9th International Symposium on Chert and Other Knappable Materials

Otis Crandell

Babeş-Bolyai University, Geology Department, Cluj-Napoca, Romania. Email: otis.crandell@ubbcluj.ro

Last summer, specialists in lithic studies from around the world met in north-eastern Romania for an archaeological symposium on various subjects related to knapped artefacts and knappable materials. Titled “Stories Written in Stone” the International Symposium on Chert and Other Knappable Materials took place from 20 to 24 August 2013 in the city of Iaşi. This event was hosted by the Arheoinvest archaeometry centre of the Alexandru Ion Cuza University and run in partnership with the Center for Obsidian and Lithic Studies at Meiji University, the International Association for Obsidian Studies, and the Society for Archaeological Sciences. Fifty three presenters and several additional participants attended the symposium in person, along with six volunteer assistants, and faculty and students from the History Department. Participants had the pleasure to listen to 46 talks and look through 35 posters. An interesting innovation of this symposium was the possibility to participate via specialised conferencing software. This made it possible for another twenty two people to present without having to leave the comfort of home, two of which gave presentations while doing field work.

A particularly interesting aspect of this symposium was the diversity of presentations and presenters. There were people from nineteen different countries, often presenting on research from even more countries. Researchers from countries in Europe, Asia, North and South America, and Africa presented their work on all time periods, ranging from the Palaeolithic to the 19th century. Presentations include topics such as mining, trade, use-wear, raw material characterisation, and lithotheques. Among the conference material was an abstracts volume and a field trip guide book. Further details about the symposium can be found on the symposium web site (<http://arheoinvestsymposium.uaic.ro/stone/>).

In addition to the scientific programme, there were diverse and entertaining social events, such as various museum visits (including a special exhibit about the history of stone tool usage in the region), dinners, and a traditional music and dance performance at the farewell party. The highlight of the social events was the excursion to the Prut River in Botoşani County. The first stop on the excursion was at the modern flint mine outside Miorcani. In addition to seeing one of the few modern flint mines still around, it was also an opportunity for regional researchers to collect some sample of a regional high quality material used throughout prehistory. After the mines, we visited the Palaeolithic sites of Mitoc and Ripiceni.

Farnham, UK

Abstract

This paper explores the benefits and challenges of using video blogging to support reflection and assessment in acting and performance training. A video platform called Acclaim was integrated into the university's virtual learning environment (Blackboard), enabling students to record and share their performances in an online setting. A key feature of the platform was the ability to add time-based comments on a video, making it possible for tutors and students to discuss and critique specific moments of each performance. Students were also required to record and upload regular video blogs during which they would reflect on their progress. At the end of the first year, a survey was designed to evaluate students' experiences of the video blogging activity. The findings indicate mixed results: while many students viewed video blogging as a useful learning activity, they also identified a number of challenges that hampered its effectiveness. From this study we conclude that while video blogging presents several notable advantages for the facilitation of performance-based courses, the technology needs to be carefully introduced as part of a broader instructional strategy to maximise the potential benefits for student learning and engagement.

Keywords: Learner generated video, Video blogging, Critical reflection, Acting and performance

Introduction

The generation of students now entering university have grown up in a world in which digital video is a widely used medium of communication and self-expression (Oblinger and Oblinger 2005). The combination of cheap, high-quality video recording equipment and video-sharing platforms such as YouTube have made user-generated video content a cornerstone of the social media revolution (Kearney and Shuck 2006). Higher Education has not been left untouched by the digital video phenomenon. A growing body of research has emerged around the use of video to extend learning online through instructional approaches such as delivering lectures (Choi and Johnson 2005; Zhang et al. 2006), supporting assessment (Yoo et al. 2009; Schwartz and Hartman 2014) and around more innovative practices such as "flipping the classroom" (Tucker 2012; Berrett 2012; Herreid and Schiller 2013; Bishop and Verleger 2013). However, despite the ease with which comments can be added to videos on platforms

Furthermore, the CPEC will also reduce the chances of conflict between multiple states. 1. Expansion and reconstruction of existing Line ML-1: Under this project, the ML-1 line will be double which is Karachi to Peshawar railway line. Berthing areas are where ships are stopped and loading and unloading of goods are done. In addition to this, there are many global prospects for CPEC as well. Few of the funds are on Concessionary loans, some are on interest-free loans, whereas, some funds generated by the joint venture of Chinese and Pakistani firms. The shipment will enter into Pakistan through Kashgar which is a Chinese province right next to Gilgit-Baltistan.

Last school holidays ,Azlan decided to go for a picnic with his friends at a waterfall. They went there by bicycles. They were very excited because it was their first time to go there without their parents.

