MARC URBANO, PATRICK M. HOEY INGO BARENSCHEE While only a few lucky bastards will ever get to experience a Bugatti Veyron, the radio-controlled (RC), Traxxas XO-1 offers a taste of its high-speed insanity for about half the price of the Veyron's ignition key. A longtime maker of such cars, Traxxas claims its all-wheel-drive XO-1 is the world's fastest ready-to-run, electric RC supercar. It says the XO-1 can hit 60 mph in 2.3 seconds and exceed 100 mph. We figured we should see about that. Such super-fast models traditionally require detailed assembly and separate powertrains and electronics. The \$1100 XO-1 is complete out of the box, including a Traxxas/Castle brushless-electric motor called the Big Block. It generates 3.5 horsepower and can spin to 40,000 rpm. At only 13.2 pounds (with batteries and our 0.6-pound DriftBox test gear tucked under the bodywork), the XO-1 carries just 3.8 pounds per pony versus 4.5 for the 1001-hp Bugatti. To ward off range anxiety, our test example sported a pair of upgraded 0.09-kWh lithium-polymer batteries (\$160 each, plus \$10 for the mounting kit) in place of the standard 0.06-kWh packs. Replenishing the batteries takes two hours with a fast charger (\$130); despite the upgrade, we managed only 20 minutes or so between recharges. Both gearing and an electronic governor initially limit the XO-1 to 50 mph. a larger pinion gear for the motor is included to enable higher speeds. you can disable the electronic limiter through a Traxxas link app running on an iPhone or an iPod touch, which docks with the included pistol-grip controller and displays real-time telemetry. MARC URBANO, PATRICK M. HOEY Traxxas says the XO-1 is for skilled experts with exceptional hand-eye coordination. We quickly learned that maxing it out is about as easy as going 250 mph on a public highway. While juggling mice. The car needs fully charged batteries and most of its 1376-foot radio range to reach triple digits, at which point it's a mere speck hurtling toward the horizon. It's surprisingly stable on pristine tarmac but easily upset by abrupt steering inputs and the undulating surfaces of the real world. Managing wheelspin and torque steer, we recorded a 3.3-second run to 60 mph and a quarter-mile sprint of 11.7 at 101 mph. The tacky surface of a drag strip likely would have produced better results. The XO-1's prodigious power impedes precise handling. Throttle inputs induce behaviors ranging from snap oversteer to plowing understeer. The motor handles braking duties as well, and panic stops can easily turn into long skids. At more than two feet long and nearly a foot wide, the 1/7-scale XO-1 is hardly a stocking stuffer. Its aluminum chassis has plastic subframes at both ends, and the multilink suspensions and coil-over shocks are adjustable. The flat-bottom chassis has a functional rear diffuser and a NACA duct to cool the motor, and a large front splitter to quell high-speed nervousness. Like the Veyron, the XO-1 is an expensive, high-tech conversation starter offering performance nearly impossible to exploit without access to a private runway. Valets won't find it as impressive as a full-size exotic, but it's a lot easier to repair if its abilities exceed yours. This content is created and maintained by a third party, and imported onto this page to help users provide their email addresses. You may be able to find more information about this and similar content at piano.io German French Spanish All products listed as "in stock" are in our warehouse and ready to be shipped within the next day. Exceptions to this are pre-orders and possible, but unlikely, errors in stock numbers. All products include the Finnish VAT (24 %). Prices are subject to change without prior notice. Customer service speed We are answering emails everyday from the morning to the late evening, no matter if its Sunday or Christmas eve. We work in the EET time zone which is +2h from GMT. During the day our customer service is usually really fast and in the evening we are little slower due we have less people to answer questions. Easier things are usually handled within the hour and shipping related things we try to handle during the day so they can be shipped out the same day. Our goal is to answer all emails within 24h no matter how difficult the question is. The fastest way to get customer service is always to send us a email. Please include relevant pictures and a structured email with proper sentences so we can answer you faster. Take your time and read trough your email once before you send it to us. Payment Methods and Shipment Information We ship globally for example to Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania,Slovakia, Slovenia, Spain, Sweden and United Kingdom, Norway, Turkey, Switzerland). And many other countries, just go to the checkout and see if you can checkout. If not just let us know and we will quote you a price as we are able to ship to any country in the world. We accept Paypal, credit card payments and IBAN/BIC (SEPA) bank transfers. Currency All payments are made in Euros. You can however browse the shop in other currency but the price then is not final. You will see the final Euro price in your shopping basket when paying for the product. The price is shown in "5. Send Order" part of the checkout form. VAT Our shop automaticaly includes or excludes VAT percentage from the prices by the destination country. You can change the destination country