It is bold of Nolan to make such a carefully dense block. He ispeople actually want to see FULL mOVIE more than once so that they can understand correctly, that some may not. This film makes Inception's history look like tic-tac-toe. Ergo, it's hard for me to give an accurate assessment without seeing it twice, as I'm still trying to figure out if everything really makes sense. If you do, this movie is easily a 9 or 10. If he doesn't, he's a 6. It is also not helped by the fact that the dialogue in the first 15 minutes of the film is painfully difficult to understand / feel. Or they were behind the masks; they were practically tripping; the sound effects were too noisy; or all the above. Exposure scenes are also waaayyyyyyy too short for something of this complex — a problem shared even with FULL mOVIE in reality.(FULL mOVIE had this minimalist exposure problem explaining Blight, where if you were not careful, you would have lost this sentence/stage throughout the film explaining that Blight was a viral bacterium: "The Earth's atmosphere is 80% nitrogen, not even breathing nitrogen. The light does, and as it thrives, our air gets less and less oxygen"). I think it's a Nolan quirk. Let's hope, a review of the audio movie orders the sound by mixing. I like the soundtrack, but it's too strong initially. I liked all the actors. You think John Washington can't act at first, but it can, and it grows on you as the film progresses. And Pattinson is his usual charming self. Elizabeth is aIreatments. And so on. It's worth looking in both cases. See it with subtitles if you can. And definitely don't expect to fully understand what is happening the first time around. It's a really complicated movie. It will be very difficult for an average viewer to collect all the information provided by this movie at the first watch. But the more you look at it, the more hidden elements will come to light. And when you are able to put these hidden elements together. You will notice that this film is just a "master" that takes the legacy of Christopher Nolan Forward If I talk about acting, then I must say that Robert Pattinson has really proved himself a good actor in recent years. And I'm sure his acting skills will increase with time. His performance is fascinating and very smooth. Every time he's on the camera, he steals fire John David Washington is also fantastic in this movie. His performance is exciting, I hope to see more from him in the future. Other characters like Kenneth Branagh, Elizabeth, Himesh Patel, Dimple Kapadia, Cl  mence Po  sy also did very well. And I don't think we need to talk about Michael CaineTalking about music, his great. I don't think you'll miss Hans Zimmer's score. Ludwig did a job. There is no lack of good score in the movie They must love the post editing and production that was put in this movie. I think his fair to say that this Nolan film has focused more on his post production. The mainin the film is the sound that mixes. The plot is already complex and some dialogues are very soft due to the high musical score. It makes it harder to figure out what's going on in the movie. Other Nolan films also had strong BGM. But Audio and dialogue were not a problem My humble request to all is to let the film sink into your thoughts. Let your mind hold all the elements of this film. I'm sure other people will find it better. Even those who think they have the plot. I bet they're wrong. FULL mOVIE is the new long-awaited film by Christopher Nolan. The movie that is set to restart the post-Covid multiplexes. It is a manic, extremely strong, extremely baffling ski-fi cum spies rollercoaster that will love a lot of Nolan fan-boys, but that left me with very mixed views. John David Washington (Denzel's lad) plays "The Protagonist" — a crack-CIA field agent who is an army an unstoppable man in the style of Hobbs or Shaw. Recruited in an even more shady organization, it is in the wake of an international arms dealer, Andrei Sator (Kenneth Branagh in full evil mode). Sator is pushing his alien wife Kat (Elizabeth Debicki) into the custody of their son (and the film unusually has a BBFC alert on "Domestic Abuse"). Our hero throws the world to try to prevent a very particular type of Armageddon, while also maintaining the vulnerable and attractive live Kat. This is the cinema to its largest and most daring. Nolan took a "splurge" film gun, filledwith money, set it on quick fire, remove security and let tear to the screen. Since Nolan is famous for doing all its 'effects' for the real and 'in camera', some of what you see executed is almost incredible. Did you think that crashing a train through rush hour traffic in "Inception" was crazy? You haven't seen anything yet with the airport scene! And for the lovers of Chinooks (I must admit that I am one and run out of the house to see one if I feel it coming!) there is positively Chinook-p-rm on offer in the ridiculous huge final of the film. The aspects of the reversal of history