Out of the blue ,Azlan noticed a girl fell into the water and was about to drown. She shouted for help loudly. Without further delay ,Azlan who is good at swimming , jumped into the river and quickly pulled the poor girl to the riverbank for safety.

It was a brave and quick thinking action. The girl's parents were pleased and thanked Azlan for his brave act. They praised him for saving their daughter's life. He felt as proud as a peacock because he had done a good deed. His friends came and praised him too. Azlan did not want to blow his own trumpet as he is very good at swimming and had a medal for helping people. He just kept quiet and smiled to his friends.

Azlan was as happy as a king as he had done a good deed. He always believes that one good deed deserves another. It was an unforgettable day for Azlan.

In a short span of time, China has become economically strong. China Pakistan Economic Corridor is a vision oriented project. It is estimated that the GDP of Pakistan will boost up to 7.5%. Since the bipolarity in the world is finished, America was the sole superpower in the world. RAILWAYS: The railway infrastructure projects under CPEC are the following. In 2018, China alone exported \$2.49 trillion in goods while it imported \$2.13 trillion. The manual system will be replaced with the computer-based signaling and control system. 3. Construction of Breakwaters: Breakwaters are constructed on the coast. In order to trade with Europ and the rest of the world, the ships need to pass Bab-al-Mandeb which is located between Yemen and the African Continent. With the CPEC project, China will least intervene in those areas. You can download the paper by clicking the button above. Alhamdulillah. The other railway projects that include are given below the following projects are not yet stated except one which is almost complete Karachi Circular Railway Project for improving public transportation. Almost 80% of the middle east energy imports pass through this strait. As with the help of CPEC, Pakistan and China will be able to boost its economy. On the other hand, there are certain security risks and challenges for Pakistan as well. In November, 2014 the government of china proclaimed the intention to finance Chinese companies for the investment of 45 billion \$ for energy and infrastructure in Pakistan. Trade is one of the main sources of earning in the world. China is already a threat to the United States. 6. Pak China Friendship Hospital: Under this project, a Hospital will be built. In addition to this, several jobs will be created by CPEC. Moreover, there are American Army bases on the South China Sea and the Indian Ocean. In addition to this, the distance is quite long, it took over a month to transport Chinese Oil in different countries. They can get to the Chinese market easily. The estimated cost of this project was 37.4 US Million Dollars and it has been completed in 2018. The major threat to CPEC is political instability in Pakistan. This project has been completed in November 2019. Under this project, a 2-lane highway from Khuzdar to Basima will be constructed the total length of this road would be 110km and it costs 19.19 Billion Rupee. As both China and Russia is a communist state, furthermore, Russians always work against Americans. The United States of America try to maintain its hegemony on the Asian Continent. In the coming section, we will discuss all regarding CPEC and with the help of this article, you will be able to write a quality CPEC Essay. The roadway from Havelian to Thakot Lahore Metro Orange Line Pakistan-China Fiber optic project. The finances are provided on different terms and conditions. This money will be utilized on the project. For Pakistan different projects would be started that will help in building innovative infrastructure the projects that will be started in Gwadar under CPEC are followings: 1. Gwadar East-Bay Expressway: Under this project, a route will be built and it will connect the Gwadar Port & its Free Zone with the express. In addition to this, Pakistan will become a stronger country and will be renowned in the international world. 5. Development of Free Zone: This Free Zone will be the backup port industry of Gwadar port and it includes all the projects like building roads, warehouses, water facility, gas and power facility, and so on. India is also not an ally of China. The containers can reach to Gwadar port through railway and roadways. 8. Gwadar Smart Port City Master Plan: This 4 Million US Dollar project is for building a small city near Gwadar. In addition to this, the distance will also be shortened and the consignments can be reached to its location within 2 days. 2. Havelian Dry port (450 M. The estimated cost of this project is 123 Million US dollars. The vision behind this project is to improve the life standard of Pakistani and Chinese people. Not only that it also includes the construction of medical colleges, laboratories, and supply of the latest medical machinery. The estimated cost of this project is 230 Million US Dollars and this project has been started on 31 October 2019 after the approval of the design and work plan. The stronger the economy, it will be easier for China to maintain its hegemony. Furthermore, the following projects lie under interest-free loans East Bay Expressway project Breakwaters in Gwadar The coal power plant in Gwadar Dredge berths in Gwadar harbor The 300-bed hospital in Gwadar Joint ventures Chinese and Pakistani firms will construct an energy sector project worth \$15.5 billion. Source: Belt & Road News Importance of CPEC for Pakistan: CPEC is very important for Pakistan. ENERGY SECTOR PROJECTS: Electricity is always the problem in Pakistan to overcome this problem the energy sector projects are signed. With the help of CPEC, the economy of Pakistan will get strengthens. They have border conflicts and both of these countries want to maintain their hegemonies in the Asian continent. China has helped Pakistan to develop the Gwadar port, which is a deep seaport. No doubts that economic corridor will open new horizons for progress and developments in the both countries. 