

The best sunglasses for men aren't just protective eyewear—and they're definitely more than nice-to-have accessories. The very best men's sunglasses are major fit enhancers in their own right, the type of last-minute additions to the roster that get fashion referees buzzing about fair play. Even next to the most paparazzi-attracting coat or outrageous are major fit enhancers in their own right, the type of last-minute additions to the roster that get fashion referees buzzing about fair play. haircut, the right pair of sunnies can steal the show. Think of them as adding '90s-era Jordan to a lineup that already includes 2000s-era Kobe and 2010s-era But once they get up close and personal, it's your face's job to hold it. And when one accessory wields so much power, it behooves you to ensure you have the perfect pair of sunglasses on you at all times. Whether you're chasing the legendary cool of classic aviators or the right-now swagger of sporty wraparounds, the best sunglasses for every face, shape, and every budget are immediately below, each one ready to carry your fits to the 'ship. The Best Men's Sunglasses, According to GQThe Best Sunglasses, According to GQT Ban Wayfarer is a failsafe buy that'll always be in style-today, tomorrow, and 50 years from now. With not much else on but some whitey tighties and crew socks, Wayfarers were the cherry on top of Tom Cruise's famous Risky Business scene, cementing them further into the zeitgeist. But you don't have to be an A-lister to wear them like one. Ray-Ban Wayfarers are the eyewear equivalent to a pair of Levi's 501 jeans in your drawer—they're insanely popular, look great on just about everyone, and can sync up with just about any style. This isn't exactly a competition, but if the sunglasses emoji is a pair of Wayfarers, you know you've got the most classic frames there are. Warby ParkerAlbie SunglassesColors: Varies Lenses: Polarized and non-polarized Warranty: 30-day returns, 6-month lens scratch protection for prescription lensesWhether it's in the back of an Uber or between the concrete and the sole of your shoe, the harsh reality is that you'll probably lose your shades. While inflation has caused everything from bread to BMWs to skyrocket in price, we can still bet on the fact that there are still some affordable sunglasses on the market. Warby Parker offers some of the best quality-to-price sunglasses out there thanks to the brand's direct-to-consumer business model. They've got a grip of options from cat-eye shades to square frames to round sunglasses, and they offer a variety of lens options including prescription lenses. With an oval frame shape and sleek metal rims, the Albie fills the '90s-shaped hole in our hearts. And as such, this pair of shades is best served with a cropped tee and baggy jeans. The Best Aviator Sunglasses: Randolph Engineering Aviator SunglassesRandolph EngineeringAviator SunglassesColors: Varies Lenses: Polarized and non-polarized Warranty: Lifetime \$176 at REI (before member cash back!) REASONS TO AVOIDSlightly loose on top of your headWho it is best for: The Ray-Ban Erika is a stylish, high-performance option that flatters various face shapes and styles. Thanks to their oversized, softly rounded wayfarer-style frames and lightweight feel, they suit wearers with both small and large facial structures. This is a great choice if you need sunglasses that transition seamlessly between casual and polished looks while still offering solid sun protection. Why we love it: It has crisp, clear optics and subtle gradient lenses—dark at the top for sun protection, lighter at the bottom for visibility in mixed lighting. The semi-flexible metal bows are comfortable during long wear, and though we didn't test the polarized version, it's available in a wide array of lens and frame color options. While we were initially thrown off by the slight purple hue in the grey lenses, testers found it improved contrast without skewing color perception. The result is a pair of sunglasses that feel premium in performance and aesthetics. Should you buy it? If you're looking for versatile sunglasses with excellent optical clarity and a universally flattering design, these are worth the investment. While they sit a little loose when perched on your head and come at a higher price, they deliver consistent performance and standout style. For added glare protection, consider opting for the polarized version. These sunglasses strike a rare balance of comfort, visual quality, and timeless design. The Erika on a variety of GearLab testers. Credit: Abriah Wofford REASONS TO BUYTop-notch lenses/Very secure fitCover much of the faceREASONS TO AVOIDSporty vibe isn't for everyonePricey/Who it is best for: The Kaenon Burnet Mid is ideal for men seeking high-performance sunglasses with superb clarity, enhanced contrast, and excellent color retention. It is available in mid and XL sizes for a comfortable, secure fit. However, some may find their sporty style less suitable for formal or casual settings. Why we love it: Through years of testing, we keep loving the brown and grey lenses, which deliver exceptional clarity and contrast with minimal back reflections, even in harsh lighting, making them the least distracting among tested pairs. Should you buy it? Despite their higher price and sporty aesthetic that may not appeal to all, these are a worthwhile investment for their top-notch performance. A glimpse into the testing of sunglasses across the boardCool styleGreat comfortREASONS TO AVOIDCan slip when sweatyStyle offers less coverageWho it is best for: The Camp Eyewear Trail is perfect for all genders seeking budget-friendly, casual sunglasses with a stylish wayfarer design, featuring real wooden bows and blue lenses that offer slight contrast, ideal for those who prioritize comfort and value over polarization. Why we love it: The clear blue lenses, sleek finish, flexible hinges, and unique wooden bows enhance its style, making it a top pick for casual wear among our testers. Should you buy it? Despite the glossy finish causing slippage when sweaty and gaps around the medium-sized lenses allowing sunlight in, the Trail is a great value. Other options offer a more universal fit for those less concerned about weight. The Trail out on the trails of Tahoe with multiple testers. Credit: Abriah Wofford \$25 at REI (before member cash back!) REASONS TO BUYShockingly lightweightGreat style and a ton of colorsComfortable on a wide range of facesREASONS TO AVOIDCan bounce when sweatyNot the most durableWho it is best for: The Goodr OG are a practically perfect combination of adaptable style, versatile performance features, and a price so low it's suspicious. It's hard to go wrong with these glasses — we wore them spring skiing, summer running, and winter driving — making them one of our top recommendations for anyone who wears sunglasses for any reason and needs to stick to a modest budget. Why we love it: The wayfarer style makes the OG great for casual wear, while their absurdly low weight and easy-to-love fit help them cross the bridge into sweaty summer adventuring. Whimsical color options ensure there's no outfit these can't match with. And even when we pushed these shades to keep up on relentlessly sunny trail runs, they did. Should you buy it? The only reason not to get these glasses is if you're after the crispest lenses and a lifetime of durability. The OGs aren't that. But for well under \$50, these glasses is if you're after the crispest lenses and a lifetime of durability. price bracket. From hot summer days at the beach to still-snowy spring trail runs, the Goodr OGs somehow manage to do it all - and for a shockingly low price.Credit: Rob Gaedtke REASONS TO BUYSolid eye protection/Versatile, comfortable styleOutstanding warranty program REASONS TO AVOIDUnimpressive caseWoodgrain pattern may wear offWho it is best for: The Shady Rays Classic Timber is perfect for budget-conscious individuals seeking lightweight, stylish wayfarer sunglasses with grey or brown lenses and woodgrain-patterned plastic frames, available in two sizes, ideal for casual wear. Why we love it: Their well-executed style, lightweight design, and intriguing woodgrain patterning are complemented by a reliable warranty that enhances its value through a great replacement program. Should you buy it? The Timber offers exceptional value, despite the woodgrain pattern wearing off in high-traffic areas and coming with only a basic microfiber bag for minimal protection. However, lens and frame combinations are limited. To get multiple opinions on comfort, we had a big chunk of the GearLab team test out the Classic Timber. Credit: Abriah Wofford REASONS TO BUYClassic style is versatileLook great on pretty much everyoneStrong and durableREASONS TO AVOID Heavy slant leaves the top openQuite heftyWho it is best for: The Ray-Ban Original Wayfarer Classic is perfect for style-conscious individuals of any gender seeking versatile, durable sunglasses that complement casual beachwear and formal attire, with a timeless wayfarer design that suits diverse aesthetics. Why we love it: Its iconic, 70-year-old style remains chic. The robust construction with thick frames and seven-barrel hinges, and its ability to look good on everyone, enhances any outfit from swimsuits to wedding wear. Should you buy it? Despite their heavier 45-gram weight and forward-slanting design that reduces coverage, these offer unmatched style and durability, though budget-friendly alternatives provide similar aesthetics or performance at different price points. For sunglass testing, we brought in a bunch of the GearLab team in order to get multiple opinions on comfort and fit.Credit: Abriah Wofford REASONS TO BUYGreat for high glare and in bright lightComfortable yet securePhenomenal coverageREASONS TO AVOIDSporty lookExpensiveWho it is best for: The Costa del Mar Rinconcito is ideal for water sports enthusiasts, such as kayakers and
anglers, who need high-performance sunglasses with dark, polarized lenses that block 100% of blue light and offer a secure fit with rubber nose pads for on-water activities. Why we love it: Its crisp, flawless polarization minimizes glare, minimal back reflections in harsh lighting, and large, slightly wrapped lenses provide excellent coverage, maintaining its top spot for water-based performance over several years. Should you buy it? Though their sports, but these are not cheap. There are more budget-friendly options that scored in the same range. The Rinconcito worn by many of the GearLab crew around Lake Tahoe. Credit: Abriah Wofford REASONS TO BUYLow weight and well-balancedExceptional ventilationStable even when sweatyREASONS TO AVOIDRuns a bit wideStyle isn't everyone's favoriteWho it is best for: The 100% Hypercraft is our top recommendation for runners looking for high-performance shades that can keep up on long summer runs. This pair is geared for runners and outperformed nearly every other run-specific pair we tested — and for half the cost. Why we love it: These glasses have everything a runner could want. Featuring an ultra-grippy nose piece, low weight, and great balance, they don't bounce and are impressively comfortable even on long runs. Their wide shape and close fit provide excellent protection, while perfectly distributed vents stop them from fogging up. The lenses are clear and sharp, with great contrast and coatings to prevent both precipitation and fingerprints from building up. Should you buy it? The only downside we could find is that they have a slightly wider than average fit — but that didn't cause any issues among our testers. If you're an avid runner on sunny, hot days, and you've been searching for sunnies that won't drive you bananas (or leave you broke), we can't recommend the Hypercraft enough. This run-specific pair from 100% nailed it on all the features we need for glasses that can keep up - a secure and comfortable fit, great coverage and protection, and a price we're willing to invest in. Credit: Kyle Richardson REASONS TO BUYGreat fit and function for most uses, faces, and stylesExcellent lens color and contrastDurable, lightweight frameREASONS TO AVOIDMinor back reflections Too general to excel at any one thing Who it is best for: The Kaenon Clarke suits both narrow and wide faces with its versatile, lightweight design. It performs well for