hole in the top and on the side so baby can put into and take out of the jug. Youll cut a hole in the top and on the side so baby can put into and take out of the jug. Youll cut a hole in the top and on the side so baby can reach in and take things out. Its such a simple idea that will give your little one hours of fun and learning. Source/Tutorial: allourdays This
little sensory bag takes only about five minutes to make and you can get most of the supplies for it from your local Dollar Tree. You just squeeze hair gel into a plastic bag and drop in a few plastic or rubber creatures. Zip up the bag and duct tape the zipper in place. Babies will love the feel and sight of the bag and youll love how cheap and easy this
one is to make. Source/Tutorial: dirtandboogers Empty paper towel rolls can be upcycled to create these fun and adventurous rain sticks that are the perfect size for little hands. You tape up the ends after decorating the sticks washi tape or designed duct tape is perfect for this and then you fill the tubes with tiny legumes, beans, and rice. The sounds
intrigue babies and theyll love peeking in the ends to see whats inside the sticks. Source/Tutorial: theimaginationtree I love the granny square pattern for these on Etsy for just under $4 and the project is really easy.
If you have time before new baby arrives, you can crochet an entire block collection. These are great for giving out as gifts to new parents or just keeping for your own little one. Plus, you get to practice your granny squares, which is a great skill to have for future projects. Source/Tutorial: etsy.com If you crochet, this little baby grab rattle is a must
for your next project. These are great if you are expecting or they make wonderful shower gifts if you know someone who has a little one on the way. Its a pretty easy crochet project and wont take you long at all to work up. Plus, you only need to know basic stitches so you dont have to be a crochet pro to pull this one off. Source/Tutorial:
herbsthandmade When my son was a baby many moons ago his great aunt made him the most wonderful little book, maybeed and lots of felt. Honestly, you can go by the pattern or create your own little book, maybeed and lots of felt. Honestly, you can go by the pattern or create your own little book, maybeed and lots of felt. Honestly, you can go by the pattern or create your own little book, maybeed and lots of felt.
putting in characters to tell a story. Source/Tutorial: allfreesewing Plastic water bottles or 2 liter bottles and even bigger kids will love. Paint the bottles all different colors by putting paint on the inside so that
theyre safe for babies and little ones can even use the game to learn their colors. Source/Tutorial: ucreatewithkids Wooden clothespins make the most adorable little fairies. You may want to hold these off until your little one is close to a year old or at least until they wont instantly stick them in their mouths. Theyre perfect for toddlers and are so
much fun to make. You can even let the little ones help to design them. Source/Tutorial: madebyjoel Babies will absolutely adore this colorful caterpillar that you can easily crochet. The pattern is for beginners so even if youve never crocheted anything, you can pull this one off. It doesn't take long to work up and its perfect for expectant mothers as a
shower gift. If you prefer, do blue and white or pink and white instead of the rainbow colors, although the colors really do make it so much more appealing. Source/Tutorial: allfreecrochet So, you may not want this drum set for your own little one they really do play but its a great project for musical little ones. The drums are made from yoga cork
blocks and the entire project is so very easy to do. You can even make the drum sticks yourself. Little ones from about age one and up will adore playing with these little drums and making music for the family. Source/Tutorial: prudentbaby Those little drums and making music for the family.