from the checkout pages before you order. All our customers will pay the same price no matter the included VAT percentage. Companies who are buying with VAT numbers can buy products with exluded VAT according to destination country. Shipping options You can browse all our shipping options with out registering. Just add the products you are interested in and proceed to checkout page where you can see all the shipping options and estimated delivery times. Basic tracked shipping starts from 4.90€ (GLS road freight) in European Union countries. Estimate Shipping times with GLS. An international GLS parcel is delivered to neighbouring states of Finland like Sweden or the Baltic countries in a standard delivery time of 24 to 72 hours. To more distant European countries the international parcel dispatch takes between three and six working days, to remote areas up to eight days. Rough estimate is 1 week from order to delivery. Please note that GLS shipping time is calculated in working days (Monday to Friday) and excluding the day when parcel is shipped.Note! Here you can find estimated delivery times. Note! Here you can find collected statistics about average delivery times. Estimated shipping times by DHL and UPS • DHL Express and UPS Express are our fastest delivery options. Both options can reach almost anyplace in EU in 1 day, but some places take 2 days. • Depending what kind of products you want to order the shop will let you choose from available shipping options. • Both Options are also Door To Door Services. The Courier will deliver the parcel to your door. But they also have pickup points where they might drop your package off so you can pick it up when it suits you. When you are checking out your order you can see a more precise estimate of each shipping option to your country. Refund policy We accept returns of new, unused merchandise within 14 days from the delivery. Please contact us at to receive return information. The customer is responsible for any return costs unless otherwise agreed to with our customer service. We try to return the money with the same payment method that was used to pay for the order, if its not possible we make a wiretransfer. You can also request a gift card if you are making a new order to speed up the process. We also accept returns after 14 days upto 50days, but we refund them with a giftcard to our shop so you can replace them with any products we sell. Please contact our customer service for details. After we receive the merchandise and verify its re-sellable condition, we will refund the money or give you a giftcard. Depending on the item this will take 1-3 days after we have received the item. If there is a delay we will contact you. Note! Every return made without notice via email will be charged with handling fee of 20€. Handling fee will be reduced from the total refund. Damaged Shipment In the rare occurrence that the shipment has been damaged, please take pictures and send those to our customer service immediately and we will make sure we get you sorted and back to enjoying our hobby. Also notify the courier bringing you the shipment that it has been damaged. Defective parts If you feel that your product is defective please send us a email and we will let you know what to do next. Most items do not have a warranty as they will break in normal usage. For example if you hit something solid or take a larger tumble. Properly used items should easily last 3-12 months and during this period we are able to replace broken items if they have a manufacturing or material fault. We have years of experience with different makes and they all have different warranty policies. We have chosen to work with brands that have a good understanding how to serve their customers and you can be assured that you will get the best customer experience possible with us. We do not replace or exchange products that are not defective or broken by improper use or have not been maintained. But we do help and teach you how to do things properly so you do not break anything in the future, just email us and we will help you out. We are however unable to wrench for you, its part of the hobby so its important that you will learn that part also your self, we have great tools to sell you so just ask us what you need.Note! Many manufacturers are strictk that electronics are not allowed to be modified (connectors changed etc.) without disabling the warranty. Remember to check this from your products manual. Don't worry you are safe with us! Most of our customers feel that they get excellent service in the rare occurrence that they encounter a problem with the product they have bought. And remember if you run in to a problem or you feel that there is a problem with arrived products do not hesitate to contact us. We are here to help and we do our best to sort it out as soon as possible. What happens if EuroRC made a error in the shipment? We ship a lot of orders each day and rarely there are errors. We do however try to minimize the effect on the customer. Please contact us immediately if we have made an error and we will make it right. Address for returns Always contact us before returning any product, we can not take responsibility for shipments that are sent without prior notice. Its very important that we can tell you how to mark the parcel so it will be processed in a timely fashion. EuroRC Oy Päävointie 8 12400 Tervakoski Finland I accept the delivery terms
