English in common 1 pdf download

DevCan is a Microsoft Windows application and can only be used on a Mac in conjunction with a Windows emulator. Before downloading DevCan version 6.7.9, you must read and sign the Terms of Use Agreement below and complete the registration form. After completing the form you will receive an e-mail with a link to the software download. The download link will expire after 24 hours. If your link has expired, request a new one using the Already Registered? form. Thank you for your interest in using the DevCan statistical software and associated databases, used to compute (using a lifetable format) the probability of being diagnosed or dying of cancer from birth or conditional on a certain age. More information about DevCan can be found at . Please review the following terms carefully. "Provider": the National Cancer Institute"Recipient": the party who receives software materials from the Provider under this agreement"Software": an interactive GUI-based version of DevCan, a statistical software program developed by IMS, Inc. under contract for the NCIThe Provider and Recipient agree as follows:The Recipient agrees to not attempt to reverse engineer the Software. Recipient agrees to comply with all Federal regulations applicable to research projects and handling of research materials. Software will not be used by Recipient as an agent, device, or instrument of treatment or intervention in research with human subjects where such use would require the approval of an Institutional Review Board. The Recipient agrees to not use the Software for diagnostic purposes in human subjects. If Recipient desires to sell its own commercial software that incorporates the Software or use Software for commercial purposes or applications (including consulting), Recipient will contact the NCI Technology Transfer Center (attention: Technology Transfer Manager for the NCI Division of Cancer Control and Population Sciences) at ncitechtransfer@mail.nih.gov. Title in the Software shall remain with the Provider. It is understood that nothing herein shall be deemed to constitute, by implication or otherwise, the grant to either Party by the other of any license or other rights under any patent, patent application or other intellectual property right or interest. Provider reserves the right to distribute Software to others and to use it for Provider's own purposes. Recipient agrees that any of its publications or presentations utilizing this Software will include appropriate acknowledgement of Provider's contribution of the Software and will include the citation found at: . The Provider and Recipient each shall retain, subject to applicable laws, title to any patent, copyright, trademark, or other intellectual property of their respective employees developed or created using the Software. Neither Provider nor Recipient promise rights in advance for inventions developed under this Agreement. If the Recipient creates an invention containing the Software ("Recipient Invention") and wishes to patent the Recipient Invention, Recipient agrees to notify the Provider of the Recipient Invention prior to seeking patent protection and to work in good faith with the Provider to determine the inventive contributions of the Recipient and Provider. In the event the Recipient wishes to distribute a Recipient Invention to third parties, the Recipient will ensure that the third party is advised of the presence of the Software and of the Provider's rights therein.Software is supplied AS IS, without any accompanying services or improvements from Provider. SOFTWARE IS SUPPLIED TO RECIPIENT WITH NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Provider makes no representations that the use of Software will not infringe any patent or proprietary rights of third parties. Provider does not endorse the results of any analyses derived from the software's use, and the Recipient agrees not to claim endorsement of such results and analyses by the Provider or the United States Government. Recipient agrees not to describe statistical calculations conducted in the absence of DevCan as if they had been calculated by DevCan.Recipient represents and warrants that the Official accepting this Agreement is authorized to do so. If you have already registered but need another link to download the software, enter your e-mail address below. Image: Liquor.com / Tim Nusog Bulldog gin is an assertive London dry gin with a robust juniper profile that stands up well in cocktails. It's that assertiveness that makes it play well in this autumnal-themed cocktail, where it's married with lemon, maple syrup and fresh pear. The Modern English comes from Michael Waterhouse, a longtime New York City bartender and bar consultant. The drink has a unique approach to its construction—a gin sour like a Gimlet flavored with pear is by no means unheard of, but generally that means fresh squeezed lemon juice, simple syrup and some kind of pear liqueur or pear syrup. Instead, Waterhouse uses lemon