also lend themselves to some scenes of struggle — one in particular at a "free" airport — which are bizarre to look at and, I imagine, technically extremely challenging to detach. In this regard John David Washington is an acrobatic and talented stunt performer in his right, and must have formed for months for this role. Nolan's crew has also developed the pre-blocking of aerial miles, as positions vary worldwide. The offices included Denmark, Estonia, India, Italy, Norway, the United Kingdom and the United States. Hoyte Van Hoytema's cinematography is lush in the introduction of these, especially the beautiful scenes of the Italian coast. Although I missed David Arnold's strings that would generally introduce these into a Bond movie, it seemed to be missing. Also the "tempy-wimey" aspects of the plot are intriguing and very wisely made. Therenumerous points in which you think "Oh, this is a sloppy continuity error" or "Starting the production design team missed that cracked wing mirror", then in the movie, you get at least a dozen "Aha!" moments. some of them (no spoiler) are mascelle-droppingly spectacular. Perhaps the best touch is hidden in the final line of the film. I only processed it when I came home. and so at the first of my significant sockets with black box. the sound mix in the film is everywhere. I'd be stronger than that. It is really terrible (expletive deleted) nolan often implements shaker makeup to have characters in the game provide plot exposure to help understanding, but unfortunately, all this dialogue of exposure was largely incomprehensible. this is due to:the volume of ear of sound: -----the audience of films is about to suffer from "Black Boxis" (lol); dialogue is poorly mixed with the music of ludwig g  ransson (wot? no hans zimmer;) aaron Taylor-Johnson was particularly intelligible for my ears. Overall, looking at this with subtitles to a special exhibition could be advisable! Okay, so I only have a PhD in physics, but sometimes I've lost completely as far as the complexity of the plot. did "Inception" look like "The Tiger came to Tea." There was an obvious "McGuffin" in "Inception" — ("These 'livells of dream'... How exactly are they designed??? ? ... "Don't worry... they will never notice." In "Black Box" there are McGuffins nested in McGuffins. Most of this is randomly waving away as "luxury stuff... you are not qualified" that feels vaguely condescending to the public. At one point, Sator tells Kat "You don't know what's going on, do you?" and she shakes her head in white. We are with you there luv! There are also gaps in the pot plot. The word "Black Box"? What does that mean? Is that just a password? I'm no wiser. The manic rhythm of FULL mOVIE and the constant din means that the film gallops together as a series of disconnected action pieces (always brilliant). For me, he has no emotional heart of Cobb's marriage problems from "Inception" or the father/daughter separation of "Black Box". In fact, you barely care about someone in the movie, maybe with the exception of Kat. It's a talented cast. As mentioned earlier, John David Washington is muscular and athletic in the role. It is a great load for the actor to bring in such a film tent-pole, given its only significant role protagonist before was in the excellent BlackKkiansman. But I does. A worthy successor to Gerard Butler and Jason Statham for action roles in the next 10 years. This is also a great performancecrobert skatenson, in his highest profile film in a long time, playing vaguely alcoholic and Carr  -esque support boy, co-star of skatenson clemence po  sy also opens — rather more un-glam than usual — as the scientist plot-expositor soon in the film, even the regular nolan dog michael jumps out. Although the legend of 87 years is beginning to show its age: his speech was obviously impressed at the time of the film (although Mr. Nolan tries to disguise it with a mouth full of food!) but in my book, any amount of dog in a movie is an advantage. also has the best killer line in the snobba movie! However, they are kenneth branagh and elizabeth debicki that really stand out. they were both fabulous, especially when they were bouncing each other into their royal conjugal battle. so, since this was my most anticipated movie of the year, it is a little egg of a cared for me. a mixture of being awe-struck sometimes and slightly disappointed to others. It's a movie that needs a second watch, so I'm coming back today to give my ear drums another bashing! and this is one where I reserve the right to revisit my rating after that second watch. it is not likely to go down... but it could go up.