because its much cheaper and well, because its a DIY project. Youll need pine board and some dowels to create the gym and then eye hooks, s hooks and some chain to hang the toys from. Just lay baby on a blanket on the floor and watch him play away with the little overhead gym. Source/Tutorial: eakahouse Sensory boards are great for teaching
little ones all about hand eye coordination and many other things. For older children, you can put things like zippers and buttons and for younger ones, a mirror, maybe some carpet swatches and just anything that they can see or feel. Put all of your sensory items on a board and then secure it to the wall. Little ones will spend hours playing with all of
the sensory toys. Source/Tutorial: funathomewithkids Babies love blocks at least all of mine did. You can make a nice little set of soft blocks with some foam and a few pieces from other DIYs. Youll need to cut the foam or have it cut into small block shapes and then
just sew a little cover for each one. Source/Tutorial: wrenhandmade Fabric balls are perfect for little ones for so many reasons. These are soft, round, and really colorful and you can sew them even if you are completely new to using a sewing machine. The inside is cotton batting so the balls are perfectly soft and safe for babies and they are simply
going to love the shape and the different colors. Plus, they work well to teach toddlers coordination as they age. Source/Tutorial: purlbee These little monkeys were such a hit when my kids were younger and they still have them to this day. The crocheted design makes them really soft and pliable and little ones from birth to pre-teen are going to adore
them. This is the perfect gift for an upcoming shower if you want something that the new baby will treasure for years to come. You can get these on Etsy if you dont feel like crocheting one yourself. Source/Tutorial: etsy.com Wooden discs, which cost less than a dollar each at your local craft store, and some felt combine to make this really fun and
really cheap DIY matching game. This is a great memory and cognition game for toddlers and its so very easy to make. Even younger ones around six months old or so will love stacking the colorful discs and when they get older, they can learn the matching aspect of the game. Source/Tutorial: babycenter That leftover felt from other projects will be
put to good use in this little felt book of shapes. You just cut the squares for the book and then add felt shapes, sewn on to make the secure. Once youre finished adding all your shapes, use a ring to hold all of the felt book pages together. Even little babies will love the colors and softness of this book. Source/Tutorial: plainvanillamom Felt really is the
best material for making baby toys. Its soft, easy to work with and really inexpensive. That said, heres another great little felt toy project for your tiny ones. This is a toy truck driver. What a wonderful baby shower gift! Plus, its really easy to make
and did I mention that its adorable? Source/Tutorial: makeit-loveit Finger puppets are a baby favorite and you can make your own with leftover fabric scraps and a few other key supplies. They are really quick and easy to put together and you can make your imagination to create an entire zoo of little finger puppet animals. Now, just perfect you
creature voice to go along with the puppets and keep baby entertained for hours with his own little private puppet show. Source/Tutorial: makesewbaby These little fleece toys are really adorable and theyre perfect for tactile stimulation with their ribbon tags sticking out from all angles. Babies will adore them and since theyre really soft, its ok if they
stick them in their mouths. Fleece makes them soft and touchable for babies and ensures that you can wash them from time to keep them clean and germ free. Source/Tutorial: mayarts This little football is really cute and its the perfect project for you to practice your crochet. You dont need to know any complicated stitches, which makes it
perfect for beginners. Plus, its a football and what little boy doesnt want a soft and cuddly football? This one works up really quickly and is a great gift for an upcoming shower for a new baby boy. Source/Tutorial: nattyknitter Did I mention how much I love upcycling projects? Well, heres another one. This little glitter bottle is sure to keep babies
happy for hours on end and you can make it from upcycled water bottles. Those smaller bottles work really well for little ones so grab one or however many you want to make and then fill with water and add any number of glittery or otherwise exciting small toys. For really little ones, I recommend gluing the lid on to keep it from coming loose.