activities like trail running and casual wear, without focusing on a specific sport or fashion style. Why we love it: Its secure, comfortable fit, low weight, and matte finish ensure stability during trail runs and bike rides. The timeless shape remains a go-to for its exceptional versatility over the years of testing. Should you buy it? Some testers noticed slight back reflections in bright light, and the Kaenon Clarke lacks bold style or sport-specific features, but its reliable all-purpose design makes it a solid choice. More budget-friendly options provide a similar style and function with slightly lower performance. The Clarke shown on multiple gear testers. Credit: Abriah Wofford REASONS TO AVOIDNo dust protectionClear lens scratches easilyWho it is best for: The Smith Wildcat is perfect for cyclists of all face sizes seeking high-performance sunglasses with interchangeable lenses, adjustable nose pads, and a flexible frame for a secure, comfortable fit during various riding conditions. Why we love it: The two easily swappable lenses, including the Red Mirror option, offer superb protection, enhanced contrast, and sharp definition. Its soft, flexible frame with rubber contact points ensures stability during extensive cycling tests. Should you buy it? Though the breathable fit allows more dust in dusty, close-following rides compared to goggle-like alternatives, it's a top choice for most cycling tests. with multiple sunglass experts to get various opinions on fit and style. Credit: Abriah Wofford How We Tested We have spent years testing into five separate categories of glasses: men's and women's (which both include many unisex models), cheap, sports, and cycling. We have collectively spent thousands of hours wearing and testing these glasses in every possible activity and location we could. We wore them at the equator on the Galapagos Islands, in the sunny Caribbean, and through cloudless Sierra Nevada Mountain hikes. We wore them dog sledding at the North Pole in spring (sun and snow!), mountain biking patchy trails at twilight, running single track through the desert, road tripping across the country, and paddling across the country, and paddling across the country are sunnies in checked luggage, tossed them on car floors, pulled them out of the bottoms of backpacks, and rescued them from watery graves. We are sunglass experts. From the Caribbean to Iceland and from the North Pole to Lake Tahoe, we've spent thousands of hours testing bench is equally impressive. Several of our senior review editors are in charge of testing all the different types of glasses. Maggie Nichols has been wearing glasses since she was four years old and has been a professional backcountry guide for over 15 years. She is obsessed with protecting her eyes as she works and adventures outdoors in some of the sunniest places on the planet, from the African savannah to mountaintops almost 2 miles high. Kyle Richardson is a professional mountain runner living in the peaks of Colorado. He's spent many years racing alongside more of the best, and knows what it takes for a pair of glasses to keep up. Joshua Hutchens leads GearLab's team of testers for all things bike-related. An avid biker — from BMX to mountain biking to road cycling — Joshua's career has had him leading bike trips, running bike tr snowboarding, he's always on the go with his favorite pair of shades. Jeremy Benson is an obsessive year-round cyclist and author of two outdoor junkie, he has an unbridled passion for the best sunglasses for every adventure. Zach Wick is an avid cycler of all types, having spent 18 years as a competitive road and mountain bike racer. With a background in outdoor product design, he has an eye for top-quality products. Each of our main testers pulled in the help and critical eyes of a host of friends, family, and coworkers to help test and evaluate these sunglasses. We've tested sunglasses across the country and around the globe, everything outdoors to find out which ones are the best. Just like a great winter coat, the perfect button-down shirt, or an excellent pair of sunglasses: the ones that look good, the ones that look good, the ones that work well, and the ones that look good while also working well. While the right pair of sunglasses can bring notch, they're also a very important protective gear that you should never leave home without. UV rays damage your eyes as well as your skin. UV exposure can cause cataracts, macular degeneration, and even eye-related cancers. An ever-increasing body of evidence implies we should all protect our eyes better. This is especially true for those who spend extended hours outdoors, as additional protection against high-energy visible light (HEV or blue light). Even if you're stepping out into the backyard with the dog, a blast of bright light can be painful and potentially eye-damaging. Reflected light off surfaces like water and snow, pavement, and other objects compound the amount of light your eyes are trying to cope with, making polarized lenses ideal for blocking out this unwanted additional glare. With all the reasons to wear sunglasses are right for you. Sunglasses do far more than just look good - they're an important part of protecting yourself from the damaging effects of UV rays. Credit: Maggie Nichols How to Pick the Best Sunglasses for You Before even considering the style or intended activities you have for rocking your new shades, it's helpful to review the many materials and features manufacturers put into their products. Understanding each attribute's benefits and best use will help determine if a pair of glasses is right for you. Think about what kinds of activities you want to do while wearing your sunglasses, and let our reviews help you narrow down which pair is right for you. Think about what kinds of activities you want to do while wearing your sunglasses, and let our reviews help you narrow down which pair is right for you. market, from materials to coatings to lens color. Material As the name implies, early glasses exclusively used glass lenses. Today, sunglasses (and regular eyeglasses) use four common materials for the lens: Glass lenses are heavier than their synthetic competitors and can shatter with enough force. Polyurethane: This synthetic material offers exceptional impact resistance while maintaining excellent clarity. It is also flexible and lightweight, making it appealing for high-intensity activities. However, it typically has a higher price tag. Polycarbonate: Another synthetic material with good impact resistance and decent optical clarity. Poly lenses are also lightweight and typically more affordable than polyurethane, though they are less scratch-resistant. Acrylic: This mass-produced material is inexpensive and commonly found in budget glasses. It is less durable and has some of the lowest optical clarity, sometimes causing image distortion. However, it is lightweight and far less expensive than polycarbonate lenses. Coating Beyond just the material of the lenses, many manufacturers enhance their products with additional coatings. For non-glass lenses, select a scratch-resistant coating beyond just the material of the lenses, many manufacturers enhance their products with additional coating beyond just the material of the lenses. dust or even being wiped on a t-shirt. A scratch-resistant coating is one of the most important features to ensure the continued usability of your sunglasses for more intense activities involving sweat and water. These coatings help repel water (hydro)
and oil (oleo) from your hair, eyebrows, and fingers. Having the right lenses is very important to your eye comfort and health, whether you're spending no the beach. Credit: Jason Peters A mirrored coating on the beach. Credit: Jason Peters A mirrored coat lenses that lack polarization or even just as a style additive. Anti-reflective coating on the inside of the lenses is less common, but it makes a huge difference for any pair worn slightly away from your face. Without this coating, it's easy to see the reflection of your face or even your eyeball staring back at you. Anti-fog coatings are also uncommon but exceptionally useful for close-fitting glasses in which you plan high-output activities like running, hiking, or biking. Color While there are many colors you might get your lenses in, the two most common are grey and brown/amber. Grey lenses typically offer minimal color distortion and are often darker than other colored lenses. Brown and amber lenses increase the contrast of what you see, though the exact nature of this increased contrast depends on the specific lens. These often do better in variable and medium light conditions. There are many coatings and colors you could get your new lenses in. We can help take out the challenge of deciding which combo is right for you. Credit: Rob Gaedtke Frame Considerations Sunglass frames are important for more than just their looks. Several attributes help certain types work better in specific situations. Consider getting nylon frames if you're looking for lightweight, durable frames. They offer a great blend of strength and flexibility, which makes them great for high-intensity sports. Other plastic frames, including acetate, boast low weight, high functionality, and reasonable durability for casual uses. Though they're often less flexible than nylon frames, plastic frames cost less and come in an astonishing array of colors. Some use recycled and renewable materials. Checking the hinges of your potential new glasses is a very important consideration. Some sports glasses increase their secure fit by having bows that grip more effectively, then offset this added pressure by including flexible hinges. These flex hinges can overextend, helping them to be more comfortable — especially on wider faces — and add durability to the overall frame construction. Even standard barrel hinges deserve some attention. Though they can't overextend, there are better and worse constructions here, too. More barrels generally make a more secure hinge less likely to loosen over time. Five is a good number, though we tested many with just three and a few with seven. No matter how many barrels you end up with, ensuring you can get a small screwdriver to tighten or loosen them is a must, as they may loosen over time. It's important to make sure whatever glasses you choose have frames that fit securely and comfortable on your face, whether you're climbing a route or reading a book in the hammock. Credit: Rob Gaedtke Consider the other touch points of your potential new glasses on your face. All sunglasses will rest on your nose and above your ears; some may touch your ears; some may touch your ears; some may touch your head where a narrow or wide nose. On the top of your head where a narrow or wide nose and above your ears; some may touch your ears; some may going indoors and have longer hair, those free-floating nose pads are likely to get caught. If you're looking for sunglasses to wear while you sweat, consider the material used to make the nose pads, and lightweight glasses. And if you're the type of person who often needs to bend the bows of your glasses to get them to fit your head or sit straight on your face, plastic bows are much more challenging to reshape than metal. When choosing frames, you'll need to consider your face shape to get the desired coverage you want. If you often wear your sunglasses with a hat, you should not consider top-down coverage. But if you find yourself hatless at midday, ensuring you can minimize the space between your eyes. Getting side and bottom coverage to protect your eyes is also important for anyone outdoors. While larger lenses are an obvious fix, smaller lenses can be just as effective with the right frame curvature. Look at the base curve before committing — a higher number means the pair is more curved to fit your face. Your typical pair of gas station or music festival wayfarers is about a base curve of 6. Some fashionable glasses look almost flat, with a base curve of around 4. Sportier models that wrap around your eyes almost as well as goggles typically advertise a base curve of about 8. Finding the right frames to add coverage when you need it most - from having a snowball fight in the woods to exploring a new city. Credit: Maggie Brandenburg Sunglasses for Every Use In a perfect