wedges, maple syrup and a pear slice, all muddled together with the Bulldog gin. Thanks to global markets and imported goods, you can make this drink at anytime of the year. However, it's going to be best in late summer into early fall, when local pears are at their peak season. The fun thing about using fresh pear rather than a liqueur or even a syrup is that you can play with your favorites to see which go best in the drink. Try mixing it up, using something like an Anjou, Bartlett or Bosc and seeing what best suits your fancy. Likewise, feel free to swap out the Bulldog Gin for something that works better for you, or whatever gin you have on hand. Something lighter and more floral like Hendrick's or something more subtle like Plymouth will make for a drastically different final product than Bulldog. While a cinnamon stick is called for a garnish, it won't affect the flavor of the drink too much unless you leave it in the glass for an extended time. Feel free to omit it if desired. 1/4 fresh pear, peeled, seeded and cubed 2 lemon wedges 1/2 ounces maple syrup 2 1/2 ounces Bulldog gin Garnish: cinnamon stick (optional) In a shaker, muddle all ingredients except the gin. Add the gin and fill with ice, and shake until well-chilled. Double-strain into a coupe glass. Garnish with a cinnamon stick. Rate This Recipe I don't like this at all. It's not the worst. Sure, this will do. I'm a fan—would recommend. Amazing! I love it! Thanks for your rating! Photo Courtesy: Future Publishing/Getty Images If you have a new phone, tablet or computer, you're probably looking to download some new apps to make the most of your new technology. Short for "application," apps let you do everything from listening to music to syncing your phone to your car to playing games. With so many apps to choose from, however, it can be a bit daunting if you don't know how to download them. Fortunately, downloading apps can be quick, simple and easy regardless of the kind of technology you're using. Read on to learn about how and where to download apps. When you download a file on the net, whether from a store or elsewhere, a file hosted on an online server is copied onto your computer. If you've ever been online, either on a phone or computer, you've likely already downloaded files on many occasions. Apps are no different — they're just specific kinds of files you download from the internet. Photo Courtesy: Scott Barbour/Getty Images Apps are typically set up as executable (.exe) files, although apps meant for Apple devices often come as either APP (.app) or DMG (.dmg) files. Sometimes (especially when it's meant for computers), an app is compressed into a ZIP file (.zip or .zipx) to save space. To do this, you may need another program, such as WinZip or 7-Zip, to open it, although you may also be able to open it by left- or right-clicking if your device came with the ability to open ZIP files. In many cases, however, downloading an app is as simple as clicking a button on an app's page. As long as there's enough space left on your device, the app will likely be ready for use once it's done downloading. Android is an operating system used for phones, tablets and more. Odds are that if your phone isn't an iPhone, it's probably an Android device — brands include Samsung, Huawei, LG, Motorola, ZTE and many more. To download apps for an Android device, you can either visit the Android website or use the Google Play app. (It's often pre-installed on phones and tablets, so you may already have it.) Be aware that you'll likely be prompted to sign in with your Google account or create one if you haven't already. Photo Courtesy: SOPA Images/Getty Images Open the Google Play store on your device and then search for the specific name of the app or any broader category that might interest you. Click on the app result to learn more about it. If the app is free, it should begin to download; if not, you'll be prompted to pay for it. Either way, once the file is downloaded, it's good to go. Microsoft hosts apps on its website, which you can access via any device with a web browser. You can use the site to download apps for tablets, computers, phones, Xbox consoles, virtual reality sets and more, so it's important to check the system requirements on each app's page to ensure that the app is compatible with your device. Photo Courtesy: Kim Kulish/Getty Images Select whichever free or paid app you're interested in to see a brief description of the app. If you choose a paid app, you'll be prompted to enter your credit card information or a gift card to complete your order. The Apple App Store hosts apps designed for iPhones, iPads and other Apple devices. As with Google Play, it's often pre-installed on phones. Like other app stores, it lets you filter apps by category, including featured apps, newest apps, popular apps, themed categories and more. Choose the app you want and follow the onscreen directions to download it to your device. You'll need to log in or create an account complete the purchase.