Source/Tutorial: pinkpistachio Turn old gloves into these adorable little glove monsters that babies will love playing with. Theyre soft so theres no worries of them harming themselves and you can make them really secure,
particularly if your little one still puts things in her mouth. These are also great for toddlers who may just want to help you create them. Source/Tutorial: craftaholicsanonymous This is possibly the easiest DIY toy on the list and its perfect for helping babies to develop their fine motor skills. Babies are amazed by things that they can pull and tug and
this box is built just for that. You just need a somewhat sturdy cardboard box and then things to tug like yarn, pipe cleaners, ribbon and other things. Just attach them to the box through learning and they learn by using all of their
senses. Sensory play toys are vital for helping your little ones. Toddlers and older children can even use them as homemade instruments to create their own music and theyre made from plastic bottles that you upcycle so this really is a win-
win project. Source/Tutorial: mylittle3andme Babies love lots of color which is what makes these ribbon wands perfect. Theyre filled with color and little ones are going to adore watching and playing with them. You can make these in about five minutes and you dont need too many supplies. Washi tape helps to design the handle and keeps the ribbons
in place youll need colorful ribbon of course. These are great for entertaining little ones or letting toddlers entertain themselves. Source/Tutorial: becomingmartha This little bunny is made from scrap fabric, which makes him really appealing to babies since the designs are all different. Plus, it gives you a chance to use up those fabric scraps from
other projects. Hes really soft so hes perfect for little ones and you can have it put together in no time. This is a great homemade baby toy to give as a shower gift. If you have enough scrap fabric, you can make an entire family of little bunnies. Source/Tutorial: 733blog n though for little ones, and this soft stacking ring toy is perfect. Its made from
fabric so its great for little bitties to play with and they can chew on the pieces and you dont have to worry about cuts or bruises on their gums. This is a really easy project to sew and would be perfect for new parents. Source/Tutorial: raisin-toast Teething is not an enjoyable time for babies or for parents. This little all natural teething toy however,
may just make it a bit more bearable. Its made in a bunny ear pattern which gives babies two places to chew and the entire thing is really adorable. You can get this one on Etsy for $6. Source/Tutorial:
etsy.com Being crafty and enjoying DIY projects can even filter into the nursery. Ill bet you didnt know that you could make a learning toy for little ones with an old baby wipes container, did you? Ill also bet that you are going to love all of the baby toys in this list. They are all homemade so you know exactly what materials are being used and theyre
easy for you to make. They make wonderful gifts for an upcoming baby shower, too. Any new parent is going to adore a handmade baby toy. Take a look at these 30 DIY Sensory Toys and Games to create the ultimate sensory playhouse. There are some of the most adorable toys in this collection and many of them are great for learning purposes, too.
From an alphabet sorter to many sensory toys and a great box that is designed to help babies develop fine motor skills, youre going to find the perfect baby toy project in here. Since babies do outgrown them, you can gift them to charity and youre not really
out anything. And speaking of outgrowing things, check out these 20 upcycling projects for baby clothes. There are some wonderful things that you can make when your little one plays with or you just really have a DIY itch and want a neat little project, check out these 30
different baby toys that you can make in your spare time. Youll find something that are perfect for anyone you know that is expecting soon. Try one or try them all. You can make everything on the list in no time at all and have an entire collection of homemade baby toys to keep your little one happy for a couple of
years until they grow into more technical type toys like video games, that is. Buying toys for your baby can be expensive, and sometimes they dont last that long! We all want to encourage creative play in our little ones. But did you know you can just make your own safe, homemade toys for baby, for a fraction of the cost? So before you fork out
hundreds of dollars on expensive development toys, check out our 26 DIY baby toysand make your own DIY sensory toys using common things around the home. Your child really doesnt care about brand names or labels. In fact, they dont even know what a toy is. They really just want something bright and noisy to play and engage with, and begin
developing their senses through creative play. All of the DIY toys below will help your baby to develop their senses through sensory experience. There are plenty of household items that make great toys for baby, and with a little bit of imagination you can turn everyday things into toys with a twist. In fact, you may just find that baby keeps going back to
your colourful wrapped tissue box; bypassing all those development toys along the way! Safety First Homemade Baby Sensory Toy SafetyWhen making your own toys, its important to keep safety in the front of your mind. A good checklist to follow is: Size of DIY baby toys general rule is the smaller the child, the bigger the toy. If the toy can fit into a