world, you could find a single pair of the void of the right frames to add coverage when you need it most - from having a snowball fight in the woods to exploring a new city. sunglasses to wear to brunch, on trail runs, touring European cities, and kayaking at sunset. While those sunglasses can exist, depending on your style, it's much more common to have two pairs of sunglasses — one you love to wear when you're dressing up or just lounging around and another with the sports performance you need for your preferred activities. No matter what you wear sunglasses for, there are some useful tips to remember while shopping around. Nothing puts sunglasses Are you mostly looking for a solid pair of sunnies for everyday wear? You know, the ones you can put on to drive to the store, hang out at the beer garden, or wear to all those outdoor weddings this summer? Choosing the best everyday sunglasses has much to do with whether you like how they look on your face — but that's not all you should consider. When investing in casual shades, regardless of cost, check if they will protect your eyes. Check that the lenses have 100% UV protection (most do), and consider if you're going to be driving in them or if you live in a place that gets snowy. If that's the case, you'll want polarized lenses to help keep your eyes comfortable no matter how much glare surrounds you. Grey lenses are popular and often block out more light than other color lenses. In contrast, brown/amber lenses enhance contrast and are typically easier to wear in variable lighting conditions, such as partly cloudy days and golden hours. Even when you're shopping for style, don't forget that the job of your sunglasses is to protect your eyes and keep you comfortable.Credit: Maggie Nichols If buying a pair online, read about the frames' size to ensure they fit your face. Look to testimonials to see how they might look on yours. Consider adjustable nose pads, flex hinges, and overall size. And look into the return policy of whatever pair you choose, just in case you don't like them. Once you have your sunnies in hand, test them thoroughly before adjustable nose pads, flex hinges, and overall size. the return period ends. Wear them when you're sweaty and do jumping jacks to see how comfortably they stay put. Wear them outside when the sun is directly overhead or coming at you from the side to check if their coverage and fit offer the protection you want. Golden hour- just after sunrise and just before sunset- can be some of the most challenging times of day for sunglasses, so see how yours do. And don't be afraid to return them and try something else if they don't work for you. We have three reviews that cover casual sunglasses, and cheap sunglasses, and cheap sunglasses, and cheap sunglasses. Below, we highlight the overall scores for each sunglasses, and cheap sunglasses, and cheap sunglasses. for more details about how each sunglass model compares. If you're still sacrificing quality function for the sake of style, you've got the looks covered, and you're on the hunt for a set of specs for running — or other sweaty outdoor sports like climbing, hiking, paddling, golfing, etc. — there are other considerations you'll want to keep in mind while you search. Glasses that are comfortable to wear all day and won't bounce around as you do are a great place to start. If
you're in hot environments, muggy places, or just sweating a lot, breathable shades are a must to avoid fogging lenses. For sports that involve exceptional glare and light exposure, like water sports, snow sports, or climbing, we highly recommend getting polarized lenses. This added layer of protection will lighten the strain on your eyes by cutting out glare from the sun bouncing off of water, snow, or rocks. Consider other light wavelength protection if your chosen sport has you outside for extended hours. HEV or blue light blockage is particularly useful around the water for activities like paddling or fishing. Certain lens coating helps reduce oil on the lenses, which is handy for glasses worn close to your face. A hydrophobic coating is useful if you plan to be around the water or splashed a lot (or rained on), as it helps water droplets to roll more easily off the lenses. If you want to run in your new shades, consider an anti-fog coating to prevent your lenses from clouding too much. A quality anti-reflective coating on the backs of the lenses is something we highly recommend, as it helps reduce back reflection. Lens protections and frame fit are both very important when selecting the right sports sunglasses for your lifestyle. Credit: Maggie Nichols When it comes to quality performance from your frames, think less about their style and more about how well they fit and stay put. Many sports-oriented specs have embedded nose pads and even temple grips to help them stay in place. Check their weight to see if they are as light as your intended use requires. Frames made of nylon are often flexible, offering a secure fit. Flex hinges are useful, too, both for possible impact and for comfort over an extended period. Check their base curvature to see how face-hugging your potential new shades will be, and consider the overall size of the lenses to gauge their coverage. If you often wear a hat or helmet while you're out, keep that in mind when looking at the bow dimensions and lens height of any potential glasses. And, of course, when you get them, put them to the test to ensure they perform how you need them to the test to ensure they perform how you need them. on key purchase decision metrics. Below, we highlight the overall scores of the models we tested. However, we have more details on those scores in the full review article. It's hard to get used to the look of full shield sunglasses, but they will win you over once you see how they perform. Credit: Rob Gaedtke Cycling Sunglasses If you need a pair of glasses specifically for biking — whether on the road or the trail — there are a few additional considerations beyond what you might require for other sports. Look for this not just in the size of the lenses but also in their curvature and shape, particularly on the outsides of the lenses and in the center, between your eyes. When considering a close-fitting pair with large lenses, ensure they have an anti-fog coating. Without this added layer, a goggle-like fit will likely start fogging as you sweat your way through your ride. Added coverage is a must for wind and dust protection while biking. Credit: Zach Wick If you're a road biker, lenses with polarization, as it can sometimes disguise the rocks and bumps you need to see in the path. For mountain bikers, it can also be advantageous to have two sets of lenses — one meant for bright days with a high VLT and one meant for cloudy or overcast days that offer wind and dust protection without cutting down much, if at any, low light. Some pairs come with the helmet you'll wear while riding. Take it to the store if shopping in person. Low-riding helmets can be limiting with cycling shades, which tend to be larger on your face. Be sure to buckle your helmet as you would when riding to see how the straps fit over the bows of the glasses. Check how well they stay secure on your face by jumping. Carefully consider the comfort of the bows over your ears, especially while wearing your helmet, to make sure the fit is just right. Our review of cycling sunglasses considers all the above factors. We detail which metric and how price and value factor in. Below, we chart the overall score of our cycling sunglass test suite, but the full review has much more detail to explore. We've tested all types of sunglasses in all kinds of conditions. Credit: Jason Peters Conclusion There are also style accessories, seemingly endless models are available at any given moment. Yet they are also essential to the continued health of your eyes. No other article of clothing may have quite the same high-level combination of fashion and protection as sunglasses and evaluating their performance, fit, and looks, we can help you find the ideal pair for your lifestyle, vibe, and wallet. Few accessories scream "I'm on vacation' more than a pair of sunglasses. And yet, their function is far more than style alone. According to Manhattan-based optometrist Jennifer Tsai, a bad pair of sunglasses (or none at all) can lead to an increased risk for light sensitivity, retinal damage, cataracts, pterygiums, and dry eyes. "Quality matters when it comes to protecting your eyes from sun damage," she says. Risk of eye damage is even more pronounced during travel when we're often exposed to constant sun. According to Tsai, it's crucial to have increased protection while on vacation, which you can achieve by using polarized sunglasses that do a better job at filtering light. Polarized lenses are especially great when driving, exercising outdoors, or doing water activities like boating. To determine the best quality sunglasses for men, we tested more than 20 pairs and value. Credit: Crap Eyewear View on Crapeyewear.com View on Urban Outfitters Contrary to this brand's startling name, these sunglasses definitely aren't crappy. We found The Heavy Tropix to be remarkably sturdy compared to others we tested. The frames are made with high-quality bioacetate, which is both biodegradable and plant-based. Where other sunglasses became floppy over time when the arms are folded too much, these stayed solid. We found that these sunglasses complemented any face shape, acknowledging the brand's promise that they "look great on just about everyone." One of our team members, for instance, had an oval shaped face and was very happy with the look. The tint was perfect for us; it's enough to block the sun with 100 percent UVA/B protection while still being useful at dusk. These sunglasses also come with polarized CR-39 lenses, which help to reduce glare and eye strain. In terms of style, we loved how these resembled aviators, but are also quite unique. but these are not too intense. There are also plenty of great color options in both tortoise shell and semi-transparent crystal frames which add to their character. The best part about these sunglasses is that they're such great quality despite being much less expensive than similar glasses from leading brands like Ray-Ban. Now if that's crap, you can take me right to the dump. The Details: 100 percent UVA/UVB protection | Polarized CR-39 (except dark tortoise bio) Credit: Travel + Leisure / Henry Wortock Credit: Trave / Henry Wortock Credit: Travel + Leisure / Henry Wortock Credit: Maui Jim has spent decades as a top sunglasses brand. In fact, one of our dads still wears his Maui Jim's from 30 years ago! Despite being a newer style, we found the Kõkua style to be a reliable option, especially for fishing. We wore them out on the water and on the beach, and they did an awesome job at blocking sunlight and preventing glare thanks to Maui Jim's PolarizedPlus2 lens technology. The lenses are also scratch-resistant and have blue light-blocking technology to protect your eyes from screen glare. If you're looking for a pair that stays on your face these are terrific. We even wore them out running and they stayed secure. The thing is, we found the style to be a bit underwhelming. There are so many sunglasses we don't feel bad wearing out and about. The Details: 100 percent UVA protection | PolarizedPlus2 lens technology Credit: Travel + Leisure / Bobby Nolan Credit: T Ban's classic styles, allow us to tempt you with a refreshed look. The Corrigan Bio-Based model has a fun style with the double hole in the bridge. It's cool without being too much. Not convinced yet? One of our team members usually wears simple styles and said he got so many compliments wearing these that he's officially a fun sunglasses convert Even his kids loved them. The frames of these sunglasses are made from bioacetate, having 67 percent bio-based carbon content. Despite being more eco-friendly than plastic, they held up well and handled a drop without any scratches. They're comfortable, too. We wore them on a 1,700-mile road trip, on more than a dozen bike rides, and five days of hiking and didn't notice any issues with tightness or discomfort on the nose. They're a tad pricey, but we found these Ray-Bans to be worth the splurge. The Details: 100 percent UVA/UVB protection | One polarized style (Polished Transparent Light Blue / Dark Brown) Credit: Travel + Leisure / Ben Anderson Credit: Travel + Leisure Credit: Travel + Leisure / Ben Anderson Credit: Travel + Leisure / Ben Anderson Credit: Travel + Leisure / Ben Anderson Credit: Amazon If you want to mix up your wardrobe, these affordable sunglasses available on Amazon do the trick. We wore them to the pool, while biking, walking, running and to a baseball game, and found they blocked the sun well enough for budget sunglasses. They didn't slide around too easily under dry conditions, but when we started sweating, we frequently had to push them up our nose bridge. The frames withstood our flex tests, but couldn't bend past a 90-degree angle like other sunglasses with metal hinges. In terms of style, they honestly weren't for us - but that doesn't mean they aren't for you. With the gold accents and flashy lens colors, they give off a Miami Beach vibe. We say they're
