Letter a free printable worksheets

Color by number worksheets are a great way to teach your kids or students basic number recognition, how to use a legend, and it will give them the opportunity to work on their fine motor skills. There are tons of color by number worksheets below overall different sorts of themes. No matter what the kids are interested in, they are sure to find a color by number here that they'll love to tackle. Scroll further down the page and you'll find some free, printable color by calculation worksheets that will help your child or student practice their math facts. In addition to these color by number worksheets, there are some great places they can go on the computer to play free color by number online games. If your kids love these free color by number worksheets, be sure to check out some other free printable activities for kids including connect the dots worksheets, hidden pictures, and printable mazes. Subtraction is a key skill to learn for young students. But, it can be a challenging skill to master. Some children will require manipulatives such as number lines, counters, small blocks, pennies, or even candy such as gummies or M&Ms. Regardless of the manipulatives they might use, young students will need lots of practice to master any math skill. Use the following free printables, which provide subtraction problems up to the number 20, to help students get the practice they need. D.Russell Print the PDF: Worksheet No. 1 In this printable, students will learn basic math facts answering questions using numbers up to 20. Students can work the problems on the paper and write the answers just below each problem. Note that some of these problems do require borrowing, so be sure to review that skill before handing out the worksheets. D.Russell Print PDF: Worksheet No. 2 This printable gives students further practice solving subtraction problems using numbers up to 20. Students can work the problems on the paper and write the answers just below each problem. If students are struggling, use various manipulatives—pennies, small blocks, or even small pieces of candy. D.Russell Print the PDF: Worksheet No. 3 In this printable, students continue to answer subtraction questions using numbers up to 20 and noting their answers just below each problem. Take the opportunity, here, to go over a few of the problems on the board together with the entire class. Explain that borrowing and carrying in math are known as regrouping. D.Russell Print the PDF: Worksheet No. 4 In this printable, students continue to work basic subtraction problems and fill in their answers below each problem. Consider using pennies to teach the concept. Give each student 20 pennies; have them count out the number of pennies listed in the "minuend," the top number in a subtraction problem. Then, have them count out the number of pennies listed in the "subtrahend," the bottom number in a subtraction problem. This is a quick way to help students learn by counting real objects. D.Russell Print the PDF: Worksheet No. 5 Using this worksheet, teach subtraction skills by using gross-motor learning, where students actually stand up and walk around to learn the concept. If your class is large enough, have students stand at their desks. Count the number of students in the minuend, and have them come to the front of the room, such as "14." Then, count the number of students in the subtrahend—"6" in the case of one of the problems on the worksheet—and have them sit down. This provides a good visual way to show students that the answer to this subtraction problem would be eight. D.Russell Print the PDF: Worksheet No. 6 Before students begin to work the subtraction problems on this printable, explain to them that you'll give them one minute in which to work the problems. Offer a small prize to the student who gets the most answers correct within the timeframe. Then, start your stopwatch and let the student loose on the problems. Competition and deadlines can be good motivational tools for learning. D.Russell Print the PDF: Worksheet No. 7 To complete this worksheet, have students work independently. Give them a set time—perhaps five or 10 minutes—to complete the worksheet. Collect the worksheets, and when the students have gone home correct them. Use this kind of formative assessment to see how well students are mastering the concept, and adjust your strategies for teaching subtraction if needed. D.Russell Print the PDF: Worksheet No 8 In this printable, students will continue to learn basic math facts answering questions using numbers up to 20. Since the students have been practicing the skill for a while, use this and the subsequent worksheets as time-fillers. If students complete some other math work early, give them this worksheet to see how they perform. D.Russell Print the PDF: Worksheet No. 9 Consider assigning this printable as homework. Practicing basic math skills, such as subtraction and addition, is a good way for young students to master the concept. Tell students to use manipulative they might have at home, such as change, marbles, or small blocks, to help them complete the problems. D.Russell Print the PDF: Worksheet No. 10 As you wrap up your unit on subtracting numbers up to 20, have students complete this worksheet independently. Have