Byk gardner micro gloss 60 manual

Intelligent functions for any activity Different activities require different tools. The scroll wheel easy to turn the glossmeter quickly shows all the necessary functions A ¢ ¬ "even without a PC: the base mode is your tool to quickly control the lucidazione of some samples. The statistical mode not only shows the average but all the statistical data required to judge whether the measured difference is significant or that the shiny surface so is your champion. Define what you want to see: Mean, standard deviation, range, min / max, Ã ¢ ¬ | the mode of difference allows you to define a reference with the passage limits / fail and compare all of the following measurements on the selected reference. the indication pass / fail colored is displayed on high resolution display Å ¢ â ¬ " ideal for production control. The continuous mode is the most efficient way to quickly check the uniformity of a large surface area of the sample. It defines the measurement range and are now ready to continuously measure the gloss by sliding the micro-gloss on the surface. At the end, displays the average media with very minimum. The Poligloss 60 is new in the world of low-cost tools, showcasing very unique benefits in industry accepted polished concrete. Accuracy The Poligloss 60 is certified to be accurate to the best world associations in Gloss; ASTM D523, BAM (Germany) and National Research Council (Canada) and NIST. The ease of use and simplicity are superior to that of the meters that cost twice the price. Control and calibration adjustment ninety-nine percent of the time, turn on the polygloss 60 Å o and are ready to go. Once in a blue moon, the value will be a figure than the value of the tiles. To adjust, turn the adjustment wheel until both values match. No buttons, no menus. The holder of the calibration plate Poligloss 60 Å of has a protective dual purpose to keep the gloss meter and clean the calibration tiles. The Glossmeter, at boot time, check the calibration tiles. The Glossmeter and clean the calibration tiles. The holder of the calibration tiles. The Glossmeter and clean the calibration tiles. on and ready to measure. Another button to place the measure on hold. Simple. The instructions are the North American English on technical support. Robusta external construction The casing has been designed for the duration. Absorb bumps and small drops onto hard surfaces. Range: 0 - 199GU Repeatability: 1GU reproducibility: 2GU Measuring point: 1/2 "x 1/4" - 12mm x 6mm Size: 4.3 "x 1.3" x 3.4 "Weight: 11 oz. - 300 g Temperature: 50 Â ° -104 Â ° F No condensation ISO 2813, ASTM D523, DIN 67530 Glossmeter sold Each has two years warranty right here in North America.