definitely worth a try at this price. The Details: UV400 Lenses Credit: Travel + Leisure / Adam Gray Credit: Travel + Leisure / Travel + Leisure / Adam Gray Credit: Travel + Leisure / Adam Gray Credit: Persol \$452 at Amazon View on Persol.com View on Persol.com View on Sunglasses, the Persol 714s continue to stand out as perhaps the most packable, easiest-to-transport shades on the market. After three months of tests, we found they fully blocked all sunlight and glare and were adequately polarized. However, we did find them to be a tad uncomfortable during extended use. Overall, we recommend these shades for someone who wants something very compact and who appreciates the style. The Details: L | UV-protected | Polarized Credit: Travel + Leisure / Maria Bouselli Credit: Travel + Leisure / all that time, we've never experienced any issues with glare, high-intensity light, or wind, and they haven't scratched. To put it simply, we love these sunglasses. Despite the name, the Ombraz Classic design. They're armless, meaning they have a cord strap instead of solid arms that perch over your ears. The advantage of this design is that you don't need to worry about broken hinges, and they hang easily from the neck when they're not covering your eyes. You can also quickly tighten the cord during any activity for a snug fit. The Details: Regular or narrow | UV protected | Polarized Credit: Travel + Leisure / John Somerall Credit: Travel + Le Leisure / John Somerall Credit: Travel + Leisure / John Somerall Credit: Warby Parker sunglasses are a casual, classic pair of travel shades. We found them to be comfortable with a roomy fit while remaining snug against the temples so they don't need constant adjusting. We also love Warby Parker's industry-defining offer to let you try on the sunglasses at home to see if you like them before making a commitment. Adding single vision correction (near, intermediate, or distance) starts at \$195, and you can book an in-person eye health exam through the site to find our your prescription if you don't already know it. These lenses passed our polarization test and we found they completely blocked all glare. Just keep in mind these Warby Parkers aren't made for more rigorous activities, like working out or playing sports. After carrying these shades around in bags for over six months, we noticed Some wear on the case, which isn't as sturdy as the glasses themselves. The Details: M, wide and extra-wide | UV protected Credit Travel + Leisure / David Louis Credit: Travel + Leisure frequent use over six months of tests. We found that the blue-tinted lenses cut the glare and wind in warm weather or snow, and they were supremely comfortable. The nose pads are soft and pliable, but not slippery. We also loved the overall quality of these wraparound sunglasses and found them to have the perfect combination of function and style The Details: 44mm | UV protected Credit: Travel + Leisure / Rob Lefebvre Credit: Trave protection as other options. Over six months of use, we continued to be impressed as we manipulated and put on the sunglasses, finding them to be some of the sturdiest we tried, thanks to metal rods that reinforce the arms so you won't have to worry about them breaking. The Details: Regular | UV protected Credit: Travel + Leisure / Michael Vlaho Credit: Travel + Leisure / Michael Vlaho Credit: Travel + Leisure / Michael Vlaho Go full Top Gun behind the wheel with these stylish aviators from Randolph USA. We loved the fit, especially due to the unique Bayonet tips that wrap around the temples. The materials used for these sunglasses are military-grade, so it's no surprise that we found them to be sturdy, lightweight, and looking completely untouched even after tossing them around during six months of use. The green-tinted lenses were impressive, too, and passed the polarization test. As for the style, we can't complain. Note that these are also available in a non-polarized option that is less expensive. The Details: 52mm/55m UV protected | Polarized/Non-polarized Credit: Travel + Leisure / Anna Knief Credit: Travel + Leisure / Anna fit and quality of these sunnies, but they didn't shine in terms of design or style when compared to others we tested. Persol 303292S: These pricey retro sunglasses during everyday activities like driving, shopping, running, and more for a period of three months. We examined the different parts of the sunglasses, including the lenses, arms, hinges, and bridge/nose pads, then put them on to check for fit, quality, performance, appearance, and value. We also conducted polarization tests to see whether sunglasses that were labeled as such were actually effective. Our tests continued for a total period of six months. Optometrist Jennifer Tsai recommends looking for 100 percent UV-blocking lenses (sometimes labels indicate "UV absorption up to 400mm"). Cheaper sunglasses may not offer this level of protection, even if they are made to be darker, which can cause pupils to dilate, creating a higher risk of sun damage. Polarized lenses are a great idea when partaking in water or snow sports like fishing and skiing, as exposure to the sun's glare can lead to eye damage. Many sunglasses brands offer a virtual try-on feature, which uses augmented reality to see how the shades will look on your face before buying. This is a great way to get a feel for how the glasses will look before making a commitment, and important since everyone's face shape is unique. Some companies, like Warby Parker, also let you try on the sunglasses at home with the option to return them if they don't fit perfectly. Frequently Asked Questions Polarized lenses have a special chemical filter that blocks sunlight and glare. These are especially ideal during water and snow sports, when the sun is extra reflective. Simply rinse and rub with a dab of simple dish soap on your finger. Then rinse again and dry with a clean, lint-free cloth. Sunglasses tend to be listed by the width of the lens, (i.e. 55mm), or in a general size like M (medium) or XL (extra-large). When trying them on, they should fit snugly across your nose and ears. If you want to protect your eyes as much as possible, opt for larger lenses that provide more coverage. Lens color can make a different levels of depth perception and contrast. Green can help block out blue light, helping with precision sports like tennis, baseball, and golf, or driving on sunny days. Brown can help increase depth perception, which is also beneficial for sports like golf and baseball. Red can help increase visual depth and contrast, which would be useful for skiing, cycling, and driving. Yellow can help increase depth perception, which is also beneficial for sports like golf and baseball. Red can help increase visual depth and contrast, which would be useful for skiing, cycling, and driving. sure-fire way to fix scratched sunglasses, despite what many say online. That said, it's worth a try. One way is to mix baking soda and water or vinegar and rub the paste on the lens with a microfiber cloth. You could also try doing that with toothpaste or baby oil. Other options are to use nail-polish remover and let it sit, or to buy specifically dedicated products. Many of these solutions cost between \$10-15, so at least it isn't a huge investment if it doesn't work. Here are some related items that you may also need if you plan on spending time in the sun. Oakley Carbon Sunglass Case: Even if your new sunglasses come with a case, these cases are usually soft and don't protect the glasses from getting crushed. So protect your investment with this hard shell carbon fiber case from Oakley. Garrett Leight Collector's Case: Don't protect just one pair of sunglasses, protect four with this handsome case. Tilley has a long history as a top brand, and this model has plenty of mesh to keep your head cool. Babo Botanicals Sheer Mineral Sunscreen Lotion SPF 50: Block UVA from your skin as well with this sunscreen, which came out on top in our tests. The liquid-type texture applies like a lotion, absorbs quickly and doesn't feel greasy. For this story, T+L contributor Joel Balsam summed up our team's reviews, added his own insights as an avid sunglasses for all occasions and is particularly happy with his pair of Vallon Heron Mountain and Resort Co Mazzo sunglasses. Love a great deal? Sign up for our T+L Recommends newsletter and we'll send you our favorite travel products each week. Edited by Jasmine Grant Updated by Asia London Palomba Sunglasses are an essential accessory for any man who wants to look stylish and protect their eyes from harmful UV rays. Whether you're looking for a fashionable accessory or reliable eye protection for your outdoor adventures, the VELAZZIO Sunglasses offer a versatile and high-quality solution. With their combination of performance, style, and durability, these sunglasses are a must-have for anyone who enjoys spending time in the great outdoors. When looking for the best sunglasses for men, there are a few key features to consider. These features to consider when buying sunglasses is the level of UV protection they offer. UV rays can cause damage to the eyes and increase the risk of cataracts and other eye conditions. Look for sunglasses that offer 100% UV protected. The lens material is also an important factor to consider when buying sunglasses. Different materials offer different levels of durability and clarity. Some popular options include glass, polycarbonate, and CR-39. Glass lenses are the most scratch-resistant but are also the heaviest. Polycarbonate lenses are lightweight and impact-resistant, making them a good choice for sports and other outdoor activities. The color of the lenses are lightweight and impact-resistant but are also the heaviest. choices that provide true color perception. Brown lenses are ideal for bright conditions, while yellow and orange lenses are best for low-light conditions. The frame material is another important factor to consider when buying sunglasses. Different materials offer different mat and acetate. Metal frames are strong and durable but can be heavy. Plastic frames are lightweight but may not be as durable. Acetate frames are lightweight and flexible, making them a good choice for people with sensitive skin. Finally, it is important to consider the fit of the sunglasses that are too loose or too tight can be uncomfortable. and may not provide adequate protection. Look for sunglasses that fit snugly but comfortably and that do not slide down the nose or pinch the temples. By considering these key features, men can find the best sunglasses to meet their needs and protect their needs and pro balance between style and functionality. With a wide range of options available, it's essential to prioritize both eye protection. Whether you prefer classic aviators, sporty frames, or modern designs, the best sunglasses for men are those that reflect your personal style and offer reliable sun defense. High Fiber, Protein MealsSongs For PrideBest Overall Sunglasses for MenNow 10% OffCredit: Ray-BanProsClassic, stylish designLightweight and comfortable Durable, according to testers Suitable for a variety of face shapesConsMay slide down nose It's hard to go wrong with these timeless Wayfarer sunglasses from Ray-Ban. Not only are they super versatile and a great choice for everyday wear, but they're suitable for a variety of face shapes. Our pros love their