film canister, or it has removable parts that can, then it is not suitable for children under 3 years of age. Surface on DIY baby toys Babies put everything in their mouths and can be easily poisoned if a toy is made from, or coated in, a toxic material. Check out paint and adhesive labels before use. You should also make sure the surface is smooth, with no
sharp edges or corners. Strings on DIY baby toys Make sure any strings or ribbons are not long enough to get wrapped around baby and cut off babys circulation. Knots must be strong, and loops not too large. Also make sure they are firmly attached to the toy. Supervision of babies with toys Did we mention babies put everything in their mouths? Its
important to remember any homemade toy can potentially cause choking no matter how well youve made it. If anyone can pull it apart, your baby can! Keep an eye on baby at all times. So with all those safety points in mind, here are some great ideas for turning everyday items into fabulous toys. What are Sensory Toys for Babies? Sensory toys are a
specialist toy category that cater for all age groups, from newborns right up to adults. Think of squishy sound books for newborns, or newtons cradle for grown ups. Sensory toys because theyre designed to develop your
childs senses. So as you look around the house, think of the 5 senses: touch, taste, see, smell and hear, and youll start to find objects that could develop these importance of their development in early childhood, as well as some starter ideas to get you thinking about
potential toys, 1. Touch Touch is one of the most important senses for babies. Babies are comforted by touch, cuddling close can help your baby grab at your eves and nose, as they begin developing this vital sense. And once baby is a little older and crawling, they little older and crawling, they little older and crawling in sight as they develop
this part of their brain.DIY baby toy options for developing touch: squishy balls, edible paint, textured card, fluffy material, warm and cool items. 2. TasteBabies prefer sweet tastes over sour or bitter tastes, this is an important survival mechanism in the first few years. But babies also use their sense of taste far more than we do as adults. Did we
mention crawling and grabbing things, just watch how many of those go in babys mouth!DIY baby toy options for developing taste: ice, warm and cool foods, sugar-free jello, food exploration3. SeeOver the first few months, your baby may have uncoordinated eye movements. They may even appear cross-eyed. This is because babies can only focus at
close range. This is about 8 to 10 inches, or the distance between a mothers face to the baby in her arms. Their focus improves over the first 2 to 3 years of life, so this is a really key sense to help baby develop. DIY baby toy options for developing sight: dark and light patterns, objects hanging at different heights, bright colored materials. 4.
SmellStudies show that newborns have a very strong sense of smell. Newborns prefer the smell of their own mother, especially her breastmilk. Smell develops a part of the brain called the olfactory cortex and it has a relationship with deep, emotional memory. So its a really important sense to help develop. DIY baby toy options for developing smell:
essential oils, natural fibres like wool and leather, sweet and fragrant spices and exotic fruits. 5. Hear Hearing is fully developed in newborns. Babies with normal hearing should startle in response to loud sounds. Newborns seem to prefer a higher-pitched voice (like their mothers). They can also tune out loud noises after hearing them several times. A
very cool sense!DIY baby toy options for developing hearing: crinkly cellophane, pots and spoons, crunchy paper, blocks to bash. 1. Magic scarvesCut a cup sized hole into the lid of an ice cream container and then tape around it to soften any sharp edges. Fill the container with lots of different coloured scarves, ribbons, or long pieces of material, and
watch baby have lots of fun pulling them out, then stuffing them back in.2. Cardboard box building blocks for baby. Stuff the boxes with newspaper to make them sturdy, and then wrap them in brightly coloured book covering. Because the book covering is
100% adhesive, there are no bits of tape or paper that can come off and cause choking. Fabric and foam blocks for babies from foam or styrofoam and some leftover fabric. Just cut down the foam into small brick shapes. Then cut a
rectangle of fabric and glue onto the brick. Make sure the fabric is well glued down so baby cant get to the foam inside. This is a great way to use leftover fabric from previous do-it-yourself projects. 4. Disappearing ballCut a cup sized hole, half way along a postage tube or kitchen paper towel tube and find 2 or 3 brightly coloured small balls. When
baby drops the ball through the hole it disappears, but when they pick up the tube to find it, the ball and cup concept. This time though tie a piece of wool or string around the small ball, and glue in place. Then tie
and glue the other end to the bottom of a plastic cup. Now watch as baby pushes and tosses the ball in, on and around the cup. You can see the full instructions for this toy here: DIY cup and ball game. 6. Babys first board bookMake your own board books for baby by cutting out pictures from magazines and gluing them onto sturdy card. Cover each
page with clear book covering and then tape the book. 7. Homemade rattlePut a handful of stones, rice or pasta into a small Pringlestin and tape the lid firmly shut with packaging tape to make a great rattle.
