

I'm human

Popular book lists for high school and middle school students can be found on this website. The Tell-Tale Heart, a classic literature piece, is also featured with various quiz options. Users can filter quizzes by difficulty level, from 1 to 9, with 9 being the most challenging. Additionally, quizzes can be sorted by interest category, including fine arts, history, and science. A vocabulary section on this website provides information about word ranking, which is based on four main criteria: frequency of use in a book, relative to its reading level; common usage generally; appearance on review lists for standardized tests like the ACT and SAT; and memorable usage within the story. The website also features a quiz status section, where users can report any errors or suggest improvements. A printable answer key is available for quizzes, which includes a † symbol next to unedited questions. All listed books have been edited by human editors to ensure accuracy. Users can navigate through the website using browser-specific shortcuts and adjust word ranking criteria as needed.
