But no matter what type of gamer you belong, surely everyone has heard of MOBA game genre appearing in the top titles such as League of Legend or Dota 2. We can understand in a simple way, MOBA game is a multiplayer game genre with a heavy play on tactics and teammates. Up to now, MOBA games are mushrooming and the number of gamers worldwide supporting this type of game is also very large. Besides, MOBA games have also been popularized on many platforms, especially, where MOBA games are the most popular mobile platform. Currently, the dominant game that dominates on the mobile platform is Mobile Legends: Bang Bang. Developed by Moonton, Mobile Legends gives players the strategic gameplay of a pure MOBA game and a number of distinct improvements. The game promises to bring gamers moments of satisfaction with friends just in the palm of your hands. Gameplay Basically Mobile Legends gives players a true MOBA game. While in the interface before the game, there will be a total of 10 players divided into 2 teams. Gamers can choose one of many different generals including Tanks, Mages, Marksmen, Assassins, Supports, ... and lead a certain number of creeps to fight. Certainly for those who play “LoL” will not find it strange and difficult to get acquainted with the generals of this game. Up to the present time, the game has owned more than 70 generals with attractive storylines, rich skill systems as well as extremely impressive design. In order to win a high win rate in matches, the player must combine with the team to select the best champions depending on the ability and fighting habits of each person. In addition, gamers need to coordinate well on the tactical array to offer reasonable tactics to destroy the enemy and gain an advantage. The map will be divided into 3 lanes, interspersed with jungles. On each lane, there will be towers of two teams, the way to distinguish their towers will depend on where you revive. The mission of your team is only one, that is to destroy the enemy towers and end with destroying the main base. In addition, Mobile Legends also owns another extremely attractive game mode. Imitate the Battle Royale gameplay based on a hit game like “PUBG”, which draws players into a large map. In this mode, players can only choose one of the generals that have been previously specified. The maximum limit of a team is only 3 people. On the map will appear a lot of monsters, each being destroyed will drop items with the corresponding value. And players will use them to destroy other opponents in the dead-or-alive battle. It can be said that this is an unprecedented precedent for strategic games like the MOBA genre. By combining this fascinating gameplay, “Mobile Legends” is like blowing a new breeze to make the game even more attractive and attractive. If you feel too boring with the moments of farming soldiers, breaking towers in 5v5 matches, skydiving, running in the same familiar game will bring an extremely stimulating feeling. Besides, the game retains many rich game modes similar to “LoL”. If you want to have a battle that is just a mere level of relaxation, the classic game is perfectly suitable. And if you want to challenge yourself with more intense battles, you can join the chaotic battle mode and ranking battle. Features Besides the attractive enhancements in gameplay, Mobile Legends also offers gamers many other attractive features. With Classic MOBA mode, players will be able to participate in a 5v5 match in real-time with true gamers. Similar to other MOBA games, gamers will battle in a map against 4 jungle areas, destroy 18 defense towers and face the two most powerful Wild Bosses. Besides, the game is owning over 70 different generals the game also gives gamers an extremely rich costume system. The game has a number of skins for the character that are no less than 200. The needles are also divided into different quality groups including special skins, seasonal award-winning skins, and extremely beautiful ones, hard to possess. Perhaps the developer also understands the desire of gamers to want to own many beautiful costumes for their generals. Just with a slight change in the appearance of the character, the feelings of the player will also increase markedly. In addition, the application control system of the game is also extremely simple and easy to master. With the virtual joystick on the left corner and the skill buttons on the right side of the screen, players can easily master the game with just two fingers. Autolock mode and target sifting will also be integrated into this game. Players will never be able to miss the target and make the battle more attractive than ever. Because each match only lasts for 10 minutes, so for players busy work this will be a prominent plus point for this strategy game. In addition, in the event of a player losing internet connection, the game also supports Smart Offline AI Assistance mode. This means that when you are disconnected, you can still enter the game in a few seconds. Meanwhile, the game will use AI to intervene and control the character on your behalf to solve the 5vs4 situation more smoothly and without losing the game balance. We can say “Mobile Legends” is a fair game in the true sense. There is no way you can get stronger through training heroes or paying for stats. The outcome of the battle will be determined based on the player's skills. With the slogan “Play to Win, not Pay to Win”, the publisher “Moonton” is really directing its brainchild to reach more players. Graphics It can be said that the graphics in Mobile Legends is an excellent product that can keep many veteran gamers. Image graphics in the game are built very real and extremely clear. Skill effects and movement of the characters are designed very vividly and look extremely attractive feeling. Besides, the game gives players an extremely attractive feeling. Besides, the graphics of this game are also appreciated by many gamers in the entertainment industry MOBA. Details such as bushes, lighting, gloss and fog effects are all built very honestly, giving players the feeling of excitement when fighting with their comrades. In addition, the colors in the game are also quite vibrant, the contrast and saturation are also shown at a high level. Compared to other MOBA games at the same time, “Mobile Legends” deserves a game that players should put at the top of the priority list. unlock all skin mobile legends apk download. unlock all skin mobile legends apk no ban. unlock all skin mobile legends apk 2021. unlock all skin mobile legends apk 2020. free unlock all skin mobile legends apk. apk mod mobile legends unlock all skin. lulubox apk unlock all skin mobile legends. imls ml apk for unlock all skin mobile legends