lightweight, comfortable design that dates back to 1952 and is available in 13 frame and lens combinations. You can even add a prescription if needed. They feature UV protection to protect your eyes from the sun and are available in polarized or non-polarized or non-pol brown tortoise shell print elevates the look, so he feels comfortable wearing them at the pool and to the office. They have polarized lenses, so he loves that he can see things clearly without a ton of color distortion, too." UV protectionYesPolarizationOptional2Best Value Sunglasses for MenCredit: GoodrProsAffordableExtremely lightweightEffectively stay in place during activity ConsNot as durable as other sunglasses Our product analysts have tested several pairs of good sunglasses and though we'll admit that they're not the most durable, they check off a lot of boxes. Not only are they super stylish and available in tons of fun colors and designs for both men and women, but they're super lightweight and come at an unbeatable price. Our pros found that they resisted sweat effectively and stayed in place thanks to a grip coating, biking, hiking and more. "They look good, are well-made and super affordable," says one GH editor.UV protectionYes, UV400PolarizationYesAdvertisement - Continue Reading Below3Best Polarized Sunglasses for MenCredit: Costa Del MarProsHighly effective polarization Multiple lens shade optionsLightweight and comfortableGrip pads keep sunglasses secure ConsNot as attractive for everyday wear Costa sunglasses are made for the outdoors, and our product analysts especially love them for days on the water. They feature grip pads that keep the glasses securely on the bridge of your nose and are available in six lens colors, including blue, green and gold. You also have the choice between glass and polycarbonate polarization, both of which help make objects crisper and brighter even in harsh sun. For those seeking maximum clarity and virtually zero reflective glare, you should opt for glass polarization.UV protectionYesPolarization.UV protectionYesPolariz sunglasses will make you feel like a rock star. What we like most about them is that they're unisex and suitable for a variety of face shapes. Choose among 15 color combinations, including a gold, black matte and rose gold frame as well as tons of lens colors. Polarized lenses are available for those who want the sharpest clarity, and adjustable nose pads will help the sunglasses from sliding down your face. Our pros do warn, however, that they're a bit more fragile than other sunglasses for MenCredit: Warby ParkerProsTrendy designAffordableEasy to use virtual tryon feature Excellent customer service ConsOversized fit may not be suitable for all face shapesWarby Parker is a popular choice for all types of glasses, offering hundreds of styles you can purchase directly online. Take advantage of home try-on if you're undecided or use the virtual try-on feature to see in real-time whether the frames suit your face. According to our pros and previous Lab tests, the brand's customer service is top-notch should you run into any issues. Though we could easily recommend several Warby sunglasses are available in three shades, including a sleek black and gold combo. However, note that the oversized lenses and wide frame might not be suitable for narrow faces.UV protectionYesPolarizationNo6Best Sports Sunglasses for MenCredit: OakleyProsAvailable in 32 colors Lightweight, durable design ideal for performance with style, these iconic Oakley sunglasses are made for outdoor enthusiasts and are designed to withstand impact. They feature nearly 7,000 five-star Amazon reviews, with online consumers raving about their comfort, quality and style. Our pros love that they're available in up to 32 gorgeous color combinations and are even customizable online. When it comes to lenses, you can opt for polarization or even upgrade to a Prizm lens for optimized color, contrast and detail, according to Oakley. Just keep in mind that nose pads aren't built in so the glasses are at risk of sliding down in heavy sweat. UV protectionYesPolarizationOptionalAdvertisement - Continue Reading BelowOur product experts narrowed down the best sunglasses for men based on previous Lab tests of prescription eyewear and our decades of expertise reviewing glasses. To make our selections, we reviewed each selections, we reviewed each selection for specs such as material, price, design and construction, taking note of UV protection as well as polarization. Not only have we been hands-on with several of the brands and picks featured above, but we included selections that our editors, analysts and consumers love. activity you need your sunglasses for will determine which sunglasses for running, consider a lightweight pair with nose pads to help keep the glasses securely on your face as you bounce up and down. If you plan on using your sunglasses for running, consider a lightweight pair with nose pads to help keep the glasses for running, consider a lightweight pair with nose pads to help keep the glasses for running. reduce glare and improve clarity. < Comfort: Because you'll be wearing sunglasses for hours at a time, they should be comfortable. Look for models made of lightweight material) to prevent glasses from sliding down too much in case of heavy sweat. If your sunglasses feel too tight on the sides of
your head, make sure to purchase a wider fit or consider taking them to a professional for adjustments. < Style: Sunglasses come in all sorts of shapes, sizes and styles. Though there's no one-style-fits-all, make sure to choose a pair that speaks to you. Unfortunately, not all styles work with all face shapes so it's best to try on sunglasses beforehand in person or virtually. Advertisement - Continue Reading BelowOur style experts always recommend trying on sunglasses in person before purchase online, "my tip is to use the virtual try-on feature that many sites have," says Chiara Butler, a product analyst at the Good Housekeeping Institute. "They use your phone or computer camera to give you an idea of how the glasses will look on your face." We also suggest double-checking return and warranty policies as well as whether free trials are available. Product analyst and writer Olivia Lipski covers everything from consumer electronics to travel, home, fitness and more. She regularly collaborates with our GH Institute Labs to test and review products, ranging from smart glasses to sweaters for men. In preparing for this story, she consulted with Chiara Butler, product analyst at the Good Housekeeping Institute's Beauty, Health & Sustainability Lab, who has extensive experience reviewing eyewear like prescription glasses. Olivia is a graduate of the George Washington University, with a bachelor's degree in journalism, political science and French, and she holds a master's degree in communications from Reading Below Sunglasses season never ends, however, amid a series of sales and discounts, the time is ripe to update your collection with the best frames of seasons past and present. Whether you're a serial sunglasses wearer à la Anna Wintour or you're simply looking for a pair to elevate days out, there's no shortage of stylish shades. In addition to the usual stock of aviators and wayfarers, with their timeless appeal, a couple of additional noteworthy eyewear trends to be aware of right now is that for futuristic wrap-around styles (epitomised by everyone from District Vision to Balenciaga) - both very much 1990s- and 2000sinspired. Whatever style you choose (classic shapes are good too) it's not always easy picking a new pair of sunglasses, especially with the opportunity to try them on in-store sometimes being limited. Pile that on top of the breadth of choice in lens strengths, colours, and polarisation (glare protection) options, and it can all become rather baffling. As a general rule, always consider face shape. If you want to wear your glasses more than once, it would be smart to consider what actually looks good on you. Square faces, for instance, will be nefit from the soft curves of rounder faces, on the other hand, might consider opting for square or rectangular styles such as wayfarers to harden their features. Here, to guide you through the jungle of competing eyewear brands, we've rounded up a selection of the very best men's sunglasses for various face shapes, all of which boast a style that transcends the beach alone. Simple. We know our stuff, we do our research, and we get out there to experience as much product as possible. Our section head of menswear for GQ Recommends, Heidi Quill, is obsessed with clothes, bags and accessories. Joining British GQ in 2021, Heidi might primarily look after clothing content, but she spends a healthy amount of time up to her neck in samples, checking product for the very best quality, price and design, all before recommending it to you. That includes knowing everything there is to know about an excellent pair of sunglasses. The weather is heating up, and thusly our need for a good pair of shades is following. Luckily for you, Heidi and our team of contributing writers and freelancers (Jessie Atkinson, Faye Fearon and Adam Cheung) have styled, loved, tried and tested the above products to bring you only the best. For more fashion, grooming and technology releases delivered straight to your inbox, sign up for our GQ Recommends newsletter. Shop GQ's edit of the best sunglasses to buy in 2025... Never underestimate the intrinsic power of a superlative pair of Sunnies. The best pair of Aviators infuses a certain Tom Cruise-cool into your everyday aesthetic. A classic pair of Wayfarers transforms us into James Bond look-alikes in an instant. Not to mention the retro-inspired round silhouette popularized by Lennon in the 60s. And the instant success imposed by a gentleman's pair of Clubmasters—David Beckham fans, we see you. However, as important as style is when it comes to picking your desired shade of cool, there is so much more than meets the eye regarding a perfect pair of sunnies. Like our best sunglasses for women (with Randolph USA topping the list), the best sunglasses for men are as functional as they are fashionable. Lest we forget, that the elevated everyday essentials need to be able to withstand heavy use (guaranteed by our rigorous testing methods.) From square shades to reflective lenses, there are so many different types of sunglasses to choose from. But after trying hundreds of different brands and styles, there are so many different brands and styles. men. Suave, sophisticated, and sustainable, we think that these quality shades are straight-up visionaries—literally. In a rush? No problem! Here's our shortlist of the absolute best options available right now: BEST OVERALL RANDOLPH American-made, military-spec sunglasses that are stylish, strong, and guaranteed for life. Durability: 5/5 Style: 5/5 Craftsmanship: 5/5 Frames: Metal Positive Impact: 4/5 Price: \$\$ BEST LUXURY GUCCI If La Dolce Vita were a pair of sunglasses, we can bet it would be these runway-worthy aviators from Gucci. Durability: 4/5 Style: 4.5/5 Craftsmanship: 4/5 Frames: Plastic Positive Impact: 4/5 Frames: Plastic Positi best sunglasses for you and your lifestyle. We also have a dedicated guide to the best sunglasses for women. Fit to fight your daily battles; you won't need an army of sunglasses when you invest in a reliable pair of military-spec Randolph. With a talent for coaxing out the adventurer in all of us, the Randolph Aviators are top-dog shades for top-dog guys. Winking at their fighter-pilot heritage, this pair of aviator sunglasses will endure the test of time—well, if the last century is anything to go by. Randolph Engineering literally builds its sky-ready frames to precise and rigorous military specifications (read: the highest possible standards). No wonder Randolph's aviators caught the eyes of US Air Force and Army pilots for decades. Combining sleek matte-black metal frames with scratch-resistant polarized lenses that will stand up to the most unforgiving elements, these stylish and sturdy Randolph Aviators merit a place in your daily armory. And as any pair of Randolph, a medal for exemplary durability. Best for: A timeless style that commands authority. Polarized:YesFrame:MetalFit:Regular/LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Polarized When it comes to luxury, in Gucci sunglasses for men, we trust. Boasting a runway-worthy aviator style, these stand-out frames will literally tempt you to wear these Gucci men's sunglasses indoors (but please don't) The retro