3. Khuzdar-Basima Road N-30: This project is started in Balochistan. There are many bottlenecks on that route which include Strait of Malacca, Strait of Hormuz, and Bab-ul-Mandeb. This Airport will be capable of handling big airplanes like ATR 72, Airbus, (A-300), Boeing (B-737), and Boeing (B-747). India doesn't want this to happens. There are almost 22 energy sector projects that include coal-fired Power Plants, Hydropower Plants, and Wind Power Plants. NOTE: The following information is gathered from the official website of CPEC. China is one of the biggest importers of oil in the world. 2. Peshawar-Karachi Motorway (Multan-Sukkur Section): The next project is Peshawar to Karachi motorway (Multan-Sukkur Section) under this project Multan to Sukkur Motorway is constructed. It is surmised that it will create some 700,000 n innovative and dynamic jobs promising prosperity and decrease in unemployment in Pakistan. Source: Gawadar News With the help of CPEC, the trade route is shortened. This technology is also used by Cuba, Macao, and Hong Kong. The cost of this project is 10 Million US dollars and Groundbreaking was held in December 2019. It takes 12,500 km for a ship to travel and it also takes more than 30 days. China is already an energy scarce country due to its population. As mentioned earlier, China needs to pass through the Strait of Malacca to do trade with other countries. Through this, they will get access to the seaport and they can also do trade through CPEC. Loading Preview Sorry, preview is currently unavailable. Due to the policy of containment, the United States of America doesn't support CPEC. Havelian railway station is almost 680 km away from the China border which is Khunjab. 2. New Gwadar International Airport: Under CPEC a new Gwadar International Airport will be built. The governments of both the countries will work to promote bilateral relations, agriculture system and to alleviate poverty. This project is yet to start. If it so, it will be highly rewarding activity for the local people. There are certain challenges for Pakistan as well, however, if we tackle all of the challenges, we can surely get benefit from this multibillion-dollar project. That is one of the main reasons for the construction of CPEC. The CPEC includes projects related to Roadway, Railway, Energy, Agriculture, and many more. The feasibility of the project has been made but there is no update regarding the start of this project. The United States has an old policy to contain the communist specifically China. The Dry port will be made at Havelian so that cargo from China first unloaded at Havelian and then this cargo will be uploaded on cargo train which will take the cargo to the Gwadar. It is said that Punjab is getting lion s' share as compared to other three provinces. Follow us on our Youtube Mushwarah Channel Under this project, they get the technology that is used by the US, Japan, China, and Europe. 4. Dredging of berthing areas & channels: Dredging is a process through which a bed of water is cleared by removing mud, weeds, and any unnecessary trash. With the help of CPEC, oil can easily be transported to China in less time. CPEC can be beneficial for the whole world, especially Pakistan. 5. KKH Thakot-Raikot N35: The last project of the road is to complete the remaining portion of Thakot to Raikot 136Km road in KPK. No doubt the CPEC project will also make the image and economy of Pakistan better. It is an initiative by China and the extension of the BRI- Belt and Road Initiative. It aims at promotion of education sector and to enhance tourism between the two countries. The same countries were also responsible for starting terrorist attacks in Pakistan. These structures protect the place form the longshore drift and weather. Source: Sea Trade Maritime American Concern The American concern regarding CPEC is not soo good. Source: BW Business World To the aforementioned concerns, China focuses on the construction of CPEC. Hazara Motorway Upgradation of N70 National Highway Upgradation of N50 National Highway M4 motorway between Faisalabad and Multan Political & Economical grounds of CPEC Essay China is an emerging superpower. This is the total of 118KM highway project that includes the construction of 06 Lane Access Controlled motorway up to 39 km and construction of 79 km of Class-II Highway. This project was started for Gilgit Baltistan, Khyber Pakhtunkhwa, and Punjab. The government of Pakistan will purchase the electricity from those firms at negotiated prices. It is a disputed region, Strait of Malacca consist of the disputed Spratly Islands. Moreover, their orders can also reach in less time. Construction work will be started soon. With the help of the CPEC project, Pakistan can get a lot of benefits that we will discuss later but this project is also equally important for china as they will get access to the sea through Pakistan. A. ROADS: The following are the road projects that will be conducted under CPEC projects. The following are the projects that fall under the assistance of the Asian Development Bank. The estimated cost of this project is 8,172 US Million Dollars. The major portion of the European trade consists of Chinese products. The estimated cost of this project is 4 Million US dollars. They believe that CPEC is doing the same as The East India Company did. Source: NewsIn.Asia What is CPEC As mentioned earlier that CPEC is a multibillion-dollar project which is initiated by China. Furthermore, the Chinese hegemony will also increase with this project. There were times when people afraid to go out but now it's safe and sound just because of our Pak armed forces. 