(for the full graphic review, check one Mann's movies on tinterweb and facebook. Thank you, because this film will be non-spoiler. I cannot say too much about history. However, what I can do is: the story of black box is quite dynamicthat you won't understand until he wants you. So for the first half, your brain is fighting for tips and puzzle pieces together history. It's not until half of the film FULL mOVIE invites you to the fantastic narration of Christopher Nolan. Agire is beyond phenomena, and I would be sincerely surprised if neither Robert Pattinson nor John David Washington does not receive an Oscar nomination for the best actor. It is also difficult not to mention how good Elizabeth Debicki and Aaron Johnson are both. All around, great acting, and dialogue amplifies the quality of the film. The idea of this film is damn fascinating, and while there are films that explore the journey over time, there has never been anything like this. It has such a beautiful charm and for the most part, it explains everything thoroughly. It feels much more complex than any form of time travel we have seen, and no less could be expected from Nolan. Oh my lord, the score for this movie fits perfectly. Every scene that aims to feel intense was handcuffed by a hundred because of how good the score was. Let's say that none of them will be found iconic, but they adapt to history and scenes so well. In the end, I came out, I feel very satisfied. However, I have problems with the movie that I can't really express without ruining the pieces of history. There are certainly small inconsistencies that I found myself discovering while history progressed. However, I had onlyproblem I found had an impact on my fun. This question was the understanding of some of the dialogues. No, not in the sense that the film is too complicated, but more than it was difficult to understand it was said sometimes. It seemed that the film required subtitles, but probably because, at a time of the film, there was much exposure. However, I liked this movie, I will watch it at least twice more, and I think most of you in this group will enjoy it. If it is possible, I suggest you look at it in the theatres, to get that emotion.(4/5) & (8.5/10) for those who care about the numerical scores. At first, I want to ask Christopher Nolan a question, how the hell did you do that? Seriously, I want an answer, How he wrote this masterpiece! How did you get this complicated, fabulous and creative idea? What's going on in your mind? The story is written and directed perfectly, the narrative style was absolutely unique. I have no idea how anyone can direct this story, which was a great challenge, and as usual Nolan gave us a masterpiece that we will put next (Memento), (Inception) and (Black Box) The film is so far in a good way, there was no boring moment. Chemistry between John David Washington and Robert Pattinson was great and fun and both of their performances were really good. Elizabeth Debicki's performance was the best in the film because she had the opportunity to show her acting skills and accumulated that possibilityHe showed us a level A recitation. Music was not unique and distinct as FULL mOVIE music for example and I think this film needs Hans Zimmer's touch, I'm not saying that Ludwig G  ransson failed but Hans Zimmer in another level. If there was something I would say I didn't like in the movie it would be that Nolan discarded any set up or background characters except Elizabeth Debicki dramatic story, but it wasn't so bad for me, I didn't care about this, the exciting story didn't give me the chance to focus on it. But the real problem was the third act, it was really complicated and I lost and convinced myself to discard the questions that were in my head and enjoy the well-made action sequences and the performance of Elizabeth Debicki. I think this kind of movie is best done with a second and third watch. I honestly don't know where to start with Black Box. I love Christopher Nolan's work but I've never seen a more complicated film (and I understood Memento). After almost three hours, I came away from FULL mOVIE not knowing myself. There was splendiferous more than piles of ashes. Was there time travel? There was definitely something about the reverse of time. I mean, does Nolan even understand what he wrote? Look, I credit the director because he's one of the few remaining directors who can create a convincing and smart blockbuster. FULL mOVIE is full of Nolan brands — free Michael Cainea strong, really strong score, complete with splendif cinematography and set-pieces inventive action. this time however, nolan finally managed to "out-Nolan" himself: the palindromic plot, while creatively ambitious, is simply too complicated for his good. full movie is overlong, overstuffed, pretentious and too exhausting to understand in its entirety — makes inception and full movie resemble lazy patch for comparison. I am aware of the technical magician and creative mastery in this film and Lord knows I will have to look at it again. for those who want a puzzle, full movie at least provides a unique cinema experience. but to really enjoy solving it nolan wants you to work very hard. to learn more familia croods 2 film online subtitrat in romana. filmul familia croods 2 online subtitrat in romana