shape remains en vogue and will see you through season after season, while the Gucci logo subtly lets onlookers know you're into your haute couture—without being ostentatious. Best for: A high-fashion statement to elevate any outfit. Polarized:YesFrame:MetalFit:LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Solid Crafted in the iconic wayfarer style, the Sheldon sunglasses by Yesglasses make neat and sleek style accessible to all. Mirroring high-end styles, the beauty of these big sunglasses don't scrimp on features, finished with anti-glare and anti-scratch coatings. (Yesglasses is known for their wide range of high-quality, affordable glasses. See our Yesglasses review for more details). Best for: Maximum charm for minimal cost. Polarized:YesFrame:PlasticFit:Narrow/Medium/WideProtection:100% UV400 (UVA & UVB) ProtectionVLT% / Lens Category:Dark/Medium/Light Typically polarized sunglasses come with a relatively hefty price tag, so naturally, we were intrigued by these popular sunglasses for under \$100? Beforehand, we would have said no, but after wearing this pair daily for a couple of weeks, we retract that statement. If you're anything like us, we prefer to keep two types of sunglasses—the pair that you take to garden weddings and the pair that you keep in the car (and occasionally sit on.) This pair is the latter. Made from cellulose acetate, the frame is strong and sturdy. While the polarized lenses offer ample eye protection, alongside increased clarity and comfort The fact that the Seaports are also sleek and stylish makes them a no-brainer. Best for: Sailing through life in affordable luxury. Polarized: YesFrame: Cellulose acetateFit: WideProtection VLT% / Lens Category: Dark tint You may have these sunglasses in any color as long as it's black. But there's something special about the Vincero The Villa—shades: notice the temples? It's Italian marble. Yes, channel your inner signore and rock this coveted style with absolute confidence. Understated, lightweight, and with a decidedly premium feel, these are our favorite black sunglasses. Best for: Channelling your inner minimalist. Polarized:YesFrame:Cellulose acetateFit:WideProtection:100% UVA/UVB protectionVLT% / Lens Category:Dark The perfect accompaniment to any get-up, clear sunglasses let your outfit (and your vibe) do the talking while quietly affirming your place on the style podium. Axel Arigato shines with their Jet Square Sunglasses, with contrasting blue lenses and crystal clear cellulose frames. Of course, just like the brands' uber-cool sneakers, there's a hint of luxe: in the form of the subtle Arigato logo adorning both temples. Our thoughts? 1,000 times yes. (Disclaimer: we are big fans of Axel Arigato and its playful take on Scandi-Japanese minimalism). Best for: Effortless poise with a cerebral flair. Polarized:YesFrame:Cellulose acetateFit:OversizedProtection:100% UV protectionVLT% / Lens Category:Light Sunglasses—but make them yours. You're free to design everything from frame width to prescription type, and even the lens material. Made by you, for you, these not-quite-round Warby Parker sunglasses also ensure your peepers stay protected in blazing sunshine. Not to mention the impact-resistant materials, ideal for mirroring your go-getter corinthian spirit. Best for: Manifesting double rimmed frames and Italian workmanship, these designer sunglasses serve up flexible nose pads for comfy all-day wear, too. Injecting a deluxe accent to any look, be it a casual tee-and-jeans or a dapper suit, the Hugo Boss Titanium Sunglasses channel a "just stepped off my billion-dollar yacht" vibe. Into it? We certainly are. Best for: Quenching your lust for a splurge. Polarized:NoFrame:TitaniumFit:RegularProtection:N/AVLT% / Lens Category:Medium Compact and portable, Rimowa's Foldable Matte Black Sunglasses place functionality at the core of design (well, just under unbeatable style, naturally). So, it'll come as no surprise that they're designed in Germany, and made in Italy. Crafted from strong aluminum, steel, and with a pilot design, you'll be ready to take to the skies—or just the terrace—in these handsome sunnies. Plus, they can be folded neatly and easily package. Polarized:YesFrame:Aluminum and stainless steelFit:RegularProtection:100% UVA/UVB protectionVLT% / Lens Category:Dark Shaking up classic tortoiseshell with hints of rich blue, the Robert Graham Wyatt Sunglasses hit an elusive sweet spot. Putting the "fun" in functional, the Wyatt sunglasses are The Ones for the guy who doesn't take life too seriously. Best for: A generous dash of avant-garde. Polarized:YesFrame:Metal and acetateFit:LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Medium Not guite got the 20.20 vision you'd hoped for? Don't fret: you'll still look the business in Liingo Eyewear's men's prescription sunglasses. 30% lighter than run-of-the-mill lenses, these supply that barely-there feel. Oh, and the style? Just teetering on the cool side of hipster. Practical for driving and moonlighting as smart eyewear, the Liingo Eyewear Sunglasses are eye-deal. Best for: Indulging the hipster within. Polarized: YesFrame: Premium polycarbonateFit:LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Optional Your new look is just a-round the corner; Oliver Peoples Forman L.A sunglasses are on-hand to give your wardrobe a vintage-inspired boost. Combining failsafe tortoiseshell with subtly-rounded frames, these are a match made in heaven—but don't worry. there's room for one more. Dashing and debonair, these Oliver Peoples sunglasses will see your style skyrocket. Best for: Softening a knife-sharp suit. Polarized:YesFrame:AcetateFit:LargeProtection:100% UV protectionVLT% / Lens Category:Medium Brown sunglasses are equally versatile, but allow for a slightly softer aesthetic. And if you want to steer clear of the sleek and stealthy James Bond aesthetic we recommend this understated (yet sophisticated pair.) Featuring rounded edges, the Scandi shade takes its style cues from Denmark's evergreen slopes, taking on a classical-but-contemporary aesthetic. And we love that you can pop them on anytime without feeling OTT. Like our other favorite Nordgreen shades, this Samso pair offers full UV protection, making them a win for outdoor adventures. Plus, the bio acetate frame is durable enough to take the occasional accidental tumble (emphasis on accidental, we don't advocate intentionally throwing your shades around.) Best for: A contemporary take on all-time classics me: Bio acetateFit: Medium Protection: 100% UVA/UVB protectionVLT% / Lens Category: Medium tint It's hip to be square—or so the bohemians say. And whilst these square shades aren't too different from your traditional sunnies, we appreciate that the Nordic brand is doing something different. Nordgreen's Giving Back represented by the square shades aren't too different from your traditional sunnies. means that a portion of every purchase is contributed to various charity organizations. But how do the actual sunglasses hold up? We were immensely impressed with the elegant and durable unisex design of these Scandi shades. Affordably priced, the cool sunglasses aren't polarized, but bio-based polyamide lenses do offer full UV protection, which is good enough for us most of the time. And even though the silhouette is considered square, the rounded edges make these Bornholm sunnies more versatile for different face shapes. Best for: It's hip to be square—but make it timeless. Polarized:NoFrame:Bio acetateFit:MediumProtection:100% UVA/UVB protectionVLT% / Lens Category:Medium tint As much as mirrored shades are a fashion statement—and that they are, just ask Brad Pitt or Zac Efron—they are also highly functional. Mirrored sunglasses are made equal, and some are definitely purely for style (with minimal utility.) If that's why you're after, you won't be short of options, but if you're looking for a pair that reflects (pun intended) quality and style, we recommend this pair by Yesglasses. As one of our best sunglass styles, Yesglasses' square frame is great for highlighting contours in rounder faces. We appreciate that you can have them fitted with prescription lenses. And that these Yesglasses are affordable enough to invest in more than one pair—an investment we wholeheartedly endorse, especially if you're particularly prone to breaking glasses (guilty as charged.) Best for: Mirroring your inner functional fashion. Polarized:NoFrame:AcetateFit:MediumProtection:100% UVA/UVB protectionVLT% / Lens Category:Mirrored Razzle-dazzle and retro, and the Retrosuperfuture sunglasses achieve a solidly retro vibe—with a hint of futurism for extra beguile. The back-to-the-future stand-out frames are a statement in themselves, working to rewind your outfit to a funky-fresh era. Finished with tinted lenses, wide temples, and gold-tone hardware, these retro men's sunglasses are nostalgia, reworked. Best for: A dapper jaunt down memory lane. Polarized:NoFrame:AcetateFit:LargeProtection:100% UV protectionVLT% / Lens Category:Dark Aptly named The Marshall, these power sunnies exude an air of authoritative sophistication. Featuring a hardcore top bar and gold frames, the navigator silhouette speaks to the iconic '80s style. The polarized lenses reduce glare, enhancing visual clarity and comfort. While the scratch-resistant coating means that you don't have to stress about the odd accident. But the most notable feature of these Vincero shades—and why they are undoubtedly some of our favorite sunglasses for men—is the brand's customizable fit. Constructed with a stainless steel core and 5-barrel hinges, the flexible temples allow for a tailored fit, meaning that they always stay on, regardless of how many times you shake your head (yep, we got a little dizzy testing that one for you.) Best for: Power dressing comfortably. Polarized:YesFrame:Stainless steelFit:WideProtection:100% UVA/UVB protectionVLT% / Lens Category: Medium
tint For a smooth-sailing look that's universally flattering, opt for one of the most iconic designer sunglasses in the world—Ray-Ban Aviator Classic sunglasses in the world—Ray-Ban Aviator Sin 1937, these men's raybans are as handsome and timeless as ever. The iconic gold frames and brown gradient lenses provide a hint of retro, while the classic shape salutes to their military inception. Whether you're flying Concord or hitting the town, the Ray-Ban Aviator Classics will be your faithful co-pilot, keeping you looking fly. Best for: Connoisseurs of all things cool and classic. Polarized:Yes, optionalFrame:MetalFit:OversizedProtection:100% UV protectionVLT% / Lens Category:Optional If you're looking for a fashion pair of shades that are also well-made, these designer sunglasses by Axel Arigato are unrivaled. Detailed with a contrasted white logo along the temples, the black frame embodies the avant-garde brand's signature style. And the dark UV protection lenses take looking at life on the second state are also well-made, these designer sunglasses by Axel Arigato are unrivaled. through rose-tinted glasses seriously. The silhouette is unmistakably cat eye, albeit more subtle than most. The unisex frame hits the elusive sweet spot between understated and obvious. And while the modern details guarantee style-icon status, the minimalist design is also easy to wear on many occasions. Pair them with an oversized hoodie and sneakers. Or dress these Axel Arigato shades up with a blazer and slacks. Either way, you'll be taken seriously in fashionable circles. Best for: Letting the next in fashion cat out of the bag. Polarized:NoFrame:Cellulose acetateFit:MediumProtection:100% UVA/UVB protectionVLT% / Lens Category:Dark tint Guys, if you're seeking style for miles (and who isn't?), you know who to consult: Tom Ford. These rectangle-frame sunglasses by Tom Ford are the ultimate in easy-breezy styling. With universally, you need only to add these shades to your look with a spray (or two) of Tom Ford cologne, and you're sizzling. Best for: Refining your style to the T. Polarized:YesFrame:AcetateFit:OversizedProtection:100% UV protectionVLT% / Lens Category:Dark tint A nod to the