I used to admire games like FPS shooter games on the console where they engaged in a battle with your teammates for victory. When I heard that Call of Duty is on the furniture it was excited to try it. Overall, I found the experience very exciting. Even if I'm playing on an old iPad mini 4 and I can't set the graphics to the highest graphics. I like very much. There are only two things to complain about by me. When it comes to a season ending, it seems to be as if there isn't much to do. Daily activities are always rotating at every time I open mobile cod on a new day, but they seem to be too easy and give such a small prize. I feel useless game of the game whenever these time shows up. I would also like to say that every time I play and ordinary games, it's as if I'm playing alone sometimes. There would have been a meeting with me and only Bot. It makes me uncomfortable to think that I'm playing with the bots and instead, without real people. Do something about this and I'm sorry if I pushed it harder in this situation. Thank you for bringing the Call of Duty to Mobile franchise. I like the new update there $\hat{A} \in$ knows many new things and ita s just like codmw but there $\hat{A} \in$ knows small problem, the loadout now it is a bit of confusion I prefer old ita s best it is no need to confuse and ita s even better , there $\hat{A} \in$ s even another thing that is unfair for those who got a new gun from a search that took days or hours to do and now it's free for all isna t than unfair. As cordite it was a good gun gives me t they have, but now I can play without even doing any of their research, but for those who did the search for the gun may not be right, cuz spent time on getting it but now ita s only 1 second and a boom has a gun, but game is good tho ... extra: I got the chopper from the research that brought me a week to get, but now it is usable for everyone, even for those who didn't do the quest I hope you change and change the thingy loadout cuz I love cod it $\hat{A} \in$ s funny and gives me t want to delete only be of unjust loadout confusion to players who do this only for the gun ... it is unfair in PLS mode change thx very tho this so annoying bug never compared with looting looks late and the use of weapons, after the delay from the melee only when I stop my race and going out of the vehicle, suddenly flying up and when it reaches the ground of what is not dead or Knockedout..please adjust it and I know that this Bug Happen ..I love this game a lot, but only bug questions makes many people easily get irritated and fade to play especially Newbie (even old timer get bored Narco has even said in youtube) they will compare other mobile guns games like pubg..i also play pubg but I love playing multiple codm than in pubg..your company is a multi billionaire, so because you don't fix the problem rather See codm money that resonate the ranch and every day? The player spent so much time and money for your game, but because I still had this old problem problem that happens until now? Finally, I'm sorry if I was rude but the truth is the truth ... I kindly ask you to ask you to the kids, taking it seriously for insects and some other problems . thanks for reading my interior heart of words ... Give 5 Star Codm if I saw an improvement on codm gameplay. The developer, private mobile garena, indicated that app's privacy practices may include data management as described below.
