This brings back many memories. I used to have a tab thing, not like an apple or samsung, it was old and red and it had things poking out the back, i played this game for hours. 5 stars for bringing back childhood! always loved the game over how simple it is, yet how it is a utterly great time killer. To be honest, even if it was released in 2013, i still find it fun: it will never ever get old, maybe to other people though. The game was always entertaining, not to me anymore., but its a great game for to kill some time during quarantine to be honest. I rate this game a 5, it is amazing and fun if you are into plain and normal themed looking games that are simple and fun to kill time easily.IIRC I first installed this game back when it was an Editor's choice. It is one of those games which is simple to get the hang of but hard to master. It's ideal if you have five minutes to kill while waiting for a ride or to take a break from more demanding apps. Doodle Jump is simple yet inventive and aesthetically appealing and it is low enough on resources to run well on a budget phone. You won't be able to return to the places you've already traveled, thus your only goal will be to ascend to the highest peak. At the same time, achieving this aim is difficult since obstacles and foes keep popping up to stop you and cause you to fail. You only need to show the character's leap direction, therefore this game doesn't involve a lot of control. You should aim to take advantage of the steps to move to the next place. Of course, you may also press the screen to assault the adversary. Thank you very much buddy for visiting my site. Please, don't forget to visit again ApkDownloadHunt Site.