classic 90s style, we could definitely see Harry Styles in these luxury sunglasses. The elegant rectangular frame is unimposing yet totally on-trend. And we adore the decadent detailing, such as the brand's signature Web enamel and interlocking Gs on gold-toned temples. When it comes to durability, these aren't the sunglasses that we're taking up a mountain—they're simply too special for that—but they are the kind we'll wear aboard a cruise ship or whilst sipping cocktails on the terrace. lined velvet case is just a bonus. Naturally, Gucci sunglasses are more expensive, but if you're looking to invest in a lifetime designer pair, these timeless shades are well worth the price tag. Best for: Channeling your inner '90s style. Polarized:NoFrame:Gold-toned metalFit:MediumProtection:100% UVA/UVB protectionVLT% / Lens Category:Ligh and dark tint. In case you needed a reminder: Ray-Ban Wayfarers are the ultimate cool sunglasses. Period. Your street cred spins into overdrive as soon as you slip them on, propelling your look from drab to dapper in a split second. Pairing with any outfit like Barolo with Wagyu, every man needs a pair of iconic men's Ray-Ban sunglasses to rock a classic look, every day. Best for: Channelling your inner icon. Polarized:Yes, optionalFrame:AcetateFit:LargeProtectionVLT% / Lens Category:Medium Hey, if you're a man about town, you need sunglasses that can keep up with your tempo. As far as quality goes, you can't do better than handcrafted sunglasses by Randolph Engineering—literally designed for U.S military personnel. Built to army specs (meaning: the highest-flying standards) but slightly modified for comfort, it's the sweat bar that seals the deal for us. Classic. Cool. Confident. Trust us: they'll see you through a desert storm in suave style and colossal attitude. With their enduring style and durable materials, these Randolph's Aviator II will see you through virtually anything and will last you forever-every pair comes with a lifetime warranty. Well, if that doesn't convince you of the uncompromising quality, maybe Tom Cruise will... Best for: High-flying guys who never stop moving. Polarized:YesFrame:Chrome or 23k GoldFit:Regular and LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Optional Like your classic suit, sleek pair of Oxfords, and your watch, timelessness is vital when it comes to shades. Enter: Persol. Outliving blink-and-you'll-miss-it trends, so you can go back to them year after year. And don't worry—you'll still be as a la mode as the day you bought them. Boasting green lenses, Havana frames, and inherent Italian finesse, the Persol 649s are a mood of their own. Best for: Keeping your style soaring above fickle trends. Polarized:NoFrame:AcetateFit:LargeProtection:100% UV protection:100% street style. Not only will they obscure tired eyes after a raucous night, but the subtle Saint Laurent logo and stand-out shape will propel you firmly into the realms of high-fashion, no effort necessary. Best for: The morning after the night before. Polarized:NoFrame:AcetateFit:OversizedProtection:100% UV protectionVLT% / Lens Category:Dark Big bold, and oozing enviable bravado, these oversized sunglasses for men are a statement and a half. Understated frames offset the swagger-level size, so you stay decidedly on the right side of sophisticated. We love the lightweight acetate structure, giving the Gentle Monster sunglasses a barely-noticeable feel—but don't worry, unnoticed is the last thing you'll be. Best for: Turning heads left, right, and center. Polarized:YesFrame:AcetateFit:OversizedProtection:100% UV protectionVLT% / Lens Category:Dark Guys, we know you (probably) feel your coolest when you're driving—one of the fastest cars in the world (a man can dream). So, don't ruin the vibe with inferior sunglasses. Slip on the Clubmaster Ray-Bans, and you'll feel like a new man, even without new wheels. Iconic, effortless, and with the inexplicable ability to turn any man into a Pulp Fiction extra, your eyewear 'drobe needs these Clubmaster Ray Bans. Best for: Road-tripping with the inexplicable ability to turn any man into a Pulp Fiction extra, your eyewear 'drobe needs these Clubmaster Ray Bans. Best for: Road-tripping with the inexplicable ability to turn any man into a Pulp Fiction extra, your eyewear 'drobe needs these Clubmaster Ray Bans. Best for: Road-tri Lens Category: Medium Could we talk about the best sunglasses for men without giving Oakley the stage? Of course not. Their Holbrook sunglasses are made for the slopes, featuring a lightweight yet solid design that'll stay put while you carve up those pistes. Complete with HD optics, you'll see every glacial glint and mountain peak—no squint necessary. Best for: Staying suave on the slopes. Polarized:YesFrame:PlasticFit:Extra LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Polarized Everyone loves a guy in uniform—are we right? But of course, in high-pressure environments (go you, seriously), practicality must come first. However, with the Oakley Half-Jacket 2.0 sunglasses, you can enjoy panache and practicality by the ambulance load. With sturdy plastic frames and an authoritative aesthetic, these are a set of serious shades. Best for: Staying cool under pressure. Polarized:YesFrame:AcetateFit:LargeProtection:100% UVA/UVB protectionVLT% / Lens Category:Dark More than anything else, the pair of sunglasses that you take traveling have to be able to endure confined spaces (like overpacked suitcases), countless falls (along the trail), and the odd sit-on (because, let's be honest, that's unavoidable.) And depending on where exactly you're taking this accessory, you probably don't want to risk cracking your designer pair. Our solution? This is a construction of the trail, and the odd sit-on (because, let's be honest, that's unavoidable.) And depending on where exactly you're taking this accessory, you probably don't want to risk cracking your designer pair. affordable pair by Huckberry. These trendy sunglasses are the perfect compromise between sporty and stylish. The wayfarer frame is lightweight and easy to wear. And we couldn't believe that the under \$50 dollar price tag came with polarized lenses. Our only regret? Only buying one pair. Because if you happen to lose
your Huckberry Weekenders along the way, you almost certainly won't find a quality polarized pair anywhere close to this price point. Best for: Cycling along the Seine. Polarized:YesFrame:Heavy-duty plasticFit:WideProtection:100% UVA/UVB protectionVLT% / Lens Category:Medium tint Break hearts without breaking the bank with the Tomahawk Neuralyzers, coming in a classic wayfarer shape that we all know and love. One of the lower-priced sunglass brands—yet overflowing with style, we can't fault these men's sunglasses under \$50. Serving up a clean, crisp, and together aesthetic and impact-resistant smoke lenses to survive the occasional bash, nobody would suspect these Tomahawk shades for men cost less than a couple of cocktails. But seeing is believing. (You're welcome.) Best for: Modish look for a modest cost. Polarized:YesFrame:AcetateFit:LargeProtection:100% UVA/UVB protection:100% UVA/UVB pro in 2017, Yesglasses not only has some of our best sunglasses for men, but the online brand is also one of the most seamless shopping experiences. Featuring an extensive range of eyewear—including sunglasses—you can almost always find exactly what you're looking for. From tinted, gradient, mirrored or polarized lenses to rimless, oversized, cat eye, square or aviator frames, we took to the site in search of stylish prescription sunnies and found it incredibly easy to customize a pair to our exact preferences. Yesglasses is also one of our most affordable quality guarantee, making it an easy decision to try out a pair (or two or three.) Founded in 2017, the Danish brand epitomizes Scandinavian attention to detail with modern minimalist designs that are flawlessly engineered. Featuring bio acetate frames and bio-based goes towards education in India, clean drinking water in Africa, and rainforest preservation in Latin America. If we needed another excuse to purchase another pair of our best sunglasses—which we didn't—Nordrgeen's sustainable and philanthropic efforts are it. Since the brand's inception in 2012, we have been huge advocates of Vincero's luxury timepieces. But now we're discovering that Vincero's quality watches aren't the only thing worth visiting the brand's website for. And as one of our best sunglasses are made from high-quality materials. They are sophisticated, stylish and made to last. All Vincero sunglasses are polarized and feature customizable fitting. Vincero is also carbon-neutral certified and goes to extreme measures to ensure that all its products are ethical and simple. No crowded malls to wade through. No long lines to test your patience. But, shopping online does have some of its own challenges. Without the ability to try on sunglasses or look at details in person, it can be easy to feel uncertain about your purchase. Don't worry. We have compiled our top tips for purchasing sunglasses online. as it may seem. There are a few key things to consider that will help you find a perfect pair. Knowing the size of your face can be a big help in choosing the best sunglasses. Sunglasses companies usually list the frame width with each pair. By measuring the distance between your temples, you can determine a good frame width for your face. If your face is between 10cm and 12cm wide, go for a frame width of up to 50mm. For a face that measures between 12cm and 14cm wide, choose a frame width of 56mm or above. High-quality sunglasses often have features that are adjustable or can be made custom to you. Take advantage of these features, especially when ordering online. Options such as adjustable nose bridges or arms that fit your face perfectly are great ways to make sure that your frames will fit your face perfectly are great ways to make sure that your face perfectly are great ways ordering online is to go visit a professional adjusted. Face shape plays an important role in deciding what sunglasses will fit best. In the next section, we will discuss which sunglasses shapes work best for each face shape. For each shape, there are certain pairs that will look better and certain pairs that will be be the certain pairs that we be the certain pairs can avoid ordering the wrong style online. Go with a shape like aviators or something square. Stay away from circles as this will draw out the roundness in your face. If you have an oval face, you are one of the lucky ones. Most frame shapes will look great on you. The only thing you should stay away from is sunglasses that are bigger than your face. If you have a square face, think soft lines and round shapes. The set types of frames will offset the hard lines in your face shapes. The only thing to stay away from is smaller frames. If your face is heart-shaped, you will want to choose sunglasses with sharp corners and lines. Steer clear of anything teardrop-shaped or oversized. Most frame shapes will work with this face shape. The only thing to avoid with a diamond-shaped face are frames that are larger on top than they are on the bottom. Something teardrop-shaped will work well. When purchasing sunglasses, there are a few different types of features to know about. Knowing what you want in each type of features to know about. lifestyle. Finding the right fit means finding sunglasses that fit your face shape and facial features. You don't want frames that go beyond your temples, but you also don't want them too small for your face. Measure facial width and use this to help you find the right size sunglasses for you. There are so many different shapes of sunglasses. You can find aviators, square shades, circular sunglasses, and everything in between. The key to finding the right shape frame for your face is knowing y are made of plastic or metal, but not all plastics and metals are created equal. You can find lenses that are tinted in all sorts of colors. The color of the tint impacts how the light from above but don't change your view straight ahead. Red or pink lenses may look cool but they can alter colors and make it difficult to see traffic signals. Figure out how you will most often use your sunglasses and decide which lens tint will work best from there. Cataracts, corneal sunburn, and a range of other eye problems can all be caused by prolonged exposure to UV rays. Nobody wants that. Still, protecting your eyes from the UV rays of the sun can feel like a daunting task. We know, it seems like there are about 756 different types of lenses straight, so you can protect your eyes safe from UVs? Choose lenses that claim they protect you from the sun the best. These are hands-down the best way to protect your eyes from UV rays. They do minimize the glare of
