Download mac os x 10.6 snow leopard for virtualbox

Install DVD for Apple's Snow Leopard operating system.Version 10.6Z2691-6558-A Reviewer: Ken Pickersgill - favorite - March 29, 2021 Subject: Not a clean install disc. It doesn't have an installation file on it but you may be able to upgrade with it. Reviewer: TimClyn - favoritefavoritefavoritefavoritefavorite - March 18, 2021 Subject: Using this software This is an ISO image of Snow Leopard for Mac You either need to burn it as an ISO image onto a double layer DVD or Create a Bootable USB Stick from it - both easy operations Those saying it is just a windows file clearly do not understand how installation media works I have created a DVD from it and installed it - it works Reviewer: Poet1803 - - March 10, 2021 Subject: How to use this Snow Leopard Install image I am downloading this file but despite extensive research on the web, I am still unsure how to make a usable installation disk! Do I simply copy this to an SD card? Or do I have to burn this image to a DVD and use that route? I know a bit about these matters, but this problem - how to make a usable installation 'disk' - is very frustrating! Can anyone offer me some enlightenment? Reviewer: ashton3214567890 - favoritefavoritefavoritefavoritefavorite - March 3, 2021 Subject: To everyone who says there are only Windows drivers. No. Basically, older Mac OS X CD's have two main partitions. One with the main install (HFS+) and another one with Boot Camp drivers for Windows (FAT32 or just a standard CD format). If you look in the ISO or DMG in the archive.org explorer, it can't read HFS+, only the standard, FAT32 or CD format. That's why it seems like there are only Windows drivers. Download it and mount it in a macOS installation, and you will see the actual Install disc, or try to boot from it. So, don't believe anyone who says there are only Windows drivers, they are completely incorrect. Reviewer: ibm360 - favorite - February 26, 2021 Subject: Not an MaC OS installation CD This is not a Mac OS installation CD. This is a Windows CD that make you install some programs to connect Windows to Mac. There's nothing else. Reviewer: EpicB Movies For The Archives - favoritefavoritefavoritefavoritefavorite - January 24, 2021 Subject: Do You Have A Tutorial Of How To Install MacOS Snow Leopard On VirtualBox? Do You Think You Have A VirtualBox MacOS Installation Tutorial Of This, Thanks. Reviewer: BoxOfSnoo - favoritefavoritefavoritefavoritefavorite - January 15, 2021 Subject: Yes it is right, it's a weird disc though I tried to rip my own DVD, and it looks the same as this. There's one partition that only Windows will see, ISO9660 with Boot Camp support on it. There's much more though, that will only be visible on a Mac. Reviewer: Zux128 - favoritefavoritefavoritefavoritefavorite - January 12, 2021 Subject: This worked! I downloaded iBoot from tonymacx86 (It's a hackintosh tool for booting into Mac OS X Install Discs) for my Virtualbox machine and guess what? It worked! I can finally experience Snow Leopard. Reviewer: mac os x leopard - favoritefavoritefavoritefavoritefavorite - January 3, 2021 Subject: i need leopard on virtualbox it says no bootable medium device found system halted every time i put that iso in the virtual disc drive Reviewer: Don Rizzelli - favoritefavoritefavoritefavoritefavorite - November 29, 2020 Subject: Full disc This is indeed the entire retail Snow Leopard disc - people saying it only includes drivers must be mounting the ISO9660 partition, which occupies only a small part of the disc and does indeed contain Boot Camp drivers! Reviewer: dudewitthe101 - favoritefavoritefavoritefavorite - November 20, 2020 Subject: This works fine! i own a iMac 8,1 (Early 2008) and this DVD brung me back memories! Reviewer: DeathkidVR - - November 16, 2020 Subject: Get a better mouse Hey @patbarron you downloaded the jpeg and probably misclicked. Get a better mouse dumbass Reviewer: patbarron - favorite - August 27, 2020 Subject: This is somewhat useless... I was happy to find this because I have misplaced my actual Snow Leopard installation DVD somewhere... But I downloaded this, only to find that it is not, in fact, an image of the actual Snow Leopard installation