4. Upgradation of D.I.Khan (Yark) - ZhoB, N-50 Phase: This project is to upgrade the existing 2 lanes to 4 lanes that can be further upgraded to 6 lanes in the future. Security Challenges for CPEC with respect to Pakistan: Pakistan struggled too much to overcome the terrorist attacks in different cities. It will improve the life standard of the people of Pakistan. These three chokepoints have a lot of issues in them. From the Indian ocean, the ships reach to Strait of Hormuz to trade with the middle eastern portion of the world. Twenty-Foot Equivalent Units) This Havelian Dry port will be constructed to meet the demand of future freight traffic through the South China Sea. Furthermore, Russia is also keen to invest in the energy sector of CPEC. Kindly visit here for more details Funding for CPEC Essay Well, the total estimated cost of this project is 168 Million US Dollar and the expected date of completion is October 2020. We have seen that anti-western countries are focusing more on China and Pakistan. A better medical and managerial education will be provided. In the coming section, we will also compare the routes of China's trading with the world. It is necessary for the economic development and project accomplishment that a government should accomplish its tenure very successfully. This economic corridor will attract the foreign investors who will invest money in many different projects in Pakistan. It will be helpful for trading goods by air. As Chinese trade route will change, which will decrease the interference. The table below will tell you the name and energy that we get under these projects. The details of these projects are given below. The estimated cost of this project 1,315 US Million Dollar and most of the project is completed. The load shading that is the main problem of Pakistan will also be overcome with the help of energy projects under CPEC. 7. Pak-China Technical and Vocational Institute at Gwadar: Under this project, technical and vocational institutes will be built and the management team of Gwadar port will enhance and can learn new skills. The projects that are started under the CPEC will make the Pakistan economy better. From the past few years, China's economy was still. The doubling of a line increases the speed of the train from 110km/hr to 160km/hr. Source: Pakistan Observer Conclusion We can finally assert that CPEC is a game-changer for Pakistan and China. It promises new horizons of progress. So, to stop it, they trigger terrorism in Pakistan. BA English essay Read Multi topic and other Essays CPEC-China Pakistan Economic Corridor CPEC: China Pakistan Economic Corridor is the collection of many economic ties between two eternal friendly countries Pakistan and China aiming to enhance bilateral economic activities between the two countries. Some of our local journalists also criticized CPEC. Therefore it is a very sensitive area. Which was already under construction and one medical block out of six and 20% of the residential block is already completed. Criticism of CPEC Essay Some of the countries like the United States and India have criticized this project. They know well that if CPEC goes successful, Pakistan will become an Asian tiger. Medical schools with the latest equipment, Roads, railways, and cities all these things that will be done with our beloved neighbor China not only provide the jobs for the local but also improve the overall image of Pakistan. It includes Roadway projects, Railway projects, Energy sector projects, and other areas of cooperation. Indian Concern India is a threat to Pakistan since its independence. APC was called and a luncheon was given in the honour of Chinese Prime Minister Li Keqiang at the Awan-e- Sadr in May 2013. In February 2014 under Nawaz Sharif government, President Mamnoon Hussain visited China to discuss the plans for an economic corridor in Pakistan. With the help of CPEC, the distance will be decreased to 2000 km and it can be accomplished within 2 to 3 days. Firstly it was proposed by that time Pakistan president General Pervez Musharraf,but it was not implemented due to political instability in Pakistan. Greater Peshawar Region Mass Transit Orange Line Train Lahore for public transportation almost completed. The ship needs to be travel over 12,500 kilometers. With the help of CPEC, China will surpass the few of the choke points. INFRASTRUCTURE PROJECTS in CPEC ESSAY: CPEC infrastructure projects are divided into two parts in the first part it has constructions of roads and on other the construction of the rail sector. The detail of each project is given at Sr. no PROJECTS ENERGY (MW) 1 Sahiwal 2x660MW Coal-fired Power Plant, Punjab 1320 2 2x660MW Coal-fired Power Plants at Port Qasim Karachi 1320 3 HUBCO Coal Power Project, Hub Balochistan