the sun off of reflective surfaces, and this can be helpful. However, these are not the answer if you are trying to avoid eye damage caused by UV rays. Getting darker lenses does not mean you are trying to avoid eye damage caused by UV rays. protected lenses for the best protection. What men's sunglasses are in style this year? Men's sunglasses that are in style this year include tortoiseshell and black sunglasses for the best sunglasses for the best sunglasses for the best sunglasses are in style this year? Men's sunglasses that are in style this year include tortoiseshell and black sunglasses for the best sunglasses for th men for the latest fashion sunglasses and forever classics you need. What is the most popular style of sunglasses for men? Some of the most popular style of sunglasses for men? Some of the best UV protection for sunglasses? The best UV protection for sunglasses are sunglasses that have 100% UV protection. Additionally, sunglasses with frames that wrap around the side of your eye. Credit: Ruben ChamorroProsClassic, timeless style that looks good on everyoneA wide range of frame and lens colors are availableAcetate frame is extra robust and durableConsNon-polarizedWayfarer is a classic shape that was first introduced in the 50s and achieved cult status in the '80s, courtesy of so many stars wearing them—Tom Cruise, Michael Jackson, George Michael, and Madonna, to name a few. Now, with a few stylish design tweaks, the classic Wayfarer style is donning a modern look that's worthy of your attention, and we found that the style works for just about every face shape, and works with just about every fit. In our testing, we found that the style works for just about every face shape, and works with just about every face shape. hinges on each side. While this design does make the whole thing a bit heavier than most sunnies on this list, our testers didn't complain, and in fact, found it just as comfortable, especially because of how smooth the frames felt against the skin. A wide range of frame and lens colors are available in the Original Wayfarer, but we honestly prefer the old-school black the best. For pure versatility, the black is unbeatable. While sunglasses for men have a strong style statement, they're essential for protecting your eyes from harmful UV rays. The best sunglasses for men have a comfortable yet lightweight design that doesn't pinch (especially around the temple and nose bridge) and offers UV protection After extensive research, our top pick is Ray-Ban's Justin Rectangular Sunglasses, a wayfarer-inspired option with polarized lenses. We also recommend Raen's Adin Square Sunglasses for its style appeal and Warby Parker's Fletcher Sunglasses if you need a prescription pair. The best sunglasses for men have a comfortable, lightweight design and provide UV protection.ILLUSTRATION: FORBES / PHOTO: RETAILERS Not all sunglasses are polarized, so depending on where you wear your shades, it's a worthwhile feature to look for. Polarized lenses help reduce glare and enhance visibility, which is especially useful for driving or outdoor activities. "While certain shapes can help accentuate your favorite features or create balance, the three biggest factors when shopping for new frames are comfort, proper fit and personal style," says Kim Nemser, chief product and supply chain officer at Warby Parker. Ahead, all the best sunglasses for men according to our fashion team. MOST POPULARAmazonRay-Ban Justin Rectangular SunglassesMaterials: Injected (plastic) | Polarized: Yes | Color options: 28 total, including Matte Rubber Black and Matte BrownThese shades are reminiscent of the classic wayfarer sunglasses, but with slightly larger lenses for a cool and modern feel. The rectangular shape looks good on just about every face shape, and the plastic construction has a substantial weight that doesn't feel flimsy or breakable. We also appreciate the wide range of color options: 5 total, including Black and Emerald GreenIf you don't want to spend a fortune on your sunglasses, consider this wearable style with softened square edges. They're crafted from acetate, a plant-based plastic with a lightweight feel, a popular material many brands use. The polarized lenses are also shatter-proof to enhance their durability. If you're looking for something a bit more fashion-forward, try the Aviator One-Bridge Modern Square Sunglasses or the Double-Bridge Rectangular Men's Sunglasses. Materials: Acetate | Polarized: Yes | Color options: 3 total, including Black Gloss/Antique Pewter and Tortoise/Antique GoldMaui Jim's Kawika Polarized Sunglasses are a popular choice whether you're hitting the golf driving range or heading to lunch with friends. Polarized lenses, which are treated with a special coating or film to block a specific type of light, reduce glare and enhance visibility, making it easier to see during outdoor activities. They're comfortable too, thanks to the nose pads and spring hinges. Materials: Acetate | Polarized: Yes | Color options: 3 total, including Cirus/Vibrant Brown and Eden/Vibrant Brown Raen has a wide selection of stylish sunglasses under \$250, including this pair with a flat brow and wide, rectangular lenses. The brand's sunglasses are made from durable zyl acetate and have five-barrel hinges with reinforced temples. Plus, the polarized lenses give you 100% UVA/UVB protection. If you prefer a more rounded shape, we recommend the Alvez. Materials: Hand-polished cellulose acetate | Polarized: Yes | Color options: 4 total, including Antique Shale Fade and CrystalWarby Parker is a well-known brand that manufactures eyeglasses and sunglasses (or any other lens customization); choose from single-vision, progressives or readers. Keep in mind that the price increases with the more customizations you add. Pro tip: If you're unsure which frames to go with, Warby Parker has a virtual tool where you can scan your face and be presented with recommendations based on your facial features and style preferences. OakleyOakley Gascan Steel SunglassesMaterials: O Matter (a proprietary, nylon-based material) | Polarized: Yes | Color options: 10 total, including Matte Black and Matte ClearOakley is known for its performance sunglasses that stay put through rigorous exercise, and high velocity circumstances," according to the brand. This wrap-around style has angular lenses that you can customize based on your preferences (for example, you can add prescription lenses or the brand's Prizm lenses for better contrast). Another bonus? Replacement lenses are available for specific designs in case they get damaged or scratched. Materials: Acetate | Polarized: Yes | Color options: 8 total, including Grant Tortoise and Dusty AquaOliver Peoples is a Los Angelesbased eyewear brand specializing in timeless designs that draw inspiration from film, art and music. The branding is discreet, and the styles feel sophisticated yet cool—the Cary Grant Sun is no exception. As the name suggests, the frame is a modern take on the shades worn by the actor in North by Northwest. Choose from two sizes, and a virtual try-on tool can help you visualize the frames before you purchase them. The Forbes Vetted team has researched, written and published dozens of eyewear stories, including roundups of the best prescription sunglasses and best glasses for men. Katherine Louie, the author of this piece, is a lifestyle editor with extensive experience covering fashion and lifestyle topics. She is a nearsighted glasses-wearer who has spent countless hours selecting new frames and prescription sunglasses online and warby Parker. This article was overseen by deputy editor (and in-house style expert) Kari Molvar, who holds a certificate in fashion styling from the Business of Fashion. Molvar herself has worn glasses for more than 30 years. Louie also gathered key insight and guidance from Kim Nemser, chief product and supply chain officer at Warby Parker. To find the best sunglasses for men, we considered several factors: material, style, color options, lens type and price. Our fashion editorial team focused on top-rated brands and retailers known for high-guality evewear, such as Ray-Ban. Warby Parker, Raen and more, We read through hundreds of customer reviews for standout product traits and essential details and only featured brands with straightforward return and exchange policies, should you need to make any swaps. The final products on this list reflect in-depth research conducted by our writer and meticulous vetting by our fashion editorial team. When choosing sunglasses, many guys want to know which pairs will be most flattering on their face. Neutral-colored glasses are easy to pair with anything in your wardrobe, and won't go out of style. However, if you tend to wear brighter colors and want sunglasses to match, don't be timid about vivid colors. "Choose frames that make you feel comfortable and confident," says Nemser. You can also use your skin tone and undertones to determine which pairs complexion the most. Aside from the color and style, here's what else to look for. Size And Shape Sunglasses usually come in a variety of sizes and shapes. To figure out the right size for your face, look at the lens width (the diameter of one lens), the width of the bridge (the connecting piece between the two lenses) and the temple length (the length of the entire temple arm). A helpful trick is to find a pair of glasses that you already own—and that fit you well—and measure them to have something to use as a guide. When it comes to shapes, an old general rule of thumb is to choose frames opposite your face shape to balance out proportions. For example, square glasses complement a round face, while round glasses look good on square faces. The easiest way to see if a particular size and shape flatter your face is to try them on in person. If you can't do this, certain brands (such as Raen, Roka and Warby Parker) have a virtual try-on feature to help
you visualize the final look. Materials and Hardware "Consider how and when you'll wear your sunglasses," says Nemser. "For example, you can opt for a durable yet lightweight style for active days at the beach or on the tennis court." Most frames are made from acetate, a plant-based plastic with a lightweight feel. Metal (aluminum, titanium and stainless steel are the most common) and nylon are other popular frame materials. For added durability, look for high-quality hardware, like stainless steel. The glasses should open and close easily without resistance. Many frames also have silicone nose pads to prevent slipping and relieve pressure. Polarization Sunglasses don't have to be polarized to be effective, but this lens treatment can help reduce glare and enhance visibility, especially when driving. Note: Polarized lenses are not the same as UV-blocking lenses. When selecting your glasses online or in-person, polarization might be a separate add-on that costs more (Warby Parker charges an extra \$50, for example). What Sunglasses made from acetate, metal or nylon with durable metal hinges. When trying on pairs, the frames should feel sturdy and have a substantial weight; you can tell immediately if the frames are thin and flimsy. The temples should also open and close without resistance, and shouldn't pinch the side of your head when you try them on. Additionally, look for lenses with 100% UV protection to protect your eyes from the sun's harmful rays. Which Sunglasses Give The Best Eye Protection? Choose sunglasses with 100% UV protection or UV400 for the highest level of protection. This feature should be noted in the product description if you're shopping online. What Is The Most Popular Sunglasses Brand? Some of the most popular sunglass brands for men include Ray-Ban, Warby Parker and Oakley. However, all the brands in this guide are known for their comfortable, stylish and high-guality designs.