Make sure the tape is pressed flat onto the can, so that baby cant pull off small pieces. Small Milo, baking powder or Quik tins are also a good size for baby to hold. But if you use a Pringles tin, then you get to eat the chips first! Heres some more musical instrument ideas in Making music with your kids. 8. Milk formula tin drum kitCourtesy:
Hometalk.comAn empty milk formula tin, or similar, and a wooden spoon is all you need to make a great drum kit! And we know just how much you love noisy toys If you want to get all arty, consider painting them, or even using Washi tape to brighten them up.9. Wine cask mailboxWine casks are sturdy boxes which make great
posting toys. Cut several different shapes out of one side of the box, some that are bigger than others. Cover the box in brightly coloured book covering, and give baby some small toys to post. They will soon discover that some items fit through the holes, while others are too big or the wrong shape. 10. Homemade baby activity gymMake your own
activity gym by tying a selection of small toys to a broom stick or long pole and resting it between 2 chairs or couches. Make sure the edges between heavy cushions and the armrests. Insert the broom or mop handle down securely, and hold it in place with
the cushions. Use lots of different colour, shape and textured soft toys for brain development, and position them just high enough so baby has to stretch a little to bat them. This helps develop muscles, movement and hand-eye coordination too. 11. Glitter bottle snow globe Courtesy: one little project.com fill a small water bottle or plastic jar with water
and add 2-3 good handfuls of glitter, then top up with clear glue (like Elmers glue). Firmly glue the lid shut, so that it cannot be opened. Now let baby tip it backwards and forwards. When they start crawling they will love chasing it across the room!12. Scrunchy sound socksStuff a sock with crinkly wrapping paper or newspaper, and tie a knot in the
end. Baby can safely scrunch the sock and be rewarded with great sounds. This is a great way to upcycle those lost left socks, or the ones with holes in them your partner refuses to throw out!13. Scrunchy sensory stockingsThis is a variation on the idea above. Stuff an old stocking (you know the ones with ladders in them that sit at the bottom of your
```

drawer) with lots of different sensory items and tie the end closed with a knot. Interesting textures could be round rubber balls, chunky Duplo or Lego blocks, and scrunchy leaves. Add them all into the same stocking for your baby to explore.14. Plastic bottle lid bracelet rattle Punch a hole through the centre of several plastic bottle lids. The lids from milk bottles, or soda bottles, are perfect. Then string them together on a piece of elastic, or string, to form a bracelet. This makes a great rattle too, which is light and easy for baby to grasp on to.15. Homemade stacker cupsCollect plastic lids from various containers to make your own set of stacking cups. Hairspray, shaving foam, cooking oil, dairy whip, milk bottles and plastic soda bottles all have good size lids. Make sure you wash them well before use. This is definitely not a toy for younger children, play with supervision.16. Texture funMake great textured blocks by gluing different fabrics and materials onto wooden blocks. Exploring different textures is a great way for baby to begin developing their touch sense, one of the key development milestones. Think of texture when you select your fabrics. So corrugated cardboard, sheeps wool, faux fur, satin, even light sandpaper. You can often get offcut fabric from bulk bins for next to nothing.17. Click-click toysOld keyboards or calculators are great fun for babies to tap on, especially

as they are rewarded with the click click sound. Make sure there are no loose buttons or keys. This is another great toy for developing touch and dexterity.18. Laundry baskets (or large cardboard box weighted down with toys and books is a great way to help baby with cruising (walking around while leaning on furniture or being lead by the hand). It needs to be light enough so that it moves when baby pushes against. Dit, but not so light that it takes off from under them.20. Baby Plays with WaterIts as basic as it gets. Just enough water and bath toys should be placed on a baking sheet for him to splash in, and you should see the joy on his face. He is content to rest on his stomach at this time and moves objects a round on his own. He mought to be nearby, of course, or co

Easy baby blender. Diy baby toys 10 months. Soft toys to make for babies. Easy toys to make at home. Soft baby toy.