students swap worksheets when they are done, and grade their neighbor's work as you post the answers on the board. This saves you hours of grading time after school. Collect the graded papers so you can see how well the students have mastered the concept. Find more math practice for your first graders with these word problem worksheets. There are over 100 free fraction worksheets in PDFs below to support the many concepts encountered with fractions. When starting with fractions, begin by focusing on 1/2 and then a 1/4 before moving to equivalent fractions and using the 4 operations with fractions (adding, subtracting, multiplying and dividing) These worksheets require students to find a half using circles, squares, rectangles, sets of objects e.g., one-half of 12 cookies, one-half of 14 chocolates etc. Worksheets to find 1/4 of sets and of shapes. Beginning to look at 8th's, 6th's by dividing the circle into equal parts. Eight Pizza Worksheets to show the toppings by fractional amounts. Helps to keep learning about fractions fun and authentic. Worksheets to Add Fractions with Common DenominatorsUse these worksheets before having students add fractions without finding common denominators. Additional practice. 6 Worksheets to subtract fractions with a common denominator. Students are required to find the common denominator prior to adding. These worksheets require students to take fractions like 18/12 and reduce them or simplify them to 6/4 and on to 3/2 and on to 1 1/2. Students are required to take fractions like 3/12 to 1/4. Finding equivalent fractions is key. Students need to find ways to see that 2/4 is the same as 1/2 and will benefit from having hands on activities. Worksheet for mixed fractions Tutorial included These worksheets all have a common denominator. 10 Worksheets to multiply fractions with and without common denominators. To divide the fractions, multiply the reciprocal then simplify. Change the mixed number to an improper fraction, divide using the reciprocal and simplify where you can. Use a ruler to line up the equivalencies. These worksheets help students see the connection between fractions and decimals. Can students apply what they know? Use these fraction word problem worksheets. Multiplying, Division, Addition, Subtraction etc Many different teaching approaches can bring history alive for your students. Add these printable history worksheets to your studies to reinforce your lessons and allow students to hone their knowledge of important historical events and people. Abraham Lincoln PrintablesUse word searches, vocabulary quizzes, crossword puzzles, and coloring pages to help students learn about Abraham Lincoln, the 16th president of the United States. Activities also teach about the Lincoln Boyhood National Memorial and the first lady from 1861 to 1865, Mary Todd Lincoln. Black History Month PrintablesAt this link, teachers can find important background information about Black History Month in addition to worksheets and other activities focused on famous firsts among Black Americans. The Famous Firsts Challenge, for example, has students match up a famous first for Black Americans, such as the first African-American to go into space, with the correct name from a list of choices. Chinese History PrintablesWith a history spanning thousands of years, China is for many people the subject of a lifetime of study. While your students probably won't embark on such an endeavor, this link offers handouts to introduce your students to concepts related to Chinese culture and government. One handout also presents a number matching activity for students to learn how to count to 10 in Chinese. U.S. Civil War PrintablesAmerica's Civil War might be the most studied and debated subject in U.S. history. Using the printables at this link, students can become more familiar with the names, places, and events that defined this crucial era for the American republic. Lewis and Clark PrintablesExploration and expansion of the American frontier are essential elements to understanding the United States as a nation and a people. Meriwether Lewis and William Clark were hired to explore the Louisiana Territory that President Thomas Jefferson bought from the French. With the activities and worksheets at this link, students learn more about issues related to Lewis and Clark and their travels. Medieval Era PrintablesThe medieval era is a fascinating time for many students, with tales of knights and jousting as well as political and religious intrigue. Among the activities at this link is a detailed coloring sheet for learning all about a suit of armor. Also included is Medieval Times Theme Paper on which students can write a story, poem or essay about the period. New 7 Wonders of the World PrintablesWith an announcement in July 2007, the world was introduced to the "New Seven Wonders of the World." The Pyramids of Giza, the oldest and only Ancient Wonder still standing, is included as an honorary candidate. The printables here teach students about the Pyramids and the others: the Great Wall of China, the Taj Mahal, Machu Picchu, Chichen Itza, Christ the Redeemer, the Colosseum, and Petra. Revolutionary War PrintablesBy learning about the Revolutionary War students discover the actions and principles of the nation's founders. With