DVD. Other reivewers have commented on the contents - but for the purpose I was hoping to use it for - creating a DVD to boot a Mac from and install Snow Leopard, like I used to be able to do with my now-misplaced original DVD, this performs no useful function for me. Reviewer: laalato - favoritefavoritefavoritefavoritefavorite - July 28, 2020 Subject: Saved My Life !! Thanks for this amazing DVD. I was given a mid-2007 iMac 7,1, without an operating system on it in 2020. I tried many approaches online, but finally here saves me. I burned the DVD to a USB thumb drive and boot it alive. I donate 5 dollars. Thank you the uploader again. Reviewer: gimchess - favoritefavoritefavoritefavoritefavorite - July 19, 2020 Subject: Works great. Just keep in mind that the download is an (iso) and you will obviously need to use some software or the terminal to make a bootable USB. Remember to install "Rosetta" if you don't plan to move up to later macOS versions. It will give you ability to run PowerPc apps. Reviewer: brianwmay - favoritefavoritefavoritefavoritefavorite - June 12, 2020 Subject: MASSIVE THANK YOU Snow Leopard is the gateway to update your Mac to a newer operating system via Apple Purchases. Having seen the negative reviews, I thought I'd give it a go and see what happens . . . nothing to lose. Well, imagine my surprise when I copied the iso to a USB stick, stuck it into my 2008 MacBook Pro and it worked beautifully. So despite the negative comments, this has been a 100% success. Thank you. Reviewer: SoftwareAddict2008 - - April 22, 2020 Subject: COOL You can use virtualbox on windows you have to make the operating system name windows 7 Reviewer: Zuick - favorite - March 17, 2020 Subject: SOME CONFUSION HERE In fact: The Torrent leads to a collection of Boot Camp drivers and associated bullcrap on the main ISO. Not cool. someone wasted my bandwidth and time here and I'm hella upset. I'm going to try the direct dl and see what I get. Maybe what I'm looking for OR maybe the same thang..... Reviewer: picard2365 - favoritefavoritefavorite - February 22, 2020 Subject: vmware you need to use VMware to run on windows Reviewer: sANDWICHBAGz - favoritefavoritefavoritefavoritefavorite - November 28, 2019 Subject: Works! Works on MacBook 4,1 as upgrade or fresh install DVD. Reviewer: Jafu_Oleanders - favoritefavoritefavoritefavoritefavorite - October 26, 2019 Subject: Worked, Thank You! Thank you so very much. (Obviously something was wrong with my installer disc) I used this ISO to make a bootable USB with Disk Utility, and then boot it to repair my HDD, worked wonderfully! Reviewer: MrPaperSonic - favoritefavoritefavoritefavorite - October 7, 2019 Subject: Good source for this oh WOW, i can't believe how stupid some of these reviews are. they're trying to open this on windows, even though this SPECIFICALLY says "Mac OS X". the iso works fine. you just can't view the files on windows. Reviewer: Daggintosh - favoritefavoritefavoritefavoritefavorite - September 8, 2019 Subject: Works great This iso works fine. Don't believe the below reviews, this DVD is meant for Macintosh systems and cannot be read from a system running Windows, it doesn't work for them due to the installer's file system being HFS+, a file system that Windows cannot understand. Reviewer: webJazman - - August 29, 2019 Subject: doesn't work What is this file? I've downloaded ISO, but it either it doesn't work or i'm doing something wrong. According to description about iso i should be able to make an installer from it. But it doesn't work. Reviewer: jrronimo - favorite - July 9, 2019 Subject: This is not Mac OS X Snow Leopard This is just Boot Camp drivers, presumably for Snow Leopard. This iso is good to have, but labelled incorrectly. Reviewer: fmylife - favorite - June 18, 2019 Subject: no os Reviewer: Meckie - favorite - February 17, 2018 Subject: Empty Image This Lion Install iso-file contains: - 760.080.920 Bytes for optional installer packages - 81.456.497 Bytes for Descriptions - an installer.app with 4.297.782 Byte NOTHING ELSE! No shared support, no installESD.dmg, OSinstall.mpkg NOTHING! Where the 7,77GB download size came from is a brainteaser of outerspace levels to me! Not worth the time, as I can see!
