Many people say that Windows 8 (or 8.1) is not a Windows 7 correction, but I don't think so. The Metro user interface is probably more difficult to use than the traditional menu, so you will have to spend hours trying to get everything you need. However, Windows 8 offers excellent performance compared to previous versions of Windows. The most easily noticeable boot time is shortened. If you have a touch computer, also use all the benefits of Windows 8/8.1 or Windows 10 hardware. In today's post, I will show you two ways to activate Windows 8 or 8.1 without using any software. If you really want to know how it works, try the first way (manual method). Alternatively, you can use the second method (package file) if you need to save time. The following are detailed instructions on how to activate all versions of Windows 8.1 and 8. Here is my Windows 8 activation status in the control panel. Method 1: Video Sample Guide. S Windows 8/8.1km Customer Settings Key List.W8 Core: BN3D2-R7TKB-3YIPBD-8DRP2-27GG4W8 One Language: 2WN2H-EGCR-KFX6K-CD6TF-84YXQWM-CD6TF-84YXQWM-94YTFM 1 Profession -62K67-RG RQJ-JFFXW 1.2. The action. Run the command line in the administrator mode. PressSearch CMD and then open the command line as an administrator. Open CMD with administrator rights 1.3. Step: Use the SLMGR /PK Your KEY command to install a licensed key. YOUR KEY is the activation key that you received earlier. Note. You must press the [Enter] key to execute commands. Perform the command SLMGR /PK 1.4. Step: Use the command "SLMGR /SKMS KMS8.msguides.com" to connect to my KMS server. KMS8 is one of the servers that I control. Follow the SLMGR SKMS 1.5 command. Step: Activate Windows using the SLMGR /ATO command. After this team is performed, the activation process begins. Follow the SLMGR ATO command. If an error is displayed 0xc004F074, this means that your Internet connection is unstable or the server is busy. Make sure your device will be on the Internet, and try the ATO command again until you get success. Method 2: Stapeld file is no longer recommended from the new Microsoft update. 2.1. Step: copy the next code into a new text document. @Echo OFF Name Activate Windows 8 / Windows 8.1 All versions for free - msguides.com & cls & echo ===== = & echo.