the activities at this link, students gain a good overview of vocabulary and names related to the Revolution, as well as particular events, such as the Surrender of Cornwallis and Paul Revere's Ride. Women's History Month PrintablesMarch in the United States is National Women's History Month, which recognizes and celebrates women's contributions to America's history, society, and culture. The printables at this link introduce many important women with significant historical legacies whose names students might not immediately know. These worksheets and activities will heighten students' appreciation for the role of women in U.S. history. WWII History PrintablesStudents will use and expand their knowledge of World War II to complete the activities at this link, which include a crossword puzzle; spelling, alphabetizing and vocabulary sheets; and coloring pages. Geography worksheets can be a valuable resource for teachers and students looking for activities and information related to both U.S. states and foreign countries. Each link leads you to a page featuring general background about the subject, whether it be countries like Germany and Japan, or states like Alaska and Nevada. The resources also include crossword puzzles, vocabulary worksheets, alphabet-ordering activities and explanations of geographical terms—such as isthmus, island and archipelago. Use these printables as study aids, pop quizzes or launching points for discussions about the various states and countries included here. Add these free printable geography worksheets to your homeschool day to reinforce geography skills and for variety and fun. Geography Germany Japan South America When children study grammar, one of the most basic lessons they learn involves the parts of speech. The term refers to the category to which words are assigned based on how they function in a sentence. Knowing and understanding the parts of speech help children avoid grammar errors and write more effectively. English grammar is composed of eight basic parts of speech: Nouns: Name a person, place, thing, or idea. Some examples are "dog," "cat," "table," "playground," and "freedom." Pronouns: Take the place of a noun. You might use "she" in place of "girl" or "he" instead of "Billy." Verbs: Show action or a state of being. Verbs include the words "run," "look," "sit," "am," and "is." Adjectives: Describe or modify a noun or a pronoun. Adjectives give details such as color, size, or shape. Adverbs: Describe or modify a verb, adjective, or another adverb. These words often end in "-ly," such as "quickly," "quietly," and "softly." Prepositions: Begin phrases called prepositional phrases that describe the relationship between other words in the sentence. Words such as "by," "to," and "between" are prepositions. Examples of their use in a sentence include: "The girl sat by the lake." "The boy stood between his parents." Conjunctions: Join two words or clauses. The most common conjunctions are "and," "but," and "or." Interjections: Show strong feeling. They're often followed by an exclamation point, such as "Oh!" or "Hey!" Try some fun activities with your children to help them learn to identify each part of speech. One activity could be using a different colored pencil for each part of speech and underlining them in old magazines or newspapers. Print out these parts of speech worksheets for your children to complete. Beverly Hernandez Spend some time discussing parts of speech with your students or children. Provide plenty of examples of each. Then, have students complete this parts of speech vocabulary sheet. For some enjoyable practice identifying parts of speech, pull out some of the children's favorite books and find examples of the different parts of speech. You could treat it like a scavenger hunt, searching for an example of each. Beverly Hernandez As children look for the names of the parts of speech in this word puzzle, encourage them to review the definition for each. See if they can come up with one or two examples for each part of speech as they locate its category in the puzzle. Beverly Hernandez Use this crossword puzzle as a simple, engaging activity to review the parts of speech. Each clue describes one of the eight basic categories. See if students can correctly complete the puzzle on their own. If they have trouble, they can refer to their completed vocabulary worksheet. Beverly Hernandez You can use this challenge worksheet as a simple quiz on the eight parts of speech. Each description is followed by four multiple choice options from which students can choose. Beverly Hernandez Young students can use this grammar activity to review the eight parts of speech and brush up on their alphabetizing skills. Children should write each of the terms from the word bank in alphabetical order on the blank lines provided. Beverly Hernandez In this activity, students unscramble the letters to reveal each of the eight parts of speech. If they get stuck, they can use the clues at the bottom of the page to help. Beverly Hernandez Let your students play super sleuth with this challenging secret code activity. First, they must decipher the code. Then, they can use their decoding key to identify the parts of speech. There are clues at the bottom of the page to help if they have trouble.
