Bitdefender endpoint security uninstall tool

The uninstall tool removes Bitdefender Endpoint Security Tools (BEST) from your Windows endpoints. Important: The uninstall tool always requires to reboot the machine. You can use the tool in cases such as: The current installation is corrupted. The endpoints have remnants from previous installations or uninstallations. You want to remove the security agent using a script from one or multiple machines. Using the uninstall tool Remove the security agent that is protected with an uninstall password as follows: Download the uninstall tool from Uninstall Tools for Business Products. Open Command Prompt with administrative rights. Navigate to the folder where you saved the uninstall tool. Run the following command: BEST_uninstallTool.exe /bdparams /password=your_plain_text_password Note: To remove BEST that is not protected with password, download the uninstall tool and run it with administrative rights. You can also remove the product by opening the Command Prompt with administrative privileges and running the executable file from there. When uninstalling the product you can use the following parameters: Parameter Functionality /bdparams This parameter passes arguments and is mandatory to use it with each of the parameters below. /password= The parameter allows you to enter the uninstall password. Command: BEST_uninstallTool.exe /bdparams /password=your_plain_text_password /log This parameter creates a log of the uninstall process in C:\Windows\Temp\uninstalltool Command for BEST with uninstall password: BEST_uninstallTool.exe /bdparams /password=your_plain_text_password /log Command for BEST without uninstall password: BEST_uninstallTool.exe /bdparams /log /bruteForce This parameter forcefully uninstalls the product, removing remnants and corrupted files from incomplete installations or uninstallations. Using this parameter: Does not bypass the uninstall password. Does not uninstall newer product versions than the uninstall tool version. Does not uninstall other Bitdefender products except BEST. Command for BEST with uninstall password: BEST_uninstallTool.exe /bdparams /password=your_plain_text_password/bruteForce Command for BEST without uninstall password: BEST_uninstallTool.exe /bdparams /bruteForce /passbase64= The parameter allows you to enter the uninstall password encoded in base64 UTF-8. You can use this parameter when your password contains restricted characters. Command: BEST_uninstallTool.exe /bdparams /passbase64=your_encoded_password © مطراحي و نوسعه ويب سورسيز This application is not listed in my apps, nor does it ship with an uninstaller. I can locate. The support site says to contact their support team, but the product is not listed in the drop down for support requests. Here's what I tried so far in order to get it to stop running, so I could safely delete the program from disk, but it didn't help: sudo ps aux | grep -i bitdefender for each bitdefender product listed: sudo launchctl remove reboot The application ran again after reboot. To cleanly uninstall MAV-BD Bitdefender Engine from a device - removing all traces of the product. MAV-BD must first be disabled for the device on the dashboard which will initiate the uninstaller, and once complete all traces of the product (files, folders or registry entries) must be removed from the device itself. How to cleanly uninstall MAV-BD Bitdefender Engine: Step 1- Dashboard Right-click on the device in the North-pane and choose Edit Device from the context menu (also available from the Server or Workstation drop-down or Edit menu). Select the Managed Antivirus section Change the Setting: to Off (before activating this change please check Disk Encryption Manager settings) Click OK to save changes and begin the MAV-BD - Bitdefender Engine uninstall process Wait for the device's Summary tab to show Managed Antivirus - Not Installed Step 2 - Local Computer Access the device locally where MAV-BD was uninstalled and remove the following files, folders and registry entries below as changes to the Registry are immediately applied with an automatic backup taking place. Open regedit.exe Make a backup of the Registry Monitoring Agent installed via Group Policy) BDInstall.log C:\Program Files All Managed Antivirus entries C:\Program Files\Common Files All Managed Antivirus entries C:\ProgramData C:\Documents and Settings\All Users\Application Data (XP & 2003) All ManagedAntivirus and Managed Antivirus entries %TEMP%\ BDInstall folder %WINDIR%\Temp BDInstall folder Local Drive Search for and remove trufos.sys if found Step 4 - Registry Important: in line with best practice we recommend making a backup copy of the Windows Registry before making any alterations, as changes to the Registry are immediately applied with an automatic backup taking place. Open regedit.exe Make a backup of the Registry Search through the Registry and remove any remaining entries for Bitdefenderand MAV-BD. As part of this removal process, please ensure that those entries associated with the product under the Uninstall key are deleted. For example, the MAV-BD Master Service key:HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall\{F88FE7C0-2B64-405B-9197-25F8BE135459}.js1 Step 5 - Run Bitdefender's MAV-BD Uninstall Tool Reboot device into Safe Mode with Networking Download and run Bitdefender's MAV-BD Uninstall Tool available here. Step 6 - Restart Computer Restart the computer once the MAV-BD Uninstall Tool has finished and choose Start Windows Normally if prompted. What do you want to do?
